RE: Pre-permit Exam of Application for Permit No. 13-7081

DATE: August 28, 1974

I met with Mr. Hodges and visited the point of diversion and the place of use of the above referenced application. The locations seem to be accurate. The unnamed spring and slough area begin some 100 feet North of Bear River and flow parallel for some 100 feet. In the SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 8, Mr. Hodges has built a dam of approximately 5 - 6 feet high to hold the water back from flowing into the Bear River. A 3 ft. screwgate to regulate this stored water has been installed.

The system has been in operation during the last irrigation season. The system required a portable pump, portable mainline and sprinkler lines. It would appear that a measuring device would cause an unduly hardship for this particular type of system he has developed.

Application No. 13-7080 in the name of Ben B. Johnson also is filed for this point of diversion with a different place of use.

Dear Mr. Hodges:

One of the conditions of approval of your water Permit No. 13-7081 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before October 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise, the permit will lapse and be of no further force or effect.

SYSTEM DESCRIPTION:

Surface water from an unnamed drain is diverted by a portable diesel pump motor - no make, model, or ID # and by a Correll centrifugal pump m/n - HLF6, s/n - 15522-13. The water is diverted thru a screened 6" diam. intake hose in the drain and into a 5" diam. mainline (portable aluminum) - Acreage is irrigated by 4 handline lateral sprinklers of various lengths.

REMARKS:

System described by Keith Hodges
The water in the drain consists of irrigation runoff water from lands owned by Clair Rosen & Ben Johnson. Their lands are presently gravity flood irrigated.Examiner's Signature Anthony R.
