RE: Permit No. R-915

Franklin Cub River Pumping Company
Franklin
Idaho

ATT: Mr. L. W. Hatch, Secretary

Dear Mr. Hatch:

Permit No. R-915 has already been approved for the appropriation of 75 acre feet of waste water and runoff of an unnamed stream by W. D. LeFevre.

This department has little discretion in approving a properly executed application for permit, as the permit issued is for unappropriated water only. Existing rights take precedence over any rights granted by a permit. No matter how the existing rights may have been acquired or whether or not they are a matter of official record.

The statutes do not provide for the advertising of applications for permits for small amounts or for protests against the issuance of permits for small amounts whose applications have not been advertised.

Since there may be some public water present at certain times which is subject to appropriation, we could not act on a protest against the approval of the application and the issuance of a license especially when the permit does not give permission to interfere with existing rights.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Dear Mr. Condie:

We have your letter of August 25, 1953, in regard to application for storage permit recently filed for Mr. W. D. LeFevre.

We have not yet received the maps which were to be furnished by the Soil Conservation Service.

As to the rights of the Franklin Cub River Pumping Company, they have a decreed right for 5 cubic feet per second; also License No. 14447 for 20 cubic feet per second. They also have a 31 and 41 Court Decree prohibiting interference with certain springs and return flows.

Very truly yours,

MARK R. KULP

Gentlemen:

Mr. W. D. LeFevre filed with you an application to appropriate and store water. Some difficulty has arisen with the conservation people who are supplying the plans. They suggest that Mr. LeFevre obtain a storage permit and let the plans be approved later.

Will you please supply me with any forms necessary for this purpose? Or can such a permit be issued on his present application?

Very truly,

P. M. Condie

Gentlemen:

Re: Permit No. R-915.

Your letter of September 16th with permit duly received.

We note that work must be started by October 7th which will be impossible as the plans will not be ready by then; also it will likely be impossible to complete the work by next March 7th, inasmuch as we will have the winter season ahead and we are advised that this work cannot be done during the cold weather.

What is your suggestion? Will you grant further time?

RE: Permit No. R-915

Mr. P. M. Condie
Box 346
Preston, Idaho

Dear Mr. Condie:

Reference is made to your letter of September 23, 1953, in regard to Permit No. R-915 in the name of W. D. Lefevre.

It is a statutory requirement that construction begin within 60 days of the date of the permit, but in a case such as this obviously the work cannot begin until plans have been submitted and approved by this department.

The application stated that 30 days would be required to complete the works and so 6 months were allowed or until February 7, 1954. However, an extension of time can be obtained up to 5 years from the date of approval, or until August 7, 1958. An application for such extension should be made on the form enclosed.

Very truly yours,

Permit No. R-915

Application for Extension of Time FOR COMPLETION OF WORKS

W. D. LaFevre, of Preston

State of Idaho, being first duly sworn, upon his oath deposes and says:

He is the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho
No. R-915

Under the terms and conditions of said permit, construction work thereunder was required to be
completed by February 7, 1954.

That he has heretofore performed the following work described under said permit:

All work has been completed excepting the emergency spillway.

The dam, pipe, trickle tube, ^{power} and pump have been installed at a cost
of \$4200.00.

costing \$ 4200.00.

That he is unable to complete the remainder of the work within the required time, for the fol-
lowing reasons, to-wit:

Due to farm work have been unable to complete the emergency spillway
to-date. Time only has held up completion of project.

WHEREFORE, He asks that the Commissioner of Reclamation extend the time for the comple-
tion of works under said permit to July 31st, 1954.

Subscribed and sworn to before me this 10th day of June, 1954.

My commission expires April 18, 1955.

James P. Connelie
Notary Public.
Preston, Idaho.

Date of receipt at office of Department of Reclamation June 11, 1954

APPROVAL OF ~~COMMISSIONER~~ ^{STATE} RECLAMATION ENGINEER

I, Mark R. Kulp, ~~Commissioner~~ ^{State} Engineer of Reclamation of the State of Idaho, hereby extend the time for the com-
pletion of construction work under Permit to Appropriate the Public Waters of the State of Idaho, No. R-915 to

July 31 1954

Mr. D. W. Lefever
Franklin, Idaho

My dear Sir:

This office represents the Franklin Cub River Pumping Company and this morning my attention has been called to the fact that you have constructed a reservoir across a tributary of the main river, that you are impounding irrigation water during the irrigation season.

