Re: Application for Permit

Mr. Don B. Forsgren

Dear Mr. Forsgren:

We are returning your personal check in the amount of \$10.00 and your application to appropriate the public waters of the State of Idaho. Please be advised that before we can accept and process your application we will require some additional information.

It appears that the information on the application which was submitted under Item 8a 3 indicates that you wish to appropriate water for stock watering purposes. If so, please enter stock water, the amount, and the period of use during each year that the water will be used for this purpose under Item 4 of the application.

It is also noted that under Item 8a 4 you intend to supply water for one domestic dwelling. The maximum rate of diversion for a domestic use, as considered by the department is .02 cubic feet per second. However, if you are requiring an additional amount of water, you are requested to supply the department with justification information.

Under Item 4 and Item 5, we assume that the maximum rate of diversion you have requested is a total of .05 cubic feet per second and five (5) acre feet per annum. If this is not correct, please advise the department and make the necessary indications.

We also require that under Item 6a that a description of your diverting works be inserted. We assume that from the information you have given that you intend to drill a well and that it will probably be equipped with a pump, motor, and etc. This is the type of information that we require under Item 6a.

From the map you have entered under Item 11, we would assume that the complete legal description required under 8a 1 would include the SE $\frac{1}{4}$ SE $\frac{1}{4}$, sec. 11. If so, please make the necessary corrections.

Enclosed is a current set of application instructions for your use in these matters. Please contact us if we may be of further assistance

Very truly yours,

Dear Mr. Forsgren:

One of the conditions of approval of your water Permit No. 13-7004 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before February 1, 1974. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
