DEAR SIR:

The holder of Permit No. 2184, Nelson, Meeker Co., residing at Riverdale, which permit authorizes the diversion of 1/2 second-feet of the waters of Springs at _____, desire to make proof of the completion of works of diversion, at _____, on February 25, 1907.

Will you therefore please arrange with the holder of said permit for an examination of the works of diversion, ascertain whether or not they comply fully with the terms of said permit, and render me a report on the condition of such works before the date fixed for said proof of completion, in accordance with the provisions of Sections 4 and 5 of House Bill No. 146, passed by the Seventh Session of the Legislature, approved March 11, 1903.

Your report should be of sufficient detail to enable me to figure out the amount of water the works are capable of diverting and conveying to the place of use; giving also the description of the location of the point of diversion, and, in case of irrigation, the legal description of the land to be irrigated.

Will you also make a map on the enclosed plat, giving all the essential features of the works, such as point of diversion, route of ditch, place of use, etc.

You should also arrange with the holder of said permit for the payment of your fee for this service and such proper expenses as you will incur in making this examination and report.

Please advise me promptly of your receipt of this communication, and whether or not you will be able to make the examination and report requested.

Dear Sir:-

I visited the works on the
at Riverdale Ida

Melton and Meeks springs on Feb 4 1901
and beg to submit the following report.

The works consist of 200 ft of 8-inch wood
pipe laid in the hollow in such a manner
as to collect the water and deliver it into a

From this tank the water is delivered through 5300 feet of iron pipe arranged as follows: the first 1100 feet is 4 inch pipe then about 900 feet of 2 inch pipe, the remainder being 1½ inch pipe. This pipe is laid 1½ feet below the surface of the ground and is on a gentle even slope with practically no variation in the surface of the ground. The difference in elevation of the two ends of the pipe being 80 feet.

The water of this spring is used ²¹⁸⁴ and is known as the Nelson & Meek ranch for domestic purposes. The garden, ~~and~~ chowder

Ans. Pipe line. It commences with a 4 inch at head and is reduced to 1.5 inch at point of delivery. It carries all the water that comes from the springs. I am under the belief that it carries one-tenth of a second foot of water.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have ACTUALLY been irrigated with said water.)

Ans. Water is used for domestic purposes and watering stock

Ques. 7. If for other than irrigation purpose, state how applied, amount of horse power generated, etc.

Ans.

Ques. 8. What is the minimum amount of water required for the use specified above?

Ans. I use all that comes

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am one of the original owners and the same partnership still owns it.

2184

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. All the time. It runs into a trough for the stock when needed and a tap for the house.

(Sign.) *Antone J. Kolson*

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in *Preston*, County of *Amiel*, State of Idaho, on this *25th* day of *February*, A.
