Dear Sirs;

I was told by the person drilling my well that he would file with you on this well. I have received a little feed back and has caused me to wonder if things are right.

I have filled this form out as correctly as I can with the knowledge I have of the situation.

Also. the well was drilled along side of an old but smaller well. Would it be to my advantage to file a claim on the water and history of that old well?

Sincerely,

Ron Wells

Dear Mr. Wells:

O We are returning your application for permit to appropriate ground water as there is a filing fee of \$10.00 required before the application can be accepted. The application appears to be in proper form for processing; although you may wish to increase the rate of diversion to 0.04 c.f.s. which is our "present rule of thumb" value for a single family domestic use.

P If this new well is being drilled merely to replace an old well that will be abandoned, you may wish to file a claim to a water right instead of this application. The claim would have the advantage of saving information concerning the date of first use, but does not actually record your water right.

If this office can be of any assistance to you, do not hesitate to ask.

for helping to take care of this small
matter.

I am still not clear as to whether
the well driller filed with you or not.
Would you please let me know the proper
procedure for taking care of this matter
as I may drill a well for irrigation
purposes and I also have a friend who
is about to drill. I was told by the
driller that he filed with you and so it
was unnecessary for the customer to obtain
a permit. This I might add is the opinion
of a couple of friends also.

Thanks again,

Ronald D. Wells.

Dear Mr. Wells:

Attached herewith is departmental receipt No. 10285 in the amount of \$10.00 for your application for permit which was received in this office this date. Because of the changes, we have taken the liberty of retyping the application and we would appreciate your signing it exactly as your name appears in Item 1 and return is as soon as possible.

It is the responsibility of the water user to file the necessary application for any water rights in connection with a new well. Well Driller's are required by State law only to file a driller's report (well log) listing the details of the construction of each well. This is a separate requirement which has nothing to do with water rights. It is not mandatory that a water right filing be made for a well to be used only for a single family domestic use. This use could include animals normally associated with a household and up to a $\frac{1}{2}$ acre of irrigation land and gardens. Although a filing is not required, it is still advisable to have the right recorded. I am enclosing a "Water Users Handbook" for your information.

Very truly yours,

NORMAN C. YOUNG
District Engineer

Dear Mr. Wells:

One of the conditions of approval of your water Permit No. 11-7038 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before September 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