If I have been correctly informed you have constructed the reservoir that has no gate or opening at the bottom so that the inflow can pass through the reservoir.

You are perhaps aware of the fact that one constructing a reservoir where the natural flow, or water that has been utilized, flows that appropriate and adequate measuring devices must be had so that the flow can be measured and sufficient water released equal to the amount entering the reservoir.

The officers of the company that I represent dislike very much to institute an action against you but will be compelled to do so, and the action will be instituted promptly if you do not arrange to permit the water to pass through the reservoir so that the company will not be deprived of the return flows, the run-offs and the natural flow that they have been utilizing since long before 1919.

The company is without water and the pumps will have to be closed down, hence we shall expect immediate action on your part, otherwise we will, during the week, institute the necessary and appropriate action. We understand likewise that you are not utilizing this water at the present time.

Very truly yours,

O. R. BAUM

July 14 - 54

Department of Reclamation

RECEIVED
JUL 15 1954

Gentlemen,

Department of Reclamation

In answer to your letter of July 12 concerning case of Mr D.W. Le Fever of Franklin.

I went immediately as requested by Mr. Baum, and got Mr Ray Morrison, he called the rest of the Board members of the ~~Cub~~ Franklin Cub River Pumping Co. and we went to the Reservoir of Mr. LeFever, you probably have size & Capacity of this Reservoir, 25' Dam - 42 Acre Feet. Capacity, Built on natural Drain with no outlet at bottom of Dam. I asked Mr. LeFever what his plans were in regard to the Franklin Pumping Co water. He said he would dig a bypass channel as you will note on the sketch I have inclosed, This the Franklin Cub River Pumping Co Officers agreed would have to be at his on risk, and their expection would depend on whether or not, it would allow the free flow of their water. This bypass has not been made and the Franklin Cub River Pumping Co is entering Suit against Mr LeFever. In their complaint they are praying for a Pipe outlet at the bottom of LeFever Dam, so as to permit the free flow of their water down the Hollow, and not impound the water during the Frig season.

I would suggest the State Dam inspector visit this Dam at his earliest convenience.

There is also some question of water rights in this Drain it is a se saw deal between LeFever - R Parkinson

R-215

and the Franklin Cub River Pumping Co. Mr. Parkinson claims the water, and runs some canal water down this Drain to Frigate his Farm. Franklin Cub River Pumping Co is also filing suite against him, to clear up the water right between them. I would like your advice on my duty as water master in this case.

I told Mr La Fave I thought he should release some water to the Franklin Cub River Pumps, until such time as he could complete the by pass. There is quite a difference of opinion as to how much water flows down this Drain, the flow is all from excess Irrigation from a few Farms, so it is variable. Mr La Fave did release what water that would go over the spill way.

I hope I have given you some knowledge of the situation and will await your advice.

Yours Truly
Victor Peterson
Preston Ida.

Mr. Victor Peterson, Watermaster
Water District No. 5-H
Preston, Idaho

Dear Mr. Peterson:

We wish to thank you for the detailed information relative to the
Le Fever Dam.

It seems from your letter that about the only way they can settle
the controversy is by court action.

You state that there is some question on water rights connected
up with this drain, across which Mr. Le Fever has constructed a dam, and
that you would like some advice as to your duties as watermaster in this
case.

From the information we have on hand, this is all Greek to us,
therefore, you will probably have to work things out in the best manner
that you can according to the terms of the decree and at the writers first
opportunity he will try and call on you where we can go over the situation
on the grounds.

Very truly yours,

Proof of Completion of Works

DEPOSITION OF HOLDER

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. W. D. LeFevre, residence: Franklin, Idaho, farmer.

Post Office Address: Franklin, Idaho.

Ques. 2. If acting on behalf of a corporation, state its name, principal place of business, your position with reference to same, and your authority for appearing in its behalf.

Ans.

Ques. 3. State number and date of permit, acre feet of water you claim for storage, and source of same.

Ans. No. R 915, dated August 7th, 1953.

Ques. 4. Under terms of permit construction was required to be completed by Feb. 7, 1954. but time was extended to July 31, 1954.

Ques. 5. Construction was actually completed on the date of July 31st, 1954.

Ques. 6. Does the construction fully comply with the specifications? yes.

