Mr. Wallace M. Transtrum,
Attorney at Law,
Box 703,
Soda Springs, Idaho.

Dear Mr. Transtrum:

We enclose Permit No. G-30607 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

We also enclose Departmental Receipt No. G-7260 which was issued covering payment in the amount of \$50 for the filing fee of the above mentioned permit was mailed to you, with our letter of August 8, 1962.

Well logs are an important part of your recorded water right and State Statutes require that well drillers' supply logs on all wells, whether irrigation, domestic, drain or stock wells, to be filed in the Department of Reclamation. In view of the rapidly increasing demand for ground water, the lowering of the ground water level, and the creation of critical ground water areas, it is important that you, as owner, make sure a log on your well is filed in this office.

Mr. Wallace M. Transtrum,
Attorney at Law,
Soda Springs, Idaho.

Dear Mr. Transtrum:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. G-30607, in the name of Reed N. Christensen. Final Proof is to be made before you, as Notary on the 30th day of August, 19 63, at 2:00 o'clock P.M., at 159 So. Main, Soda Springs,, Idaho.

As of this date we have mailed the Notice to the Caribou County Sun Soda Springs,, with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof and then mail the Affidavit of Publication and statement of costs to you.

It is important that the enclosed depositions be executed by the permit holder and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the time, on the date and before you, as Notary, as stated in the publication notice. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, that your Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the Affidavit of Publication.

Dear Mr. Transtrum:

Returned herewith are the depositions of holder and two witnesses and affidavit of publication under noted permit.

The depositions of holder does not show answer to Question 4.

The depositions are dated September 6, 1963, and signed by Henry Jay Turner in Grace, Idaho. The legal notice shows that the depositions were to be completed August 30, 1963, before you as Notary Public. A person might think that the applicant heard that protests would be filed if he made his proofs as advertised.

We will need the affidavit from you as to your office being open August 30th, and that no one appeared to protest the proofs and affidavit from the applicant showing why the place and date were changed.

Kindly return all papers to this office.

Dear Mr. Lund:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Caribou County Sun, all submitted in proof of completion of works and beneficial use on Permit No. G-30607.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Dear Sir;

We have been ask again to put in writing our protest against new wells being drilled in our area.

Our first protest against new wells being drilled came in 1979 after we experienced problems with both our house well and our irrigation well.

Problem #1 House Well

New wells took our house well and two other house wells in our area. Water would stop about two weeks after the irrigation pumping season began and return about 10 days after the pumps were turned off. The water resources board said our only recourse was to sue which we did not do. The reason this matter is mentioned is to show that the water table has dropped.

13-2312

Problem #2 Irrigation Well License #G 30607 Priority Date August 8, 1962

This well had plenty of water and we had no problems until approximately 1978-1979 when six or seven new wells were drilled to the South and East of this well. This well has had problems since. It starts out the irrigation season with plenty of water but cuts down as the season progresses. In dry years it cuts to about 50%. In 1989 we abandoned thirty acres of irrigated barley because of the lack of water. We have had to abandon acres before and after this year but not as large a number. This well returns to normal when the wells between us and Bear River start to shut down. It does not seem to matter which wells shut down. All wells surrounding this well seem to affect it.

This well is down to blue clay and cannot be drilled deeper. We have changed our irrigation system to get better use of our water but we feel that we have taken a crop loss every dry year since 1979 because of the lack of water to irrigate with.

We protest more wells being drilled for the following reasons:

1. Severely reduce the quantity of water necessary to satisfy prior existing water rights.
2. Conflict with local public interest. This could mean that people spending a large amounts of money to drill a new well be shut down because prior water rights are not met.

Sincerely,

Keith Lloyd

Mr. Keith Lloyd

Bancroft, ID 83217

Dear Mr. Keith Lloyd:

I am writing in response to your letter of July 30, 1990 regarding wells in the Bancroft-Lund area.

The Department has two separate but related tasks to complete in your area. The first is to complete the Department's portion of the adjudication of existing water uses in your area. The second task will be to process applications for future water uses in your area.

The meeting held on July 11th at the North Gem High School was to answer questions about the Preliminary Director's Report which was prepared as part of the adjudication process. The final Director's Report will be submitted to the court as my recommendation of the existing water rights in your area. After a decree has been entered by the court water use can be regulated, when necessary, according to the water rights in the decree.

The Department will, later this year or early next year, begin holding hearings to determine if any applications for future uses should be approved in your area. Since the concerns about groundwater pumping in your area are common among many water users, the hearings will be well publicized. It is important that everyone who may be affected by a proposed future water use have the opportunity to make their testimony a part of the decision making process for the new applications.

I understand your concern about groundwater pumping in your area and I assure you I am not overlooking those concerns. If you don't think the Director's Report I submit to the court is correct you will have the opportunity to file objections to those portions of the report you believe to be incorrect. When the hearings are held regarding new applications they will be held by my staff and I urge you to participate in those hearings.

If you have additional questions about either the adjudication process or the processing of new applications, please feel free to contact me or my staff.

Yours truly,

R. Keith Higginson
Director
