Dear Mr. Norcutt:

At the time of your first inquiry into the matter of the Whiskey Creek Water Users Association's plan to install a pipeline, we had no knowledge of their intentions. On May 15 of this year, we received the application for the appropriation of 0.30 c.f.s. of the waters of Whiskey Creek.

This permit, if issued, will require that a measuring device be installed and this right will be subject to control of the watermaster and have a May 15, 1970 priority. It will not interfere with any of the decreed water rights which have prior rights on the stream.

A copy of the application is being enclosed and since you have two letters on file, we will grant you another 10 days in which to enter a formal protest in the event you wish to do so. If we receive a protest from you by August 5, 1970, it will be considered and a hearing will probably be held.

If we can be of further assistance, please advise.

Gentlemen:

We have reviewed the matter of your domestic water supply through the Idaho Attorney General's office. In view of the details of your situation, we feel it would be best to proceed with your application for permit as filed on May 15, 1970.

We will continue to look at the situation, and see if we can find any other solution.

If you have any questions on the matter, please contact us.

Gentlemen:

A group known as Whiskey Creek Water Users Association, in an attempt to set up a culinary water system, in the Lago, Idaho, area, applied for the right to appropriate water. The application was approved under Identification No. 13-7015, on August 10, 1970.

This group has since come to me with some of their problems, and in checking their plans, it appears to me that they have begun the wrong type of action to accomplish their intended purposes.

From my conversations with these gentlemen, it appears that each member of the association is a farmer-land owner in the Lago area, and that each is the owner of a decreed water right. These people propose to transfer one inch of water, each, to the association to provide necessary water for their culinary system. We question that there is any water available for appropriation; but if this transfer can be made, with a change in point of diversion as to the one inch per member only, such transfer to affect the water for the culinary system, only, and the new point of diversion being as shown in the application above cited, then the culinary system can be made to function, we believe.

Would you please supply to this office, for use by the members of the association, necessary forms for application for change of point of diversion? There will be about 15 members of the association. I would presume that each must make his separate application; but if a joint application can be made, this might simplify handling of the total matter. Your thoughts hereon would be appreciated.

Dear Mr. Kingsford:

Your suggestion, in your letter of February 9, that each member of the Whiskey Creek Water Users Association transfer a portion of their decreed right to the Association appears to be the best way to insure an adequate supply of water.

In 1969, we had a similar request to assign several decreed rights to one organization and also to transfer the point of diversion and the place of use. These rights were combined in the following manner. Each member conveyed to the association, by means of a grant deed, a specific portion of their water right. The association then being the owner of those portions of the water rights filed one application for transfer of water right. The transfer included a tabulation of each members right, as requested under item 2 of the application for transfer.

I have enclosed an Application for Transfer of Water Right form as you have requested. If you have further questions concerning this matter, please contact me.

Dear MR. Turner:

One of the conditions of approval of your water Permit No. 13-7015 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before August 1, 1975. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

The field report indicates that there are 18 users on the system. However,
I believe at least 14 ^{or 15 or 16?} of these are covered under Transfer No. 1671 (11-0627, etc.).

Can we only license the additional users under 13-7015? If so, do we need to determine the exact location of the place of use? What about the p.d., the transfer also lists the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 18.

As you can tell, am somewhat confused w/this one. Appreciate your help ~~in~~ in straightening me out!

Gentlemen:

In August of 1976 a representative of this Department made an examination of the works covered by your Permit No. 13-7015 and the Department is prepared to issue a water right license as follows:

Amount of water that can be recognized as beneficially used under
Idaho law: 0.04 cfs*

Point of diversion: NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 18, Twp. 11S, Rge. 41E, B. M.

Beneficial Use: Domestic purposes within the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 18;
NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 20; Twp. 11S, Rge. 41E, B. M.

Priority date established: May 15, 1970

*Subject to the condition that no more than 0.32 cfs be diverted at any
one time when combined with Transfer No. 1671.

This water right license is for the two residences that have been added to your water system and that were not included in Transfer No. 1671 of your decreed rights.

Please let us know if you do not agree with our proposed license. If we do not hear from you within 10 days we will assume you have no objections and a water right license will be issued as proposed above.

Sincerely,

JAN GROVER
Water Rights Supervisor
