Dear Mr. Hogan:

Your protest against the approval of the above referenced application has been received and a copy has been sent to the applicant. The Department suggests you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

If this office can be of further assistance, please contact us.

Sincerely,

RONALD D. CARLSON

Dear Sirs

IN The matter of water application NO 13-7219
I want to CONFIRM my phone call to Mr.
Forsgren on Oct 14. That the water applied
for in this permit will not be diverted
from its present source or will there be
any consumption of the water. The water
is to be used only for fish propagation.
There is approximately 400 yd between the
source of the springs & where the water
from the spring enter the bear river.
The extent of the use is to build small
ponds in this 400 yd distance where possible
& the water would still enter the bear
river where it now enters.

Again may I stress there would be no
diversion or no consumption of the water.
I appreciate your interest in this matter

Dear Sirs:

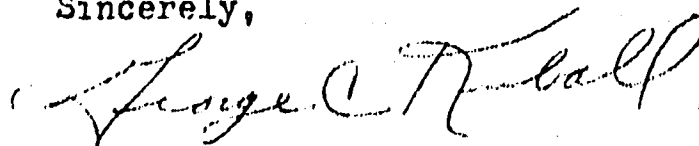

I would like to clarify the matter of water application No. 13-7219 for 4 C.F.S. of water to the Gentile Valley Irrigation Company. The water for which I applied will not be diverted from its present course, nor will there be any consumption of the water. The water will be used only for fish propagation.

There is approximately 400 yards between the source of the springs and where the water from the spring enters the Bear River. The intent of the use is to build small ponds in this 400 yard distance where possible and the water would still enter the Bear River where it now enters.

However, in reviewing the letter from Mr. Kimball, he indicates that all water diverted will be non-consumptive and makes reference to permit No. 13-7029. Our records show permit No. 13-7209 lapsed in June of this year and therefore, is now null and void.
