2. The so-called springs and sinks are in reality the
surfacing of an intermittent stream which at times and places flows
above the ground and through the gravel under the ground, and
eventually into Maple Creek.

3. All of the waters of Maple Creek, with the tributaries
thereto, are covered by prior decrees and rights, including the
rights of this protestant.

4. The proposed appropriation and use is such that if
granted, it will reduce the quantity of water under existing water
rights.

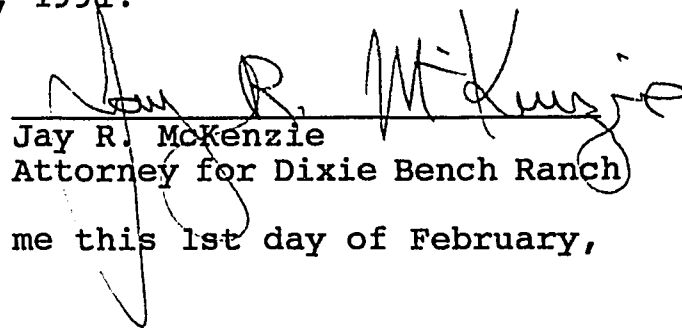

5. The water supply from Maple Creek and its tributaries itself is insufficient for the purpose for which it is sought to be appropriated by the application.

6. The claim is in excess of the recognized need for and duty of water for domestic purposes.

7. The appropriation requested will conflict with the local public interest in that all of said waters are already appropriated and used.

8. Maple Creek and its tributaries are covered by prior decrees and rights to the extent of no less than 41.73 CFS, while through much of the summer season, there is not sufficient water to satisfy even 20 CFS, and never enough to satisfy all existing rights.