Ques. 7. Of what material was the dam built? Clay, with concrete reinforced spillway, which empties into concrete pipe; emergency spillway with concrete core, as per specifications on file.

Ques. 8. State whether or not the water has been turned into your reservoir, and if so, when and to what extent.

Ans. Yes; about April 15th, 1954, and reservoir filled, and water used and being used by pumping therefrom onto land of the applicant.

Ques. 9. The capacity of the reservoir is 42 acre feet.

Ques. 10. The area of the high water line of the reservoir is 6 acres.

Ques. 11. The height of the dam above bottom of reservoir is 25 feet, above low water is 18 feet.

Ques. 12. The dimensions of the spillway are 12 inch pipe and the bottom of the spillway is 3.5 feet below the top of the dam.

Ques. 13. Dimensions of the reservoir outlet are Water pumped

Ques. 14. Describe the gate and control unit.

Ans. Only control unit is in spillway which is open to permit water to flow out of reservoir when it is filled to certain level.

Ques. 15. The reservoir outlet is made of

Ques. 16. Is the reservoir filled through a feeder canal? yes, irrigation ditch from Cub River Irrigation Company canal

Ques. 17. If so, where is the point of diversion for same?

Ans. NE 1/4 NE 1/4 Section, 7 Twp. 16 S. Range 40 E. B. M.

Reservoir is also filled from runoff water in the spring. and during non irrigation period, also from runoff from own land.

R-915

Ques. 18. Does the feeder canal comply with the specifications in the permit? Yes

Ques. 19. If not, explain _____

Ques. 20. Cost of constructing feeder canal? already built Cost of reservoir? \$ 3000.00

Ques. 21. State whether or not the works from reservoir outlet to place of use are fully completed, and whether or not they comply with the specifications in permit. If not, explain.

Ans. yes to both questions.

Ques. 22. Water has (~~been~~) been delivered to place of intended use? yes

Ques. 23. Give description of dam, state dimensions, and give slope of face both upstream and downstream. Also method and material for protecting against wave action.

Ans. Dam is three to one slope face of dam, and 2 to 1 downstream side.
Clay construction. It is intended to rip rap face of dam with lime
rock, but this has not been done to date. No wave action to date.

Ques. 24. State the purpose for which the water is to be used and give the place of use, and if for irrigation, state the number of acres, and give the legal description of same.

Ans. Irrigation. 5 Acres
SE $\frac{1}{4}$ NE $\frac{1}{4}$; 35 acres in NE $\frac{1}{4}$ SE $\frac{1}{4}$; 40 acres in SW $\frac{1}{4}$ of SE $\frac{1}{4}$;
and 30 acres in SE $\frac{1}{4}$ of SE $\frac{1}{4}$; Section 19, Tp. 16 S., R. 40 E. B. M.

NOTICE FOR PUBLICATION

Notice of Proof Application of Water To Beneficial Use

Notice is hereby given that at nine a.m. on the 18th day of July, 1955, at Preston, County of Franklin, State of Idaho, before P. M. Condie, Notary Public, proof will be submitted of the application to beneficial use of seventy-five acre feet of the waters of un-named stream (run-off and waste water) in accordance with the terms and conditions of Permit No. R915 heretofore issued by the Reclamation Department of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are W. D. LeFevre, Franklin, Idaho.

The use to which said water has been applied is irrigation.

The amount applied to beneficial use is seventy-five acre feet per annum.

The place where said water is used 35 acres in NE $\frac{1}{4}$ of SE $\frac{1}{4}$, 40 acres in SW $\frac{1}{4}$ of SE $\frac{1}{4}$, 30 acres in SE $\frac{1}{4}$ of SE $\frac{1}{4}$, and 5 acres in SE $\frac{1}{4}$ of NE $\frac{1}{4}$, of Section 19, Township 16 South, Range 40 East of Boise Meridian.

The name of the canal or ditch or other works by which said water is conducted to such place of use is Pipe line and sprinkling system.

The right to take water from such works is based upon Permit No. R 915.

The source of supply from which such water is diverted is an un-named stream (run-off and waste water).

The date of priority which said user is prepared to establish is July 31, 1953.

MARK R. KULP
State Reclamation Engineer.

