Virgil & Russell Boehme
Geneva,

Gentlemen:

On August 11, 1976, personnel from this office visited the well under your Permit No. 11-7086. This examination was to finalize the water permit and collect data required for the licensing of the well.

The examination indicated that the system was not in running order nor was a measuring device approved by this Department installed at the point of diversion.

This office will hold the field report until the beginning of the 1977 irrigation season. Hopefully before that time you will contact this office and indicate that the measuring device has been purchased and/or installed and that the well is in working order. We will then re-examine the system with you or your representative present. Please contact me to set up an appointment for this re-examination.

Compliance with the conditions on your permit is the only way a license can be issued pursuant to the Idaho Code for your water right development and the land included under the above referenced permit.

If you have any questions concerning this matter, please do not hesitate to contact me.
