INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

V. C. CHRISTIANSEN
Mink Creek, Idaho

Boise, Idaho, July 3, 1935

Dear Sir:—

Under the terms of your permit No. 18018..... you are required to complete your diversion works on or before Sept. 25, 1935..... I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided, the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00 a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

R. W. FARIS

Re: Permit No. 18018
V. C. Christensen

MR. ARTHUR W. HART,
Prosecuting Attorney,
Preston, Idaho

Dear Sir:

We wish to acknowledge receipt of notice in duplicate for publication in connection with final proof under the above permit, Mr. Christensen's authorization to have the notice published in the Franklin County Citizen of Preston and also the affidavit of the holder for proof of completion of works.

Several minor errors have been made in these papers and we have taken the liberty of correcting them in accordance with the permit record. If the permit record does not reflect the true conditions, particularly with reference to the point of diversion and the lands to be irrigated, such amendments as are necessary can be made after the engineer's report of his examination is on file.

As you probably are aware, both of these proofs were due on September 25th. The certificate of completion of works will issue immediately, since we received the proof in ample time, however a slight loss of priority will result because of the lateness of the beneficial use proof. In order to make this loss as little as possible, we have changed the date for proof of application of water to beneficial use from November 16th to October 30th. In having the proof on that date there will be more than ample time for the necessary four weeks publication and we trust it will be agreeable with both you and the permit holder.

A copy of the notice will be forwarded from this office today to the Franklin County Citizen with proper instructions for its publication. After the publication has been completed the newspaper will bill Mr. Christensen, direct, and upon receipt of the amount due will furnish him an affidavit of publication which should be attached to the depositions executed before you on October 30th. About 10 days prior to that date, depositions consisting of one for the holder and one each for two witnesses will be mailed to you. Will you please advise Mr. Christensen that at the time when proof is to be offered, he should appear at your office with two disinterested witnesses who are familiar with the permit, the works constructed thereunder and the lands to be irrigated, for the purpose of executing the said depositions.

Gentlemen: Re- Permit 18018 V.C.Christensen

I am mailing herewith Affidavit of Publication and Statment ~~to~~ the Newspaper~~s~~, the Deposition of two witnesses and the Deposition of the holder. The cause of the delay in the matter was that the Holder had sent \$5.00 to the department of Reclamation thinking that it was to pay for the publication of Notice printed in the Franklin County Citizen, and he didnt think that he should pay that amount the amount that they were charging him here even though he had sent the \$5.00 , so it took him some time to feel that an additional \$12.00 was a just charge, however he paid it and I am mailing herewith receipted statment for the same.

I believe that this takes care of the matter up to the present time, however if anything has beenover looked let me know and I will take care of the same.

Sincerely yours

Arthur W. Hart

Re: Permit No. 18018
V. C. Christensen

MR. ARTHUR W. HART,
Prosecuting Attorney,
Preston, Idaho

Dear Sir:

Under date of November 15th we received the depositions of Mr. Christensen and his witnesses, executed in connection with final proof under the above permit, and also an affidavit of publication from the Franklin County Citizen of Preston. These papers are in satisfactory form and in due time a field examination will be made, as required by law. After the field engineer's report is on file, covering his examination, we shall further advise Mr. Christensen as to the fees due in connection with this proof before his license is issued. The \$5.00 fee which Mr. Christensen mailed to this department was in connection with proof of completion of work and our office receipt was mailed to him with his certificate of completion of work.

As you probably know, from your past experiences, this department has nothing to do with the fee charged for publications, since the permit holder pays it directly to the newspaper. Consequently, we have no occasion to familiarize ourselves with the fee that the majority of the papers charge for such services. It does seem, however, that \$12.00 is unusually high, since occasionally some one will forward his receipt for payment of the publication to this office and it has been my observation that the majority of the papers charge about \$10.00 for the four publications of a notice which would be comparable to Mr. Christensen's. This, however, is a matter over which this department has no control.

Application for Amendment
To Permit to appropriate the Public Waters
of the State of Idaho, No. 18018

State Reclamation Engineer

Comes now T. C. Christensen, and represents to the Commissioner of Reclamation of the State of Idaho.

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 18018, and requests that the list of lands to be irrigated, as described in said permit, be changed to read as follows:

SE 1/4, & NE 1/4, Sec. 9, T. 13 S., R. 41 E., B. M.

....., making a total of 80 acres.

That an additional amount of water is not asked for, and that the rights of others will not be adversely affected by such change.

Signed at Munk Creek, this 7 day of March, 1943.

Re: Permit No. 18018

V. C. CHRISTENSEN
Mink Creek, Idaho

Dear Sir:

We now have the Field Engineer's report covering the examination he made in connection with final proof under this permit. We find that you are irrigating a portion of the $SE\frac{1}{4}NE\frac{1}{4}$ and of the $NE\frac{1}{4}SE\frac{1}{4}$ of Section 8, T. 13 S., R. 41 E., B. M. whereas the permit describes the $SW\frac{1}{4}NE\frac{1}{4}$ instead of the $NE\frac{1}{4}SE\frac{1}{4}$.

In order to correct the records, so that you may be given credit for what you are actually irrigating, we have prepared an application for amendment which is herewith enclosed for your signature.

When you return this application, kindly send a fee with it of \$4.00 which is due in connection with final proof. Your license can then be issued for 0.04 of one second foot of water.

Very truly yours
