Dear Mr. Haggerty:

This office has received your letter of June 9, 1975, stating a desire to protest issuance of a permit in connection with the above referenced application.

You should be aware that the following are the principle items we can consider at a conference &/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

- (1) Will the proposed use reduce the quantity of water under existing water rights?
- (2) Is the proposed water supply insufficient for the purposes intended?
- (3) Is the application made in good faith or for delay or speculative purposes?
- (4) Has the applicant sufficient financial resources with which to complete the project?

The Department will withhold action on this application for ten days to allow you time to submit a valid protest. We are enclosing a copy of the application for your review.

Unless we hear from you on or before June 28, 1975, final action will be taken on this application. If you have questions, please contact us within the 10-day period.

Dear Sir:

Last July (1975) I received approval for filing on the water rights on my property. Ref. (11-7084)

Today a man by the name of Glen Irving comes on my property and tells me that the water belongs to him, that he filed on the water in 1947 and that he wrote the Dept. of Water Resources a letter last year (1975) protesting our filing. This included an assortment of threats.

Personally I think the man is lying because if he had the water rights or had written you in protest, the Dept. would not have approved my application. However I do not take threats lightly and do not intend to be harassed by this man or his attorney. Please send me a letter of clarification that I may duplicate and send to this Irving that I may settle his misconceptions once and for all.

I have invested \$2,000. in my culinary water system and improvements and I don't like such threats to my investment.

Appreciate your attention to this matter as soon as possible.

Yours truly,

Edward B. Kutylowski

Dear Mr. Kutylowski:

Your recent letter requested information on any other water rights, especially those of Mr. Glen Irving, that may exist on the springs shown as the source of water on your Permit No. 11-7084.

A search of our records indicates that your permit is the only water right of record on that spring. However, you should be aware that if the spring has been used for several years, a water right for that use may have been established by the diversion and beneficial use of that water. Your permit would entitle you to the water that is not being used.

Your permit has been reviewed for a letter of protest from Mr. Irving, but no protest was received from him. A letter was received from the Henry Stampede, Inc., but was not acceptable as a protest. Henry Stampede was allowed ten days to submit an acceptable protest but no protest was ever received.

Your permit has a priority of May 13, 1975, and is, of course, subject to all existing prior rights.

If you have further questions or require additional information, please do not hesitate to contact us.

Sincerely,

Gentlemen:

One of the conditions of approval of your water Permit No. ~~11-7084~~ (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before August 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

SYSTEM DESCRIPTION:
Surface water from an unnamed spring is collected by a 4" diam. buried perforated pipe, packed in gravel and then directed via pipeline to a 1000 gallon steel tank buried a short distance from the spring. There is a 1/2 H.P. buried pump inside the tank that provides pressure for the water system. Water is diverted from the tank and into Kutylawski's residence through a 3/4" diam. conduct.

REMARKS: Although this spring was filed on for 3 domestic units, only one house is at present putting this water to a beneficial use. Mr. Dimambro sold his house to Mr. Lowe who upon purchase of the house had a domestic well drilled exclusively for his use. System shown & described by Stan Kutylawski

Examiner's Signature Anthony R. Kozlawski Date 2/23/78

Checked by Donna M. Dunn Date 2/28/78

Approved by _____ Date _____

3 people live at residence, 2 baths, kitchen sink, no dishwasher, washing machine. Kutylawski keeps a dozen domestic ducks in a small pond created when an old stockwater conduct broke & provided necessary flow.
