COMMENTS: Significant ground water level declines have not been noted (W.B. #24).
The water right plats indicate only limited ground water developed in the area.
Well location is near boundary separating two geologic units - Salt Lake formation
and Holocene alluvium. Alluvium has good yields with little drawdown. The Salt
Lake formation often does not produce sufficiently for irrigation. Static depth
to water is about 50-75 ft.

Dear Mr. Martineau:

One of the conditions of approval of your water Permit No. 11-7025 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before April 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. Mr. Bobby D. Fleenor

Dear Sir,

I received your letter of Dec 23, 1974 and I am writing to contest the the findings put forward therein.

I have 224 acres to irrigate instead of 153. I also asked for a permit for stock and domestic water when I applied for additional water to irrigate the acreage not originally called for in the first permit # 11-7025. The second permit is # 11-7051. I am enclosing a map of the land the intended water is to irrigate.

I think there must have been some mixup in the acreage.

Awaiting your reply

Dear Mr. Martineau:

Your December 27th letter contesting the issuance of a water right license on your Permit No. 11-7025 has been reviewed, and the facts you set forth agree essentially with our records.

However, at this time, we are proposing to license only Permit No. 11-7025, on which you requested the irrigation of 153 acres. Therefore, this license cannot be issued for the irrigation of more than the permitted 153 acres.

The examiner found that you were irrigating at least ten more acres, but these acres will be included when a license is issued on your Permit No. 11-7051. You have until March 1, 1979, to complete your project and irrigate the 65 acres of land included under this permit.

We hope this explains the current status of your two permits, and the reason the license is proposed for the irrigation of 153 acres of land.

If you still disagree with our findings, please let us know within 10 days, or we will issue the license as proposed in our December 23, 1974, letter.

Sincerely,

BOBBY D. FLEENOR
