INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho.

June 6, 1921.

Mr. Walter Hawkes,
Clifton, Idaho.

Dear Sir:—

Under the terms of your permit No 4919 you are required to complete your diversion works on or before Sept. 15, 1921. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

State Engineer.

Gentlemen:

Since mailing the notice for publication in connection with proof of beneficial use of water under the above numbered permit, we find that The Preston News, to which paper the notice was mailed, is not qualified to accept legal notices for publication. Therefore, it is necessary that this publication be run for four weeks in another paper. We are this day mailing copy of this notice for the four weeks publication to the Franklin County Citizen, setting September 23rd as the date for making proof. We trust that moving this date for proof up one week will not inconvenience the permit holder or witnesses. No rights will be forfeited by the holder in making this proof on September 23rd instead of September 16th as first set.

This publication has been run for one week in the News, but we have wired them, stopping any further publication in that paper.

Gentlemen:

In looking over the report of the examining engineer for proof of beneficial use of water under the above numbered permit, the report shows the land in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ and NW $\frac{1}{4}$ NE $\frac{1}{4}$ instead of the NW $\frac{1}{4}$ NE $\frac{1}{4}$ and NE $\frac{1}{4}$ NE $\frac{1}{4}$.

Will you please advise us whether or not the error has been made in the application for permit or whether the engineer was in error in checking up the lands?

Dear Sir:

In answer to a letter that was sent by you to Messrs. Hawkes & Hawkes at Clifton Idaho, November 8th, calling attention to the report of the examining engineer for proof of beneficial use of water, whereby you state that report shows the land in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ and SW $\frac{1}{4}$ NE $\frac{1}{4}$ instead of the NW $\frac{1}{4}$ NE $\frac{1}{4}$ and NE $\frac{1}{4}$ SE $\frac{1}{4}$ it should read the NW $\frac{1}{4}$ NE $\frac{1}{4}$ and NE $\frac{1}{4}$ SE $\frac{1}{4}$.

Trusting that this will be satisfactory and that you will make this correction if you will notice the application for permit you will notice it states it as you stated it should be. Authorizing you to make this correction in behalf of Hawkes & Hawkes, I am.

Gentlemen:-

Referring to your letter of the 12th inst. would say that I am enclosing herewith a copy of the engineer's report and map filed in connection with proof under the above permit. You will see from these that quite a difference exists between the report and the proof submitted. Before making another examination, we will ask the holders to carefully check the corners of their lands with the view of definitely locating the land irrigated and the points of diversion.

State Dept. of Reclamation,

Gentlemen:

It appears that on June 25, 1923, you issued water permit No. 14919 for one cubic foot per second of water from some un-named springs. I should like to have a copy of this permit and will promptly remit your fee on receipt of statement.

Last summer sometime, O. E. Ralph dug a well on adjoining land situated in either the North half of Section 16, or the South half of Section 9, Tp. 14 South, Range 38 E. B. M. If he has a permit, I should also like a copy of that.

It appears that Mr. Ralph has tapped the same source of water as that supplying the springs with the result that the springs are nearly dry. The well is probably 30 rods from the springs.

What information have you on file which might assist in determining whether or not our views are correct? Last summer was a dry one, as you may well know, yet the springs had a good flow all summer and up to the time the well was opened.

Mr. P. M. Condie,
Attorney at Law,
Preston, Idaho.

Dear Mr. Condie:

Enclosed are copies of the Water License and of the Permit noted above, as requested in your letter of July 12th.

The original map with Permit No. 14919 shows the springs about 700 feet south of the N $\frac{1}{4}$ corner of Sec. 16 with diversion from the stream from the springs. The map of Mr. R. L. Sutcliffe, Examiner, does not show the location of the springs, just shows the stream with two points of diversion, one in N $\frac{1}{4}$ NE $\frac{1}{4}$ and one in E $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 16, and he also shows that some of the land irrigated extends into the south part of S $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 9.

Permit No. G-29893 shows the point of diversion about $\frac{3}{8}$ mile or more from the above location of the spring, however, it is the only record we have nearby.

The fee for the copies is \$2.50 which you may remit to this office.

Dear Mr. Baum:

In the third paragraph of your letter of the 11th you do cite the authority under which this department operates in the matter of controlling flowing or artesian wells. This authority enables us to order the owner of a flowing well to cap and control said well in accordance with the statutes. Before issuing an order we must ascertain that the well is flowing water above the surface of the ground, the location and the owner of the well. At this writing we have no record of an uncapped flowing well in the area mentioned in your letter of the 11th.

In passing it is conceivable that additional control legislation will be enacted as a result of, or in connection with, one or more test cases. This office would indeed encourage such legislature.
