Dear Mr. Williams:

We are returning the application for permit which you submitted on behalf of Mr. Gary Jay Baker and his check No. 92-273 in the amount of \$10.00, as the application is unsatisfactory in its present form.

The amount of water of 0.18 cfs for irrigation is excessive. The Department only allows 0.02 cfs per acre, unless it can be shown that more water is needed with a statement from one of your county agents. The amount we normally allow for 5 acres is 0.10 cfs. You have indicated stockwater use in Item 8a(3). However, you have not indicated a desire to file for stockwater use. For this number of livestock we would normally allow a diversion rate of 0.02 cfs.

The point of diversion in Item 3a does not correspond with the 40 acre plat on your map. In Item 3 the point of diversion is listed in the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 28 and the map indicates the NW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 28. Correction is needed on either the map or in Item 3.

You have indicated in Item 7a that the well was constructed over 15 years ago. It may be in the best interest of your client to file a claim to a water right vice this application for permit. The Idaho Statutes allow filing on use rights for ground water so long as that water was appropriated prior to March 25, 1963. By your client filing a claim, he could establish a priority of over 15 years rather than a 1975 priority. Should he not desire to file a claim, you may reduce the irrigation amount to 0.10 cfs, 0.04 cfs for domestic and 0.02 cfs for stockwater use, making a total appropriation of 0.16 cfs and the filing fee for for this amount of water is \$10.00 for the application. He may claim any amount he desires on a claim for a \$10.00 filing fee.

We are enclosing forms for your use of either the application or claim, as your client desires. If you have any questions, please do not hesitate to contact this office.

Very truly yours,

KEN FLOWERDEW
