Dear Mr. Higginson

Department of Reclamation

In regards to my well completion date, I would like to extend it if possible. The reason is when I drilled I hit water at 57 ft. then solid rock for 70 ft. then 2 ft broken lava that let a little water up. I tested it but only 200 gpm. Due to running out of money and spring work I quit. But this fall I intend to dig a ^{4"} test hole (to find out the structure) and if this spot isn't suitable I try in a different spot. I want to leave no rock unturned to get a well.

All of these spots picked in within a quarter of a mile of where I drilled before. Will I need a new permit or can I extend this one. I thought I had 5 yrs. To complete it. If I need a new one please send me one.

Thank you

Dear Mr. Lloyd:

Proof of completion of works and application of water to beneficial use for the above referenced permit is due not later than October 7, 1967.

Under the terms of your permit, it is required that a notice be published once a week for four consecutive weeks in a local newspaper showing your intent to submit proof. The proof will consist of depositions which the permit holder and two disinterested witnesses must complete before the listed notary public, and must be accompanied by an affidavit of publication of the legal notice.

We have prepared the enclosed notice from the information on your permit. The complete name and address of a notary public of the State of Idaho must be entered together with a date for you to appear before the notary. Allow at least 40 days from the date the notice is mailed to this department for your appearance before the notary.

If you find any discrepancy in the notice or have made any changes, please advise this department and we will assist you in doing whatever may be necessary to assure correct publication.

If the enclosed notice is correct, complete the blank spaces and sign the form authorizing us to publish the notice at your expense and return all forms. At the time we send the notice to the newspaper, you will be supplied with further instructions.

If you do not desire to complete the proofs and obtain a license of water right, you are requested to complete the relinquishment portion of this form below and return it to the Department of Reclamation.

In regards to my well permit No. 33237 and its extension. I have drilled Test holes and find the formation of rock unsuitable for irrigation close to this hill, so I would like to know if I can go to the far end of my field, (marked new site on map.) Would this permit cover this spot?

There seems to be plenty of water but the rock is solid all the way to clay. Got several good home wells out of my diggings.

Also I find there is a mistake on the point of diversion. The ~~the~~ mistake reads

$\text{NW } \frac{1}{4}$, $\text{NW } \frac{1}{4}$ Sect. 23 T. 9S R. 39E. B.M. And it should be NE. $\frac{1}{4}$, NE $\frac{1}{4}$ Sect. 23 T. 9S R. 39 B.M.

Dear Mr. Fleenor,

In regard to getting a Water License for Permit No. 33237/29-2533. I would like a remeasurement on my area watered. I come up with 233.9 to your figure of 218.1 a difference of 15.8.

After talking to you on the phone there has to be a mistake on water measured. Your records has it, I had 4 lines going. I only have 3 lines and my Tri-Matic. Tri-matic was off and there is no way any body could put almost 3 ft. of water through 4 lines let alone 3 lines. How ever 2.95 ft. is close. I figure with Tri-Matic and 3 lines I use 3.4 when everything is running which is very seldom because $\frac{1}{2}$ line is idle most of time. Thank you

Re: Permit No. 33237/29-2533

Warren Parke Lloyd
Bancroft,
Idaho 83217

Dear Mr. Lloyd:

A representative of this Department has made an examination of the works covered by your Permit No. 33237/29-2533 and has found the following:

Quantity of water diverted: 3.68 cfs

Amount of water that can be recognized as beneficially used under Idaho law: 3.68 cfs

The maximum quantity diverted shall not exceed 714 acre feet per year.

Beneficial use: For irrigation of 238 acres within the SE $\frac{1}{4}$ SW $\frac{1}{4}$ S $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 14, Twp. 9 S, Rge. 39 E. Irrigation within the N $\frac{1}{4}$ NE $\frac{1}{4}$ N $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 23, Twp. 9 S, Rge. 39 E.

Point of diversion: NE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 23, Twp. 9 S, Rge. 39 E, B.M.

Priority date established: September 29, 1966

The land found being irrigated by our examiner differs from that listed under the permit, therefore, it will be necessary to amend the permit before a water license can be issued. We have enclosed a partially completed application for amendment for your use. Please sign and return the application along with a \$10.00 filing fee.

Please be advised that there is also a \$19.00 licensing fee due. Therefore, we must receive the completed amendment application and a fee totaling \$29.00 within 30 days of the date of this letter in order to be able to issue your water license as set forth above.

If you do not concur with these findings or have any questions, please contact this office within the 30 day period.

Sincerely,

BOBBY D. FLEENOR

In a unrelated database review a data entry error was found in an incomplete place of use entry of this right. Twenty (20) acres were entered in the NWSE without Township, Range or Section.