RE: Permit No. R-915

Mr. W. D. LaFevre
Franklin
Idaho

Dear Mr. LaFevre:

We have received from Mr. P. M. Condle the depositions of yourself and two witnesses also affidavit of publication in the Preston Citizen all in proof of beneficial use on your Permit No. R-915.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

Permit No. R915

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. W. D. LeFevre, residing at Franklin, Idaho which is post office address. I am a farmer.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. _____

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. No. R915, date of priority July ²³ 31, 1953.

Ques. 4. State source of water supply and give exact location of point of diversion.

2 Ans. Unnamed stream formed by waste water and runoff water; mostly from water during non-irrigation season., water is impounded in reservoir.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. I have an ~~1111~~ Fairbanks-Morse Pump which pumps water from reservoir through 400 feet of ten inch pipe to place of use. Part of the water is emptied into a ditch and the other part is conveyed to a further point. Flooding rather than sprinkling is the method used for irrigation. Works will convey three second feet of water and this much is used for the irrigation of my land.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation. The water is used to irrigate 40 acres in SW $\frac{1}{4}$ of SE $\frac{1}{4}$, 30 acres in SE $\frac{1}{4}$ of SE $\frac{1}{4}$, and 5 acres in NE $\frac{1}{4}$ of SE $\frac{1}{4}$, Section 19, Tp. 16 South, Range 40 E. B. M. I expect to increase the amount of land to be irrigated as I am able to impound more water.

R-915

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. _____

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. Three cubic feet per second of water is needed when pumping; 75 acre feet is required for this purpose, in addition to other water available.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. _____

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. All of the water I am able to impound, I use for the purpose of irrigation of the land described. I use this as a supplemental supply in connection with other irrigation water I obtain from Cub River Irrigation Company.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. I hold a high water right in Cub River Irrigation Company which supplies me with all the water I need in the spring of the year; I have 12 hours of water a week, three second feet, during other part of irrigation season from Cub River Irrigation Company represented by stock in said company. It took all of this water and my reservoir water to irrigation 75 acres in 1954 and 1955 so far; depending on the season I should be able to irrigate more land.

(Sign) W. D. Levere

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Preston, County of Franklin,

State of Idaho, on this 18th day of July, A. D. 19 55.

DEPARTMENT OF RECLAMATION
BOISE, IDAHO

PERMIT NO. R915

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Cecil Woodward, 73 years, residence and post office address: Franklin, Idaho, occupation farmer.

Ques. 2. Are you acquainted with W. D. LeFevre, the holder of Permit No. R 915? How long have you known him and where does he reside?

Ans. Yes, 25 years. He resides at Franklin, Idaho.

Ques. 3. Have you read or heard read said Permit No. R 915, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Unnamed stream, run-off and waste water; place of diversion approximately 1750 feet Southwest from the Southwest corner of Section 19, Township 16 South, Range 40 East of Boise Meridian. Works of conveyance: An electric pump, and 400 feet of ten inch pipe. Water is impounded in a reservoir from which it is pumped.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. Three cubic feet per second and I have seen this much so conveyed.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation of land; Used as follows: 75 acres: 40 acres in SW $\frac{1}{4}$ SE $\frac{1}{4}$, 30 acres in SE $\frac{1}{4}$ SE $\frac{1}{4}$ 5 acres in NE $\frac{1}{4}$ of SE $\frac{1}{4}$ Section 19, Tp. 16 South, Range 40 E. B. M. Possible to water additional land.

R 915

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. _____

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Clay soil. All of the water available is necessary for the proper irrigation of this land. Could profitably use more water than he has.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. Have seen applicant using three second feet of water to irrigate the land described herein, from the reservoir of the applicant, covered by said permit, in ~~1950~~ 1954 and 1955.

BOISE, IDAHO

PERMIT NO. R915.

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. R. Vincent Milligan, age 29 years, Smithfield, Utah, occupation teacher and engineering student.

Ques. 2. Are you acquainted with W. D. LeFevre, the holder of Permit No. R915? How long have you known him and where does he reside?

Ans. Yes, five years. He resides at Franklin, Idaho.

