Gentlemen:

We have been asked to comment and give our observations concerning Claim No. 13-4002 for water rights in Spring Creek, a tributary of Battle Creek, Franklin County, Idaho.

It appears that when the original claim was filed there was an error both as to the amount claimed and the priority date and that this was not noticed until sometime after the claim had been filed with the Department of Water Administration. We have examined the documents of the Spring Hollow Water Association, some original minute books included, and copies of records both with the Department of Water Administration and the Franklin County Clerk, and find out that dating back approximately more than sixty years the actual amount of water claimed has been 8/10ths of one cubic foot per second, and that the earliest record of such a claim formally shown is 20 January 1914.

Since the Department of Water Administration and the users of water are interested in accurate and complete records, it is our opinion that an amended and corrected claim should be filed reflecting the correct amounts and date together with the period of use.

If you desire any additional particulars, please advise us.

Sincerely,

GEE & HARGRAVES

Merrill K. Gee

Re: Claim No. 13-4002

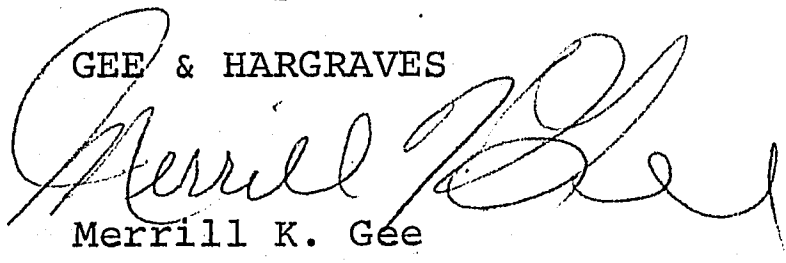

Gentlemen:

We are forwarding an Amended and Corrected Claim in reference to the above noted claim number (the original claim was filed 11/18/70). The errors in the date of priority and amount were not discovered until recently. Instrument #132063 of the records of Franklin County substantiate the earlier priority date and Permit #9917 establishes the corrected amount.

If there are any questions, please advise.

Sincerely,

GEE & HARGRAVES
