Dear Permit Holder(s):

Enclosed is a copy of your approved Application for Permit. Note that one of the conditions of approval is that diversion of water under the permit is subject to the control of the Bear River watermaster. The reason for this is that some hydrologic studies of the Bear River indicate that wells constructed in the sand and gravel aquifers of the area may intercept water that otherwise would have entered the Bear River. However, the extent of the alluvial material thickness is not known nor is the precise degree of interference of wells with the Bear River surface water flows. Studies do indicate that as much as 50% of the water diverted from a well located one mile from the river would have reached the Bear River if impermeable layers of clay on hard rock do not separate the river from the aquifer from which the well is producing.

The information available to us at this time does not warrant refusing to issue you a permit but does merit cautioning you that any permit issued by the Department cannot deprive water users with earlier rights of their water supply.

The reason for conditioning the permit and explaining the potential interference problem is to make you aware that future tests may definitely show that diversion of water from your well should be administered together with the older surface water priorities of the Bear River and tributaries. If this were to occur, it would essentially mean that there would not be water available for a 1981 priority diversion from your well since the Bear River surface water system is fully appropriated. By locating your well as far from the

November 16, 1983
Page 2

river as possible and by casing out upper water producing zones as the well is constructed, you may be able to reduce the amount of interference with the river.

We have enclosed instructions entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed for your convenience is the statement of beneficial use postcard that must be submitted when your project is completed.

Sincerely,

DAVID R. TUTHILL, JR., P.E.

Department of Water Resources

Dear Mr. Johnson,

I have reviewed your draft copy of the license proposed to be issued for water right 11-07324 and find it to be in error. The rate of diversion of domestic water is 0.08, not 0.04 as stated in your draft copy.

The total quantity of appropriated water would therefor be 0.11 CFS annually.

I especially request that the Conditions/Remarks portion of the license include the remarks stated in paragraph 10 of the original Application For Permit dated May 16, 1983 (copy enclosed). The original two wells referred to in the remark were wells serving single households, in service prior to 1963. Thank you.

Dear Mr. Lee:

I am writing in response to your letter of November 26, 1988 regarding right 11-7324. During the examination of your system on August 7, 1984, an agent from the Department of Water Resources calculated that your system had a total diversion capacity of 0.04 cfs. Hence, no single beneficial use nor combination of uses may exceed that capacity.

Regarding your request for inclusion of remarks from the permit to the license, remarks from the permit are not allowed on the license. There are a set of standardized conditions of approval which may appear on the license, but none of these were applicable to your right.

I hope that this information answers your questions. If we do not hear anything further from you within ten days, we will assume you have no objections to the issuance of the license as previously proposed and a final copy will be sent to you. Please feel free to contact this office if you need further assistance.
