Dear Mr. Crane:

The enclosed application must include some additional information before it can be accepted by our Department.

Please include in Item 8a(1) the place of use of the stockwater. Also, list in 8a(3) the number and kind of livestock to be watered.

Please indicate on the map the location of the temporary diversion point, as it should be recognized as a diversion point for this right.

As the irrigation season on the land in question is April 15 through October 15, Item 4 should be changed to reflect this.

Upon completion of these changes the application may be sent to our Eastern Regional Office at 1515 Lincoln Road, Idaho Falls, Idaho 83401. They will be happy to help you further.

Sincerely,

Star Route #1
Montpelier, Idaho 83254

Dear Mr. Crane:

Please find enclosed your application for permit and check No. 92-206 in the amount of \$55.00 which we again find necessary to return for correction.

You have included the location of a temporary point of diversion in the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 21, which is the same description as the permanent point of diversion you previously indicated. I have marked a small red "x" in the NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 28, which is where you indicate it should be in Item 3.

Also, the irrigation season in your area is April 15 to October 15 and, therefore, the period of use in Item 4 should be changed accordingly.

Please make the requested corrections and return with your check at your earliest convenience.

If you have any questions concerning this matter, please feel free to contact me.

Very truly yours,

Dear Mr. Crane:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 11-7093. You should be aware that the following are the principal items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

- (1) Will the proposed use reduce the quantity of water under existing water rights?
- (2) Is the proposed water supply insufficient for the purposes intended?
- (3) Is the application made in good faith or for delay or speculative purposes?
- (4) Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of 0.02 cubic feet per second of water for each acre of land, or an annual amount of 5 acre feet for each acre of land, unless the applicant can show that more is required (Section 41-202, Idaho Code).

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf.

If we may be of any assistance, please contact us.

Dear Mr. Kohler:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

- (1) Will the proposed use reduce the quantity of water under existing water rights?
- (2) Is the proposed water supply insufficient for the purposes intended?
- (3) Is the application made in good faith or for delay or speculative purposes?
- (4) Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

NOTICE OF CONFERENCE
AND/OR HEARING

On July 7, 1976, Robert M. Crane filed with the Department of Water Resources an application to appropriate the public waters of the State of Idaho. On July 29, 1976, the Department received a protest against approval of said application from William B. Crane.

The Department has set the matter of protests for conference and/or hearing for Friday, November 5, 1976, at 11:00 a.m., in the Franklin County Courthouse, Preston, Idaho. Any hearing will be held in accordance with the Rules and Regulations of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

Failure to appear at the time and place set for hearing by the applicant or protestants may allow the Department without prejudice to dismiss the protests or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dated this 26th day of October, 1976.

Conference was held at Preston, Idaho, on November 5, 1976.

After hearing the evidence and testimony it was decided that the protestant and applicant would allow the Idaho Department of Water Resources to reach a decision based upon the information obtained at this conference.

It was also felt that the applicant and the protestant might be able to reach an agreement and if an agreement is reached this Department will be notified and a Memorandum Decision will not be necessary.

RE: Conference Held November 5, 1976

DATE: November 16, 1976

All parties concerned agreed to let the Department reach a decision on the application; however, they thought they may be able to agree on building a joint system so that the protest could be resolved.

We agreed to hold the decision for thirty (30) days to allow them to work out their differences if possible.

In the meantime, a field exam should be done to determine the extent of the protestants irrigation and the losses in the creek.

Re: Protests Against Approval of Application for Permit No. ~~11-~~
7093 in the Name of Robert M. Crane.

Atten: Loren O. Holmes

Dear Mr. Home s :

A hearing in this matter was held November 5, 1976, at 11:00 a.m., in the Franklin County Courthouse, Preston, Idaho. At the hearing, it was suggested by the Department that the Protestant, William Crane, and the Applicant, Robert Crane, attempt to reach an agreement on the division of the water in question. The Department then prepared a short handwritten agreement providing that the Applicant and the Protestant would temporarily waive the requirement that the Department prepare a memorandum opinion on the hearing pending a mutual agreement on the division of the water in question. It is our understanding that this agreement is still in the Department's possession. We request that you send us a copy of this agreement.

We further wish to bring to your attention that the Protestant and Applicant have not succeeded in reaching a mutual acceptable division of the water in question. Therefore, it is the request of the Protestant, William Crane, that the Department proceed to issue its memorandum opinion in this matter.

