RE: Application for Permit No. 13-7148

Mr. Travis Bergeson
Dayton,
Idaho 83232

Dear Mr. Bergeson:

Please find enclosed a typed copy of the application for permit you submitted to this office on February 24, 1977, which needs your signature and must be returned to this office. We have commenced the processing of your application for permit for ground water from the well located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 14, T. 15S, R. 38E, B.M., Franklin County.

However, in our review of your application we find the quantity you have applied for exceeds the statutory maximum allowance of one inch per acre when combined with Permit No. 13-7110. The Department can accept application requests for appropriations of more than one inch per acre if the applicant can provide adequate justification of the additional water requested.

We will complete the processing of your application on March 21, 1977, at which time it will be ready for final Departmental action. If, at that time, acceptable justification for the 4.00 c.f.s. has not been received the quantity on the application will be reduced to 3.54 c.f.s. This quantity when combined with 0.50 c.f.s. under permit No. 13-7110 will equal one inch per acre for the lands requested under this application.

If you have any questions concerning this matter, please feel free to contact me at this office.

Respectfully submitted,

Dear Sirs.

The reason I filed for 1/2 second feet of water on the amount of acres I showed on the application is I rent 50 acres of land just north of the land I own and I planned on using the extra water there.

Dear Mr. Bergeson:

As stated in our letter to you, dated February 28, 1977, the Department can accept application requests for appropriations of more than one inch per acre for lands listed on the application provided adequate justification is submitted to the Department.

Your reply received in this office on March 7, 1977, states the additional water is to be used on 50 acres of land north of your property. Since this land is not listed on the application, the Department can not consider it in determining "adequate justification."

Should you have questions concerning this matter, please feel free to contact me.

Dear Mr. Bergeson,

RE: License No. 13-7148

Enclosed is a copy of the Water Right License issued on the above referenced Permit.

Please be advised that one of the conditions of your permit was that a measuring device be installed as part of your diversion works. That requirement has been waived with issuance of the enclosed license. However, in the event that water supply shortages become a problem installation of measuring devices may be required.

Sincerely,