Ques. 3. Have you read or heard read said Permit No. R915, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Unnamed stream, run-off and waste water; place of diversion approximately 1750 feet Southwest from the Southwest corner of Section 19, Township 16 South, Range 40 East of Boise Meridian. Works of conveyance: An electric pump and 400 feet of ten inch pipe. Water is impounded in a reservoir from which it is pumped.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. Three ~~in~~ cubic feet per second and I have seen this much so conveyed.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation of land. Water has been and is being used on 40 acres in SW $\frac{1}{4}$ of SE $\frac{1}{4}$, and 30 acres in SE $\frac{1}{4}$ of SE $\frac{1}{4}$, and 5 acres in NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 19, Township 16 South, Range 40 East of Boise Meridian.

It is possible to water additional land from this source as water is available.

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. _____

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Clay soil. All of the water available is necessary for the proper irrigation of the land of the applicant; could profitably use more water.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. Have seen applicant using three second feet of water to irrigate the land described herein on July 16, 1955, diverted as aforesaid.

Water is pumped into same ditches that carries his Cub River water

REPORT OF ENGINEER

Permit No. R-915

This proof is for Beneficial Use

In Water District No.

1. Name of applicant W. D. LaFevre, Franklin, Idaho
2. Source of water supply: Un-named stream formed by runoff and waste water outlet
3. Location of point of diversion: Is in the NE 1/4 SE 1/4 of Section 19 T. 16 S. R. 40 E. County of Franklin

4. Describe works as they exist, giving dimensions and capacities of same: There is a dam across a natural draw designed and engineered by S.C.S. All waters used is by use of a Fairbanks-Morse Centrifugal 6" in. by 4" out driven by a Fairbanks-Morse 20 hp horizontal Motor, serial No. 570272. Whole mounted on a concrete platform 8' by 8' over a well with a pipe connection into the bottom of the reservoir. There is, however, a suction hose that extends into the pond the end of which is supported by a barrel float.

5. Water is used for: Irrigation
6. State whether or not water has been turned into works of diversion: Yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

NE 1/4 SE 1/4, S 1/2 SE 1/4 and SE 1/4 NE 1/4 Section 19, Twp. 16 South, Range 40 East, B. M.

NOTE: Proof does not include SE 1/4 NE 1/4 although in permit and notice.

See the map

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: NOTE: The company that operate the Cub River pumps claim that this is taking some of their water and the case has just recently been in court. Judge Carver has a decision giving Mr. LaFevre the right to store without requiring

Dam h = 18' Freeboard = 3' Spillway = 8' w x 120' l

Dam L = 270' Trickle Spillway is 5' w x 5' h x 18" h with 12" vertical

Dam W = 9' (top) drop into 12" concrete pipe

Almost more water than spillway could handle has come thru

Badly eroded on downstream end. Trickle Spillway has

partly washed out. No rip rap yet. Case has been in court.

any release downstream, the claim being that there was no water flowing in during the irrigation season.

This examination was made on the 27 day of March, 1966

allow repairs and rip rap before approval Rechecked 7/19/66 Larry Johnson

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Re: Permit No. R-915

RECEIVED
OCT 17 1966

Department of Reclamation

W. D. LaFevre
Franklin, Idaho

Dear Mr. LaFevre:

Our field engineer's report on his inspection of the application of water to beneficial use under the terms of Permit No. R-915 shows the dam is capable of conveying 8.4 miner's inches, or 42 a.f. ~~surface~~ of water for the irrigation of 102 acres.

Upon receipt of the statutory fee of \$ 6.00 -based at the rate of \$2.00 for each 40-acre subdivision - we will issue the License and Certificate of Water Right, confirming the right with priority of July 23, 1953 to the use of 42 a.f. ~~second foot~~ of surface water with the point of diversion in NE $\frac{1}{4}$ SE $\frac{1}{4}$, for irrigation of 102 acres in NE $\frac{1}{4}$ SE $\frac{1}{4}$, S $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 19, T. 16 S, R. 40 E, E.M.

Very truly yours,

M. Russell Bosch
Office Manager

APPLICATION FOR PERMIT

To Construct a Reservoir and Appropriate and Store
The Public Waters of the State of Idaho

Application No. R 32132
Permit No. R 915

1. Name of Applicant: W. D. LE FEVRE

Postoffice address: Preston

County Franklin

State Idaho

I. If applicant is a corporation, give:

(a) Date and place of incorporation:

(b) Amount of Capital Stock: \$

(c) Amount paid in: \$

(d) Names and addresses of directors:

II. The financial resources of the corporation are:

(a) Cash on hand: \$

(b) Treasury Stock: \$

(c) Bonds to be issued: \$

(d) Other resources:

2. Quantity of water to be stored: seventy-five

acre feet per annum.