It is also the request of Mr. William Crane, that the Department take the necessary steps to have the stream flow of Three Mile Creek, the disputed water, measured. It is felt that it would be extremely helpful in resolving this matter to know the total stream flow available for diversion.

We wish to thank you in advance for your cooperation in this regard.

Sincerely,

Jay A. Kohler

RE: Pre-Permit Field Examination
DATE: September 2, 1977

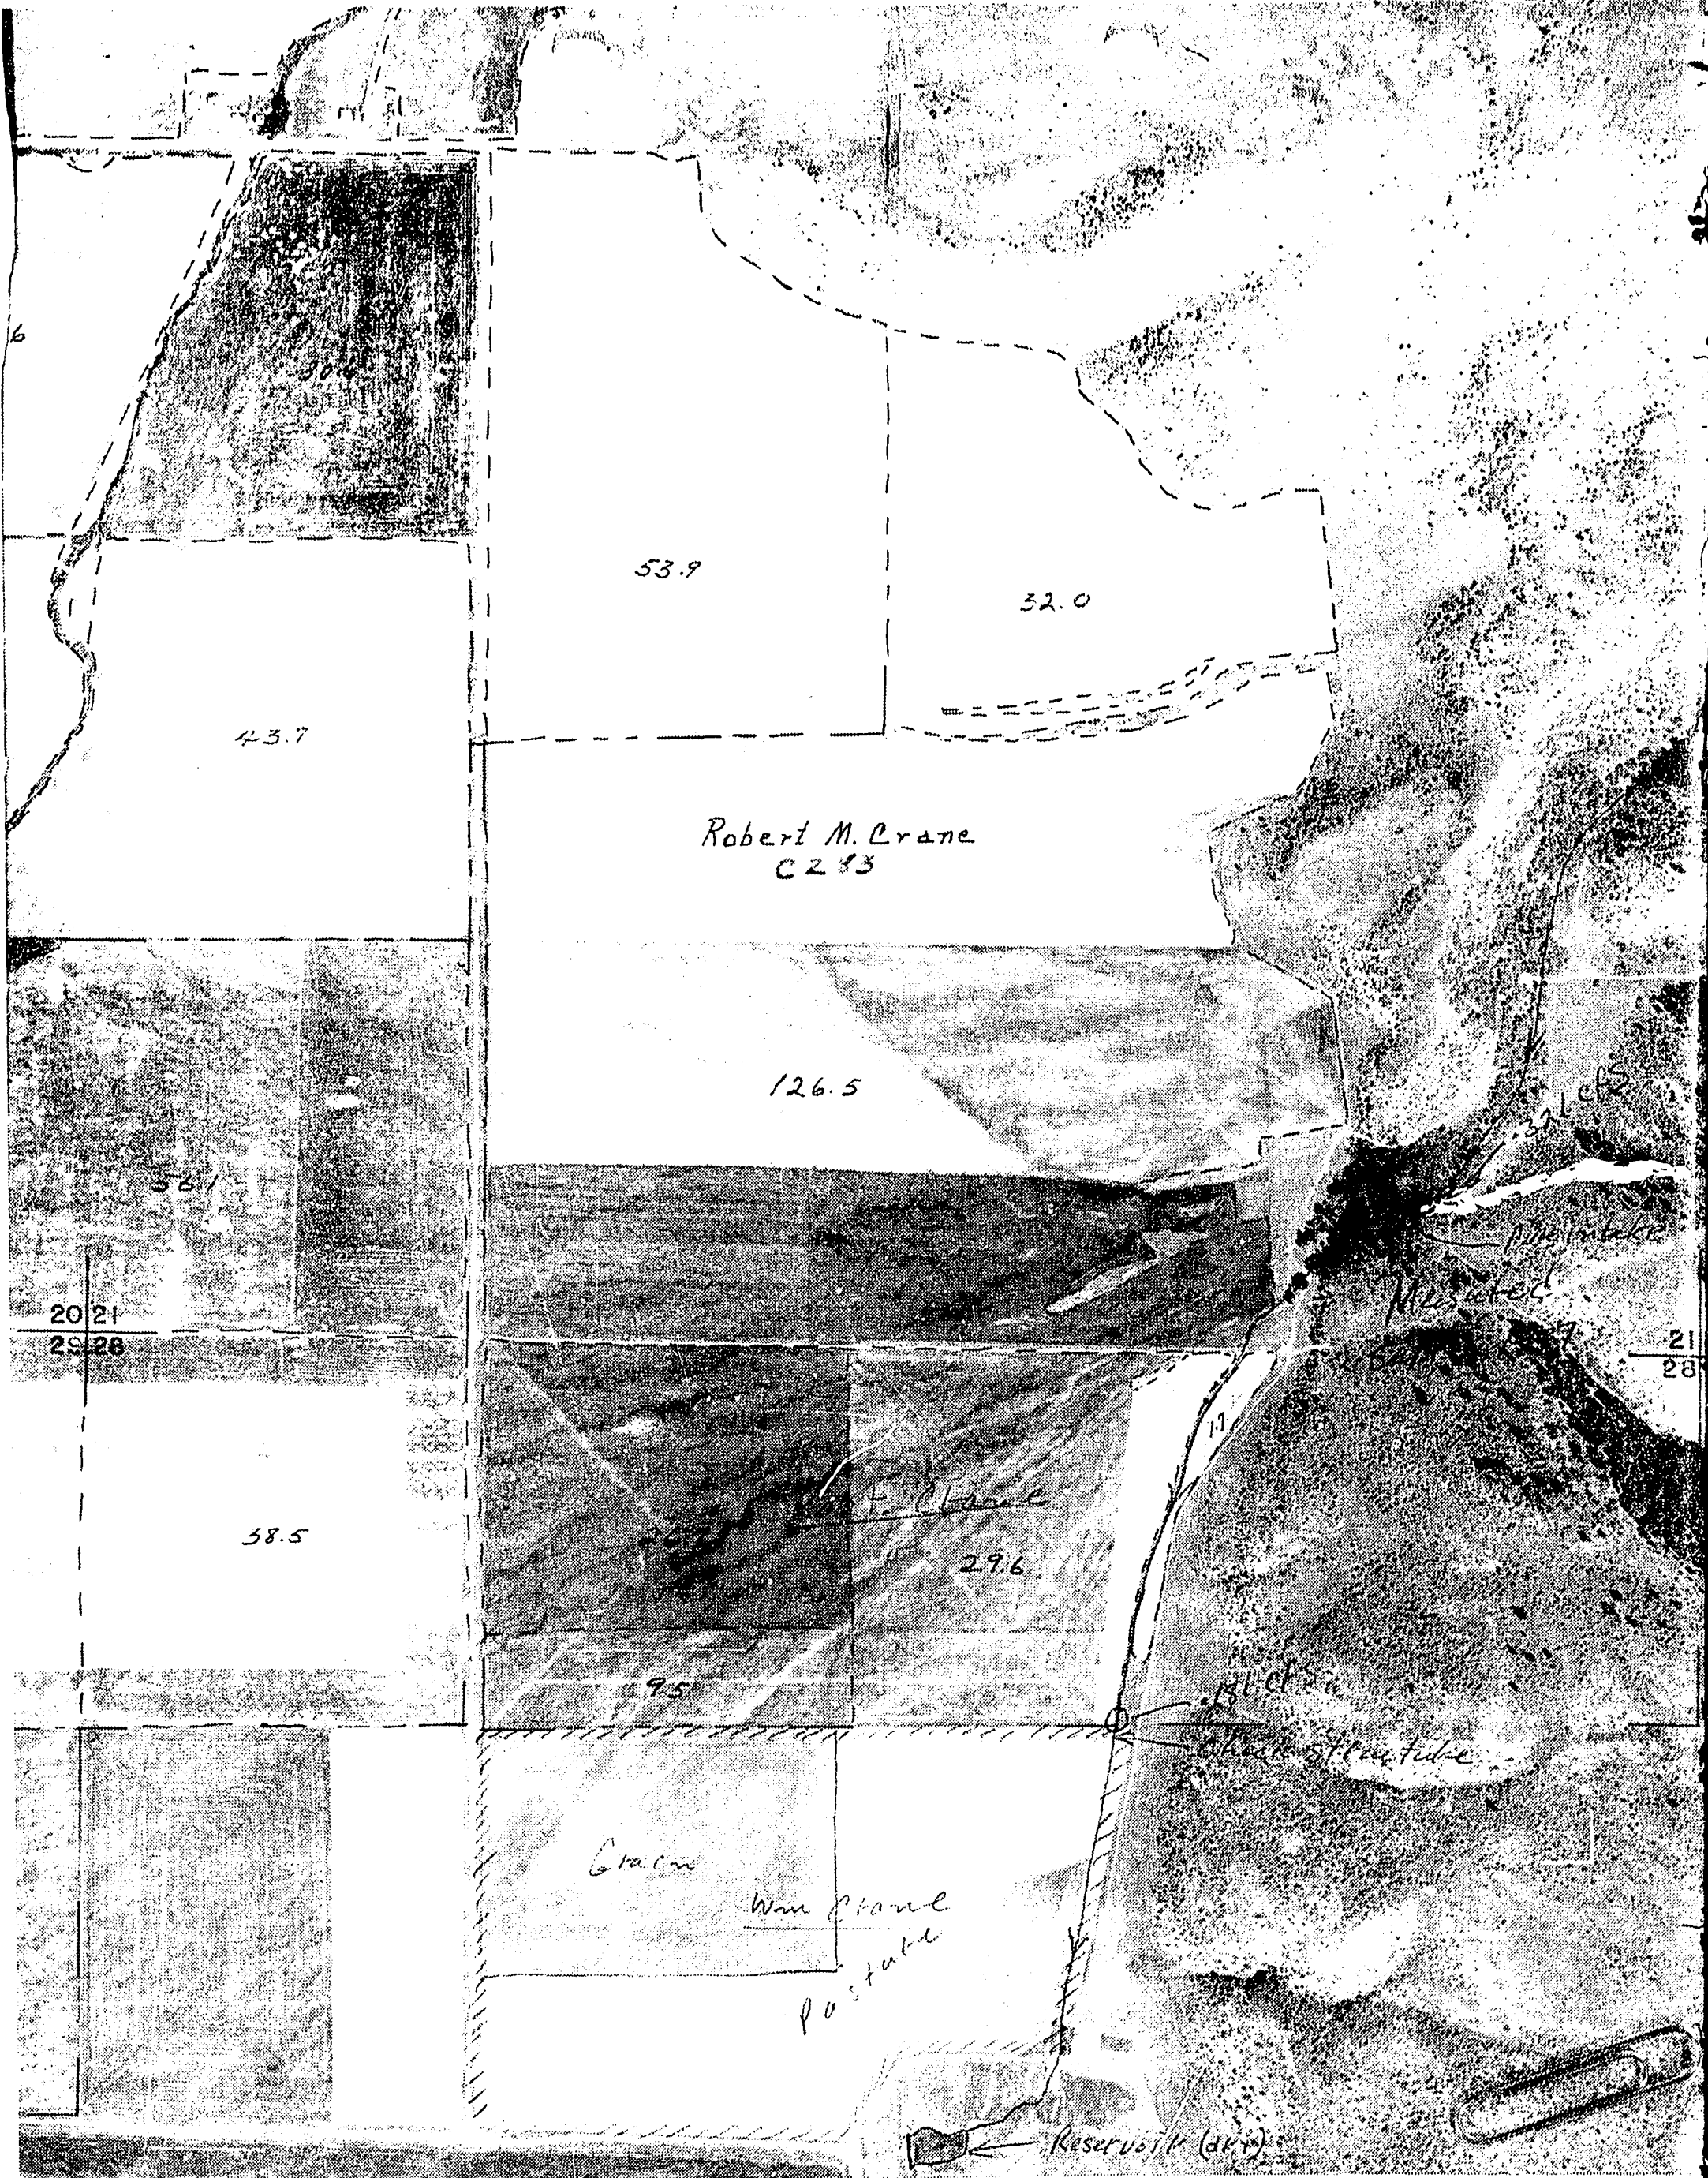

The water was measured at the two points indicated on the attached aerial photo.

The flow measured 0.321 c.f.s. at the upper point, which is where the applicant presently diverts water, and 0.181 c.f.s. at the downstream end of the applicant's property, where the water enters the protestant's property; a distance of about 2,000 feet. No water was reaching the reservoir on the protestant's property another 1,500 feet downstream.

The aerial photo and field observation indicate that the protestant can irrigate about 60 acres adjacent to the creek if water is available. There is an old wooden check structure at the upstream end of the protestant's property indicating that the water has been diverted in the past.

The protestant's claim No. 11-4051, claims irrigation of the SW $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 25, T. 11S, R. 44E, however, the Bear Lake County ASCS Office aerial photo of the section indicates that he does not own the NE $\frac{1}{4}$ SW $\frac{1}{4}$, but instead owns the SE $\frac{1}{4}$ SW $\frac{1}{4}$, which is not reached by water from this stream. Stockwater was being used upon the protestant's property and the applicant had extended his pipeline to supply stockwater.

