INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Mary A. Turner,
Lago, Idaho.

Boise, Idaho,
May 3, 1923.

Dear Sir:—

Under the terms of your permit No. ¹⁵⁵⁷⁹~~15579~~.....you are required to complete your diversion works on or before ^{Aug 12, 1923}~~Aug 12, 1922~~. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

W. G. SWENDSEN.

Commissoner of Reclamation.

Dear Mrs. Streeter:

On April 18, 1966, the Boise District Manager issued an "initial decision" classifying the lands included in your desert land petition-application as favorable for entry upon a showing as to the availability of an adequate supply of irrigation water. The decision also stated that you would be offered the opportunity to apply for a special land use permit to drill a well in order to obtain the necessary evidence of a water supply for irrigation.

Attached are application and stipulation forms and an instruction sheet. Please carefully read and comply with the requirements in the instruction sheet.

PLEASE NOTE: The application and stipulation forms must be completed in duplicate and sent or taken to the District Manager, Bureau of Land Management, 230 Collins Road, Boise, Idaho 83701, within 30 days from receipt of this letter.

If the application, stipulation, fees, rental and bond are not received by the District Manager within the 30 days allowed, we will assume that you are not interested in drilling a well. Your application will then be considered as rejected and will be closed without further notice.

The initial decision also provided that if a successful well is not drilled during the period the permit is in effect, the application will be rejected. Such rejection will be automatic if the well is not drilled or is unsuccessful. No further notice will be given.

In order to drill a well you will also have to obtain a State water appropriation permit from the State Department of Reclamation. You should make arrangements with the State Reclamation Engineer to have a copy of the permit sent to this office as soon as possible.

This image shows a single sheet of white paper with horizontal black ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or printed text on the paper. The left edge of the paper appears slightly irregular, possibly indicating it was torn from a notebook. A faint, dark smudge is visible near the bottom left corner.