While the total acres appearing on the transfer approval was correct, the 20 acres did not appear on the document. The correct location was the NWSE, S23, T09S, R39E according to the transfer application and attached map.

The data entry has been corrected and the transfer document reprinted including the missing 20 acres and placed in the file.

Dear Mr. & Mrs. Lloyd:

I am writing in response to your letter of July 31, 1990 regarding wells in the Bancroft-Lund area.

The Department has two separate but related tasks to complete in your area. The first is to complete the Department's portion of the adjudication of existing water uses in your area. The second task will be to process applications for future water uses in your area.

The meeting held on July 11th at the North Gem High School was to answer questions about the Preliminary Director's Report which was prepared as part of the adjudication process. The final Director's Report will be submitted to the court as my recommendation of the existing water rights in your area. After a decree has been entered by the court water use can be regulated, when necessary, according to the water rights in the decree.

The Department will, later this year or early next year, begin holding hearings to determine if any applications for future uses should be approved in your area. Since the concerns about groundwater pumping in your area are common among many water users, the hearings will be well published. It is important that everyone who may be affected by a proposed future water use have the opportunity to make their testimony a part of the decision making process for the new applications.

I understand your concern about groundwater pumping in your area and I assure you I am not overlooking those concerns. If you don't think the Director's Report I submit to the court is correct you will have the opportunity to file objections to those portions of the report you believe to be incorrect. When the hearings are held regarding new applications they will be held by my staff and I urge you to participate in those hearings.

If you have additional questions about either the adjudication process or the processing of new applications, please feel free to contact me or my staff.

Yours truly,

Dear Sirs,

Water depletion in irrigation wells
in our area is more serious this
year than ever. Also domestic wells
are going or are dry in three families
within three miles of us.

We have been able to water most
of the time, but cannot pump our
licensed amount. We pump as some
of the time & have to cut down.

Several neighbors including Neubauer
farms, Lloyd farms and Kevin Smith
are in a very serious water
shortage, being able to pump less
than half their needed water or
only 12 out of 24 hours.

we feel all wells have an effect
on each other and if any more
are drilled we will be dried up.

Why do we have to go to court
and spend more money than we
already have on lawyers trying to
protect our water rights?

Why should those who have water
permits applied for be led to believe
they can drill without a legal
battle from us to stop them?

Sincerely
Warren & Jennie Lloyd

NOTICE OF PROPOSED CHANGE OF A WATER RIGHT

Re: Transfer No. 4135
License No. 13-02313
Warren P. Lloyd

Gentlemen:

I am writing to protest the Notice of Proposed Change of a Water Right which was published in the Caribou County Sun on Thursday, May 20, 1993. The purpose of the Notice, apparently, is to change the point of diversion of License No. 13-02313.

I feel that because of previous complaints about the shortage of underground water in this area, the water specified in the above-mentioned License should be used only on the ground for which it was originally allocated.

By changing the Point of Diversion, this may divert the water into an area where it would cause an undetermined amount of stress on other existing wells in the area.

Sincerely,

Dwain K. Christensen

RE: Application for Transfer in the name of
WARREN P LLOYD NO. 13-02313

Dear protestant:

This letter acknowledges receipt of the protest filed by you against the above referenced application for transfer. The following are the principle items considered by the Department at a conference and/or hearing in either approving or denying an application for transfer:

1. Are other water rights injured by the transfer?
2. Does the change constitute enlargement in the use of the original right?
3. Is the change consistent with the conservation of water resources within the state of Idaho?
4. Does the change conflict with the local public interest?

The protestant must be prepared to present proof of the allegations involving one or more of the items. You will be notified at a later date as to the time and place set for conference and/or hearing.

If we may be of further assistance, please contact us.

Dear Mr. Lloyd:

Enclosed please find a copy of the protest filed against the above referenced application for transfer of water right. You should be aware that the following are the items we can consider at a conference and/or hearing in either approving or denying an application for transfer:

- 1) Are other water rights injured by the transfer?
- 2) Does the change constitute enlargement in the use of the original water right?
- 3) Is the change consistent with the conservation of water resources within the state of Idaho?
- 4) Does the change conflict with the local public interest?

The applicant must be prepared to present evidence and/or testimony addressing each of the three items should an additional hearing be necessary. You will be notified at a later date as to the time and place set for conference and/or hearing.

Gentlemen:

I recently submitted a protest to the above-mentioned Permit Number for Warren Lloyd, which apparently was to change the point of diversion of his allocated amount of water.

I am now writing this letter as a withdrawal of that protest. I have been able to obtain more information about the purpose of the Transfer he is requesting, so am hereby withdrawing the protest.