Whatever use the protestant has made of the water in the past was probably limited to the 60 acres within the SW $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 25, T. 11S, R. 44E.

November 22, 1977

Dear Sirs:

Robert M. Crane & William B. Crane
are writing in regard to the water
permit filed on Three-mile Creek.

William B. Crane wishes to with-
draw the protest filed against the
Robert Crane water permit no. 11-7093

We have agreed to share the
water in Three-mile Creek fifty per-
cent each.

The water is to be divided by
even number of days or even number
of sprinkler heads.

Mr. Robert M. Crane

Dear Mr. Crane:

- In accordance with your request of November 22, 1977, I have prepared an amended application for permit which includes both you and William B. Crane as applicants. The land list has been revised to include 70 acres of each applicant's land, which agrees with the findings of the field inspection which we made last fall.

The quantity of water has also been changed to 2.80 c.f.s. for irrigation which is one-inch per acre on the listed lands. I don't believe this reduced amount of water will be detrimental to the application since our field inspection showed a total flow of only 0.321 c.f.s. at the diversion point.

The application is filled out in the names of Robert M. &/or William B. Crane so that either one or both of you may sign it, and file proof of beneficial use.

If the application is satisfactory, please sign it and return it to this office with a \$10.00 fee for an amended application.

If no further difficulties arise, we will forward the application for approval upon completion of the advertising period. If you have any questions, please contact us.

WHEREAS, the above numbered permit was approved with the condition that a measuring device of a type approved by the Department be permanently installed and maintained as part of the diverting works; and,

WHEREAS, on July 1, 1975, the Department adopted a new water measurement condition which states: "An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department"; and,

WHEREAS, the former condition required the permit holder to purchase and install a measuring device or hire a professional engineer to certify the rate of diversion; and,

WHEREAS, the measuring device condition effective July 1, 1978, requires less capital expenditure by the permit holder; and,

WHEREAS, to be equitable to holders of permits issued prior to July 1, 1978, the new condition should be retroactive;

NOW THEREFORE, it is hereby ordered that the condition of approval of this permit related to water measurement is hereby changed as follows:
"The permit holder shall either install a measuring device or provide a certified measurement by a professional engineer or install an access port or other device as specified by the Department".

Dated this 1st day of June 1981.

Dear Wateruser:

The enclosed Order changes the measuring device condition of approval on your water right permit.

The changed condition is less restrictive and provides you the option to install an access port or have your system measured and certified by a professional engineer. Instructions for access port installation are also enclosed.

If you have questions regarding this matter, please contact the regional office nearest to you.

Sincerely,

DAVID R. TUTHILL JR., P. E.

Gentlemen:

Re: Permit No. 11-7093

This office acknowledges receipt of the statement of beneficial use submitted for the permit.

Before a license can be issued, a field examination must be made by a representative of this department. We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you or a representative may show him the system.

If you have any questions regarding the field examination, please contact our Eastern Regional office at 208 525-7161.

Sincerely,

RITA I. FLECK

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this Department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the Department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the Department, but you must within sixty (60) days of the date of this letter return to the Department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the Department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the Department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water right examiners will be available from this Department when examiners have been certified.

If your permitted use, in fact, has already been examined by the Department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the Department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

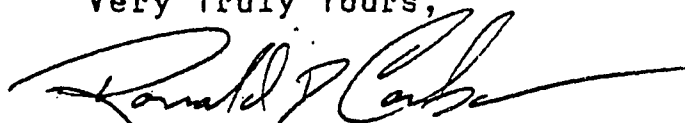

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following Department office:

Melvin R. & Timothy W. Crane, et al
Star Rt. 2
Montpelier, ID 83254

Dear Permit Holder(s):

This office acknowledges receipt of the Assignment of the above referenced permit to you. Enclosed for your records is a copy of the permit.

As new owners of the permit, you are required to submit either an EXAMINATION FEE or a statement from a certified examiner that he has been retained to do a field examination of your water use.

Enclosed is a copy of the EXAMINATION FEE NOTICE sent to the previous permit owner. Please read and take proper action. You should note that the notice was sent on December 8, 1986 and after 60 days a day of priority of your permit is lost for every day the fee or statement is not received by this office.

In order to keep this permit in good standing, you must respond to the Examination Fee Notice as soon as possible. If you have any questions regarding this matter, please feel free to contact us.

Sincerely,

JIM JOHNSON
Water Rights Supervisor
