State of _____, deposes and says:

That he is the holder, or the duly authorized agent of the holder*, of Permit to Appropriate the Public
Waters of the State of Idaho No. 13-7140.

That under the terms and conditions of said permit, work thereunder was required to be completed on or
before 1 Dec, 1981.

That he has heretofore performed the following work described under said permit: The east
Portion of the Delayed Spring has been developed by cutting
into the side of the hill, locating the main source of the spring
water. This area was trenched, tiled & graveled - bring the water
to a collection tank and a submerged pump Costing \$6000.⁰⁰

That he is unable to complete the remainder of the work within the required time for the following
reasons, to-wit: The amount of water recovered by the development
of this area is a bit disappointing amounting to about
25 gallons per minute - There is another area just west of
this development, is on my property and I would like to get an
extension of the permit so I will have a chance to develop this area also.
Wherefore, he asks that the Department of Water Resources extend the time for the completion of

obligations under said permit to 1 Dec, 1986.

This 151 acres of land has been owned by me or close relatives for over 50 years.

On the north portion of this property there is eighteen acres of pasture that has been used for pasture for well over fifty years. In the middle of this eighteen acres there has always been a spring known as the Lloyd spring. It runs year around.

My father did some improvements to the collection and holding facilities from this spring as did his father-in-law before him.

I first of all improved this spring myself in 1946 by driving a larger pipe about 20 feet into the hillside and placing an old used porcelain tub at the end of the pipe to be used as a watering trough for the animals.

In 1976 I decided to make some major improvements to the system and I applied for the permit at that time.

I have done all that I am going to do and that includes digging a y-shaped trench in the hillside, placing perforated collecting pipe lines surrounded by gravel and covering them over with soil. At the end of the collecting system I placed a 200-gallon cement holding tank and a submerged electrical pump. When I completed that portion of the development I could pump 125 gallons per minute without depleting the holding tank. I then run a pipe to my farm shed-shop and another line to a home site. But I have not as yet built the home and may not. The economics of farming or medicine do not look too good from now until the time I retire. That phase of water development cost about \$5,500.00. I now have enough water to supply the farm shed, a home if I build, and water a few head of cattle and water a large one to two-acre garden.

At the time I completed this first phase I had plans to develop another area of water seepage about 100 feet west of the first and thus I applied for an extension of the permit. However, I have not done anything with that.

Respectfully,

Vance D. Campbell, MD

RE: CLARIFICATION & CORRECTION OF FIELD EXAMINATION

DATE: 1-24-90

=====

The field examination for this permit recommends a total diversion rate of 0.01 cfs and annual volume of 5.15 af. The diversion rate was measured. Volume was computed using the continuous diversion rate of 0.01 cfs over 260 days per year. The 260 day figure was taken from the standard industrial and commercial use formula from the IDWR field examiners handbook. The resulting volume of 5.15 afa appears to be too high for this use.

The commercial use formula found in the examiners handbook assumes an eight hour per day operation in addition to the 260 day per year assumption. The calculation therefore takes the diversion rate continuously over the eight hour, 260 day period to arrive at an annual volume. If there is information that the daily operation is more or less than eight hours, than the actual number of hours per day should substitute the eight hours.

The field exam for this permit does not make any reference to daily usage or number of hours per day. The examiner does mention that the use is limited to washing of farm equipment and a farm shed drinking fountain. If the diversion of 0.01 cfs is carried over an 8 hour day, 260 day period as shown in the handbook, the annual volume would be limited to 1.71 af. This volume is more than the volume assigned to domestic uses including up to 1/2 acre of lawn irrigation. The 1.71 af therefore is probably too high for the uses shown by the examination. If the diversion was limited to a four hour day, 260 day operation, the annual volume would be reduced to 0.86 af. This volume appears to be more realistic or compatible with the uses identified on the exam, despite the fact that there is a lack of information concerning the period and length of operation.

It is recommended that the licensed annual volume be reduced to 0.84 af.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Source known locally as Lloyd Spring.
6. Domestic use under this right is for washing farm equipment and drinking fountains for farm laborers.

Dear Mr. Campbell:

We are in receipt of your letter of February 8, 1990, which requests the addition of stockwatering on your water right license. Please be advised that Section 42-111, Idaho Code, defines "domestic" use to include water for the household, and a sufficient amount for use by domestic animals kept with and for the use of the household.

We hope this resolves your concerns regarding your water right. If you have any further questions, please feel free to contact this office or our regional office in Idaho Falls.

Sincerely,
