ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 11-7280, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before April 1, 19 87.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: A lockable device, subject to the approval of the Department, shall be installed on the diverting works in a manner that will provide the watermaster suitable control of the diversion.

Measuring devices of a type acceptable to the Department shall be permanently installed and maintained in such a manner that releases from the reservoir can be compared to the inflow received by the reservoir.

The diversion of water under this permit for storage is not available during April 15 through October 15 and the inflow to the reservoir must be released to satisfy all prior rights.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Witness my hand this 29th day of April, 1982.

Re: Applications #11-7279 and
11-7280 (Bear Lake County)

Dear Mr. Robinson:

We have been apprised of your applications for permits to appropriate the public waters of the State of Idaho to provide domestic water for 29 campsites and five buildings (300 campers). The Idaho Regulations for Public Drinking Water Systems defines water systems serving 25 individuals daily, at least 60 days a year, as "public" and, therefore, subject to our regulations. The systems described by your applications would be classified as a "non-community" unless regular service is provided year-around. The regulations set forth minimum requirements for construction, water quality, monitoring, and maintenance and operation; further, the regulations (Section 1-8400.01) requires approval by the Department of plans and specifications prior to construction. A copy of these regulations is enclosed for your information.

If we may be of further assistance with the interpretation of the regulations, please do not hesitate to contact us (208, 236-6160).

Re: Applications for Permit #11-7279 and 11-7280
by the Lake Bonneville Council, Boy Scouts of
America

Dear Mr. Carlson:

Our comments on these two permits are as follows:

11-7279

We are informed this is a permit which the scouts have had for a number of years, and that there will be no change in water useage, diversion sites, etc. Approval of this permit would clear up the use of a spring which has been flowing into the reservoir since construction.

11-7280

This permit is to develop a small reservoir on Fern Creek for canoeing and swimming for scouts while they are at this camp. Fern Creek at this location is a small tributary of Stauffer Creek and contains no game fish populations.

We recommend that both permits be approved as they will not affect fish and wildlife resources in this area.

Sincerely,

Jerry Mallet

RE. Application 11-7280:

There is water available for appropriation under recreational storage during the non-irrigation season. However, as the irrigation season progresses, the natural flow rights on Steadler Creek & the Bear River should not have to bear the loss due to seepage and evaporation from the reservoir. I recommend the applicant be advised that following spring runoff no water is available for storage and the inflow to the reservoir must be released to satisfy downstream rights. Also to provide for regulation by the watermaster acceptable measuring devices and controlling works must be installed.

REQUEST FOR EXTENSION OF TIME

Department of Water Resources To provide additional time in which to submit proof
of beneficial use for a water right permit

The Idaho Department of Water Resources will consider this form as a request that the permit holder(s) be granted an additional period of time in which to complete development of a water right under the provisions of Section 42-204, Idaho Code.

Permit No. 11-7280

Name(s) of Permit Holder: Boy Scouts of America, Lake Bonneville Council

Post Office Address: 1200 E. 5400 S.

Ogden, Utah 84403 Telephone No. 801-479-5460

Date Proof Is Due: April 1, 1987

Describe what work has been completed toward the development of this water right:

(This must be filled out! If no work has been completed, show "none".)

The spring has been dug out with a backhoe to funnel more water into one area. Small pit gravel has been laid into the channel and collector pipe laid. Pipes are covered by pit gravel. Extra heavy visquine was placed over the pit gravel and then the pit was recovered with soil. Pipe is running now with full pipe of water

Costing \$ 1,000.00

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Due to the lack of time and the terrain conditions required to get a backhoe and other large equipment into the area we have not been able to totally complete the work for this water right. New holding tank must be put in place. (over)

Permit holder(s) request an extension to September, 1988.

PROOF DUE NOTICE

RE: Permit No. 11-7280

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1988. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK
Secretary/Records Manager

LAPSE NOTICE

RE: PERMIT NO. 11-07280

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced water permit has lapsed. This office did not receive either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time. You were provided the proper form in our proof due notice to you dated June 30, 1988.

Your permit cannot be reinstated unless you submit proof of beneficial use or submit an extension of time request showing reasonable cause for delay. Either the completed proof of beneficial use submittal (including the examination fee or a completed field examination report) or the extension request form together with the \$15 fee must be received by this department within sixty days of the date of mailing of this lapse notice or the permit will no longer be of any force or effect.

A proof of beneficial use form and a request for extension of time form are again enclosed for your use. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a governmental agency or by litigation which might bring title to the water in question.