3. Source of water supply is
Unnamed stream, run-off, waste water

River.

4. The outlet of the proposed reservoir is located approx. 1750 feet South of
(bearing) distant from the SW corner of Section 19

, Township 16 S.

Range 40 E., B. M. and is in the NE $\frac{1}{4}$ of SE $\frac{1}{4}$ of Section 19, Township 16 S., Range 40 E., B.M. County of Franklin

5. Fill out either (a) or (b).

(a) The reservoir is located in the channel of unnamed drainage way on applicant's land

(b) The reservoir will be on applicant's property into which will run the spring runoff from surrounding land, waste water, and applicant will turn in his irrigation water from the creek into the reservoir when not in use elsewhere

(Creek) (River).

the corner of Section , Township , Range , B. M., and is in the $\frac{1}{4}$ of $\frac{1}{4}$ of

Section , Township

B. M.; width at bottom

feet, width at top

feet, depth of water

feet; average grade per mile

feet; Capacity

cubic feet per second.

6. (a) The area of the high water line of the reservoir is seven acres

acres.

(b) The reservoir capacity is thirty-six

acre feet.

7. Height of reservoir dam 20

feet, length at top 240

feet

by 10 feet. The dam is to be constructed of materials as follows: earth, concrete and rock riprap spillway. Also 8 or 10" pipe by which water will be diverted for irrigation; also a trickle tube to hold water at maximum (If height will exceed 10 feet, plans must be approved by Department of Reclamation, before beginning construction.) elevation.

8. (a) Will water stored in reservoir be diverted to canal or aqueduct, thence to land to be irrigated without commingling with natural flow of

(Creek) (River)? Yes, will pump out of reservoir onto his own land.

(b) Water stored in reservoir will be carried in the channel of none

Will be carried by pipe from reservoir to land to be irrigated.

(Creek,) (River,) a distance

of miles to point of diversion located

(bearing) , feet, distant from the

corner of Section

Township , Range

, B. M., and in the $\frac{1}{4}$ of $\frac{1}{4}$ of Section

Township

, Range

B. M.

9. (a) Area of watershed above dam site

square miles

(b) Estimated maximum flow of stream

cubic feet per second.

10. Water is to be used for irrigation

purposes.

11. If for mining, milling, power or manufacturing purposes give:

(a) Point of use of water (bearing) feet, distant from

, Range

B. M. and is in the $\frac{1}{4}$ of $\frac{1}{4}$ of Section

, Township

, Range

(b) Amount of power generated:

H. P., under

feet head.

(c) Water is to be returned to

distant from the corner of Section , Township

(Creek) (River) (Spring) at a point (bearing)

the $\frac{1}{4}$ of $\frac{1}{4}$ of Section

, Range

, B. M. in

the $\frac{1}{4}$ of $\frac{1}{4}$ of Section

, Range

, B.M.

12. Water stored in accordance with this Permit will be carried to place of use through a canal heretofore constructed under the terms of Permit No.

, which is hereby referred to and made a part hereof. Carried by pipe as above stated.

13. Kind of diversion works: Pipe

(Dam, canal, flume, pipe, etc.)

14. Height of diversion dam: none

feet, length at top

feet. The dam is to be constructed

of materials as follows:

(If height will exceed 10 feet, plans must be approved by Department of Reclamation, before beginning construction.)

15. Size of headgate: Width 8 or 10" outlet pipe with Galco type rate.
feet, Height feet.
16. Diversion Canal: Width at bottom Small ditch to carry water to pasture adjoining reservoir
feet, width at water line feet, depth of water feet, Dimensions of Plume feet.
- Diameter of Pipe inches; Length of Conduit miles. Average grade per mile feet.
17. Estimated cost of Works: Storage Works: \$ Diversion Works: \$
18. Time required for completion of work thirty days years.
19. Time required for complete application of water to proposed beneficial use is 010 years.
20. The land to be irrigated is described in the following tabulation:

(Give Irrigable acreage in each 40-acre subdivision.)

Twp.	Range	Sec.	NE $\frac{1}{4}$				NW $\frac{1}{4}$				SW $\frac{1}{4}$				SE $\frac{1}{4}$				Totals