I wish to thank you for your time and information regarding this subject.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

This Permit is ApprovedDate July 11, 2002

If Approved, this permit authorizes the construction or modification of a well subject to the following conditions. READ CAREFULLY.

GENERAL CONDITIONS:

1. This drilling permit is valid for two (2) months from the above approval date for the start of construction and is valid for one (1) year from the approval date for completion of the well unless extension has been granted.
2. This permit does not constitute an approval of the District Health Department or the Idaho Department of Health and Welfare which may be required before construction of this well. All wells must be drilled a minimum distance of 100 feet from a drain field. Domestic and Public Water Supply well must be drilled a minimum of 50 feet and 100 feet respectively from a septic tank.
3. The well shall be constructed by a driller currently licensed in the State of Idaho who must maintain a copy of the drilling permit at the drilling site.
4. Approval of this drilling permit does not authorize trespass on the land of another party.
5. This permit does not constitute other local, county, state or federal approvals which may be required for construction of a well.
6. This drilling permit does not represent a right to divert and use the water of the State of Idaho.
7. If a bottom hole temperature of 85 or greater is encountered, well construction shall cease and the well driller and the well owner shall contact the Department immediately.

SPECIFIC CONDITIONS:

Within one year from the date this drilling permit is issued the applicant will obtain an approved transfer for the IDWR that changes the point of diversion for water right 13-2313 to a new legal description (currently proposed in the SESE Sec. 14 TWP 9S 39E) that properly describes the point of diversion under the water right.

N.P.L. In 2003, after the applicant has received approval from the Director of IDWR, the applicant will notify the Department that the proposed change has been accomplished and is ready for field inspection. Based upon this field inspection the Department may require that the original well be properly abandoned pursuant to the abandonment procedures established by the State of Idaho.

Should the applicant be unsuccessful in obtaining approval of his proposed change in point of diversion the well constructed under drilling permit No. 00024716 will be permanently abandoned pursuant the state's abandonment procedures.

RE: Warren Lloyd

Warren Lloyd called Boise this morning and said he is completely out of water and the papers that are keeping him from getting the driller started are sitting in Idaho Falls. I did a quick review of the application and it appears to me that there are some problems between the written legal and the map. It may be that the section corner locations that have at least me confused.

However, as I understand the potential protesters are in fact paying the construction costs for the new well. Please give Chad and the other potentially protesting neighbors a call and confirm that they have no objection to Warren's application for transfer and his drilling a new well. Assuming that we have the correct understanding of the situation I am ready to issue Warren a drilling permit with the following conditions on it:

Within one year from the date this drilling permit is issued the applicant will obtain an approved transfer for the IDWR that changes the point of diversion for water right 13-2313 to a new legal description (currently proposed in the SESE Sec. 14 TWP 9S 39E) that properly describes the point of diversion under the water right.

In 2003, after the applicant has received approval from the Director of IDWR, the applicant will notify the Department that the proposed change has been accomplished and is ready for field inspection. Based upon this field inspection the Department may require that the original well be properly abandoned pursuant to the abandonment procedures established by the State of Idaho.

Should the applicant be unsuccessful in obtaining approval of his proposed change in point of diversion the well constructed under drilling permit No. _____ will be permanently abandoned pursuant the state's abandonment procedures.

Subject: New Well for Warren Lloyd

Norm,

I received a phone call this morning from Bart Christensen, Bancroft-Lund water district advisory committee chair. He said that about a half-dozen users in the district near Warren's well have given some preliminary verbal agreement to drill Warren a new well to make up the deficit between his current pumping rates and licensed amount. Other users may also pitch in or contribute to this project. This would only require about 300 to 400 gpm. The location as I understand it would be north of his existing well along the Central Road. Bart said Warren contacted Vollmer Drilling and that Vollmer could be available to drill the new well in about 2 weeks. I advised Bart that Warren would need a drilling permit and a water right transfer to add a new point of diversion. I indicated that based on your prior message to Eastern Region, that IDWR would work to process the application as quickly as possible. I advised however that the quicker Warren submits the transfer the quicker we can process the application (I did not advise that we might also do this under a temporary emergency transfer if the county is declared a drought. I assume we can do this if a drought is declared and then and then process the permanent transfer at the normal rate).

I asked if they would still pursue a loan or grant from the Board as was discussed in the meeting we had with them this spring. Bart said that the users would just put up the money themselves but ofcourse they would welcome any contributions the Board could provide. I advised that we still have the problem of needing some organization or entity in which to provide a loan or grant. He understood this problem. I did not sense that they would try to do anything to get around this problem. Any suggestions about getting any financial or other help?

Bart and I also discussed the issue of the contributing users negotiating a written agreement with Warren stipulating that Warren can not make a call on those users who are contributing to drilling him the new well. He understood this and said that they plan to make such an agreement.

