Re: Permit No. G - 29485

Dec. 1, 1965

Wesley W. Hubbard & Sons, Inc.
Grace, Idaho

Gentlemen:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 29485 are due not later than Feb. 24, 1966

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

Re: Permit No. G-29485

Deon W. Hubbard
Grace,
Idaho

Dear Mr. Hubbard:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Caribou County Sun, all submitted in proof of completion of works and beneficial use on Permit No. G-29485.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

CARL E. TAPPAN

Dear Mr. Hubbard:

A representative of this department has made an examination of the works covered by your Permit G-29485 and has found the following:

Quantity of water diverted: 3.71 c.f.s.

Amount of water that can be recognized as beneficially used under Idaho Law: 3.75 c.f.s.

The maximum quantity diverted shall not exceed 852 acre feet per season.

Purpose of use: Stock water and Irrigation of 204 acres in SE NE 1/4, NE 1/4 SE 1/4, Sec. 34 T. 10S, R. 40E; NW NE 1/4, NE SW 1/4, NW SW 1/4, SW SW 1/4, SE NW 1/4, Sec. 35, T. 10S, R. 40E.

The priority date established is: February 16, 1961

A fee totaling \$ 21.00 must be received within 30 days from the date of this letter in order that we can issue you the License and Certificate of Water Right as described above.

Dear Mr. Higginson,

Department of Reclamation

I have several questions concerning a recent notice from your office on permit No. G-29485.

What is meant by quantity diverted at 3.71 c.f.s.? Does this mean the amount of water actually being used as of a particular date? If so what was the test date? Or does it mean the amount of water the well has capacity to produce? Or is it some other measure?

What determines the amount that can be recognized as beneficially used under Idaho Law as 3.75 c.f.s.?

What determines that the maximum quantity diverted shall not exceed 852 acre feet per season?

Why were the acres reduced to 284 when the well covers and the application requests 320 acres? You omitted the $\frac{1}{4}$ section, Sec. 35, T. 16S. R. 40E.

The maximum acre feet of 852 for even the 284 acres allows only about 3 acre feet per acre for those acres. This is not enough for heavy water use crops such as potatoes or for alfalfa.

Sincerely,

Deon W. Hubbard

No. 13-2225 / 29485
(letter of July 17, 1969.)

The quantity of water found being diverted from a well within the service of sec 35 T10S, R 40E equipped with a 150 HP elec motor upon a Fairbanks - Morse Vertical turbine pump equals 3.75 cfs. This rate of diversion was determined by taking pressure readings upon the 7 1/2 inch laterals of the 3/16" Rainbird 30 w plugged nozzles. The average pressure according to the manufacturer design shows that ea nozzle @ 50 p.s.i. conveys 7.18 gpm.
Therefore $Q = \frac{(231 \text{ noz}) (7.18 \text{ gpm})}{48.6 \text{ gpm}} = 3.75 \text{ cfs.}$

The maximum quantity diverted at the 852 ac f. season proposed to be allowed for licensing is determined by the irrigation requirement of the soil based upon a maximum consumptive use crop - and is limited by what the system would convey as it has for the irrigation season of the area.

29485
13-2225

In this case the system will convey
in excess of the irrigation requirement,
therefore, 30 ac-ft / acre beneficially
irrigated / season is proposed for
licensing.
The 234 acres was determined from
an NRCS ~~map~~ photo copy and
verified in the field.

If you have any questions
or disagreements with the findings
and intentions of the Dept for
licensing - please feel free to
contact this office.

The Dept will hold the permit
from licensing for 60 days to
allow you the opportunity to
solicit an objection. If the
Dept does not hear from you
before 60 days of the date of
this letter - the Dept will
proceed to issue a license.

Re: 29485/13-2225

Deon W. Hubbard

Dear Mr. Hubbard:

The quantity of water found being diverted from a well within the SE¹/₄ of section 35, T. 10S, R. 40E., equipped with a 150 hp electric motor upon a Fairbanks-Morse Vertical Turbine Pump, equals 3.75 c.f.s. This rate of diversion was determined by taking pressure readings upon the seven 1/4 mile laterals of 3/16" Rainbird 30* plugged nozzels. At the average pressure, according to the manufacture's design, shows that each nozzel at 50 p.s.i. conveys 7.18 gpm. Therefore, $Q = \frac{(231 \text{ noz})(7.18 \text{ gpm})}{448.8 \text{ gpm}} = 3.75 \text{ c.f.s.}$

The maximum quantity diverted or the 852 ac.ft./season proposed to be allowed for licensing is determined by the irrigation requirements of the soil, based upon a maximum consumptive use crop, and is limited by what the system would convey each 24 hours for the irrigation season of the area.

In this case, the system will convey in excess of the irrigation requirement. Therefore, 3.0 ac.ft./acre beneficially irrigated per season is proposed for licensing. The 284 acres were determined from an ASCS photo copy and verified in the field.

If you have any questions or disagree with the findings and intentions for licensing by the Department, please feel free to contact this office. The Department will hold the permit from licensing for 60 days to allow you the opportunity to solicit an objection. If the Department does not hear from you before 60 days of the date of this letter, we will proceed to issue a license.

Dear Mr. Reynolds,

Concerning your letter of August 26, 1969 on permit G-29485 I still have one question. The system irrigates 8 40's which is 320 acres more or less. The statement from your office dated June 27th lists only 7 40's by description omitting by description the SW $\frac{1}{4}$ NE $\frac{1}{4}$ Sec.35 T.10S R. 40E. I assume this was inadvertantly omitted and should be included in the liscense.

Dear Mr. Hubbard:

In regard to your letter of September 4, 1969, it appears that our letter, of June 27, 1969, listed the total acreage found but omitted the description of one subdivision. The lands found to be irrigated by the examiner within each subdivision are as follows:

Section 34	SW 1/4 NE 1/4	30 acres
	NE 1/4 SE 1/4	30 acres
Section 35	NW 1/4 NE 1/4	34 acres
	SW 1/4 NE 1/4	33 acres
	SE 1/4 NW 1/4	39 acres
	SW 1/4 NW 1/4	40 acres
	NW 1/4 SW 1/4	40 acres
	NE 1/4 SW 1/4	38 acres
		284 acres

These acreages were determined by the use of aerial photos and by inspection on the ground. In the event that you disagree with these amounts and the total, you should notify us immediately; otherwise, we will proceed to issue a license before September 30, 1969.

Dear Mr. Beesley:

The Department has reviewed the application for transfer you recently submitted on behalf of Mr. Grant Mathews, and found it to be in correct form. Unfortunately, it appears that in previous correspondence we neglected to inform you of the statutory filing fee concerning applications of this nature.

Therefore, if you would return the enclosed application accompanied by a check for \$35.00 in payment of the filing fee we will be glad to initiate the processing.

We hope our oversight has not inconvenienced you or your client. Feel free to contact me should you have any questions.