In the Matter of General	)	Civil No. 2919
Determination of the Rights to	)	
the Use of Surface and	)	
Groundwater in the Bancroft-Lund	)	FINAL DECREE
Area.	)	

R. Keith Higginson, Director of the Idaho Department of Water Resources, filed a Motion for Final Decree on July 1, 1992, 1992. The motion came on for hearing July 28, 1992.

Based on the motion and the argument presented at hearing, the court finds and concludes as follows:

The Director's Report for the Bancroft-Lund Area was filed November 15, 1992. The court entered an Order Amending Report, which amended Finding of Fact No. 14 and Conclusions of Law 16 and 18, and amended the List of Claims/Rights Not Recommended.

Last Chance Canal Company and Utah Power & Light Company filed objections to the report.

The adjudication statute provides for entry of partial decree of uncontested matters, entry of ~~further~~ partial decrees as

MAY 14 1996

necessary to resolve objections and final decree incorporating all partial decrees. Idaho Code §42-1412(8)(9)(10). A List of the Uncontested Portions of Director's Report has been filed with the court as required by Idaho Code §42-1412(9), and hearing on the partial decree of uncontested matters is set for July 28, 1992.

A Stipulation Resolving Objections of Utah Power & Light Company and Last Chance Canal Company has been filed with the court along with a motion seeking approval of the stipulation. Hearing on the motion was set for July 28, 1992, immediately preceding hearing on partial decree of uncontested matters. Upon entry of the order approving stipulation there were no contested matters remaining to be resolved. Therefore, no partial decrees are necessary and the court may proceed with entry of the final decree completing the Bancroft-Lund adjudication.

THEREFORE, IT IS HEREBY ADJUDGED AND DECREED that:

All rights to the use of surface and groundwater from the Bancroft-Lund Area are as described in the Director's Report, except that:

1. The Findings of Fact and Conclusions of Law attached hereto are substituted for the Findings of Fact and Conclusions of Law in the Director's Report.

2. List of Claims/Rights Not Recommended attached hereto are substituted for the List of Claims/Rights Not Recommended in the Director's Report.

CONDITIONS OF APPROVAL

1. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
4. The total instantaneous diversion of water from all points of diversion under Right 13-2313 shall not exceed 3.68 cfs, nor total combined annual volume of 711 af.
5. The period of use for the irrigation described in this approval may be extended to a beginning date of 4/1 and an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/15 and after 10/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

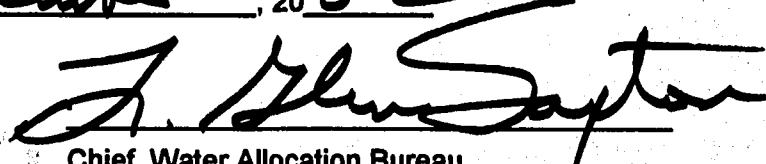

WATER RIGHT NO. 13-2313
As Modified by Transfer No. 70038

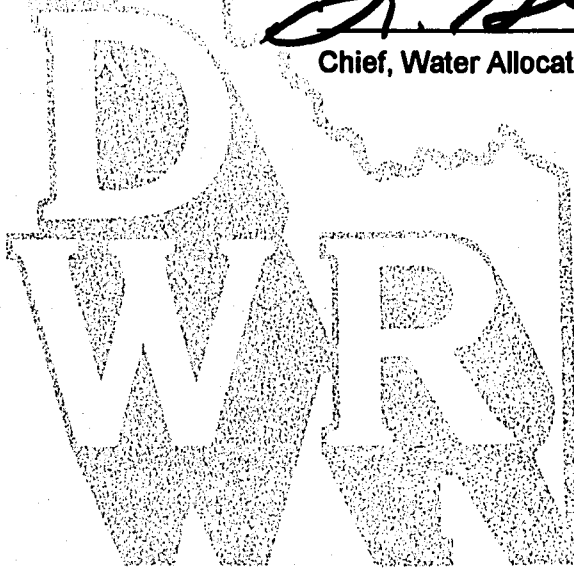

CONDITIONS OF APPROVAL

6. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
7. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
8. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.0 afa per acre at the field headgate for irrigation of the lands above.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

**EXPLANATORY INFORMATION
TO ACCOMPANY A
PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Transfer No.: 70038 - Water Right 13-2313 - Transfer Approval Notice

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed approved Transfer of Water Right(s). Please be sure to thoroughly review the conditions of approval and remarks listed on the approval document.

The Transfer of Water Right(s) is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless the APPLICANT petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

ANY PERSON aggrieved by any decision, determination, order or action of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Department and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.
