Dear Sirs;

I have a small well that only supplies water to 6 Beef Cows & Pasture, about 2 acres, only used in summer & early fall. Its to cold in the winter & the Pump would freeze. The Pump only Pumps about 5 gal. Per Min. of water when in use.

I don't understand what construction of diversion works, I need to do for Pasture water.

Is the extension of time just a time permit to use the water? am I required to pay \$15.00 per year for the use of the water & filing fee. I know I have filed for a water right Permit, Please check your records & go from there.

Thank you

Dear Mr. Checketts:

Re: Permit No. 13-7249

This office acknowledges receipt of the Statement of Beneficial Use postcard submitted for the above-referenced permit.

The next step is for a field examiner from our regional office to contact you to schedule an exam to prepare for licensing of the right. I understand that there is only a short period of time in the summer and fall when this examination can be done. However, there is a large backlog of exams to be done and the regional office may or may not get to it this year. If you wish to have it done sooner, please feel free to contact the office in Idaho Falls at 525-7161 to schedule it.

I will try to answer your other questions. First of all you ask what construction of diversion works you need for pasture water. Let me explain this condition of approval is placed on all water right permits with diversions less than 25 cfs. Since the development period for most permits is five years, this condition indicates to the permit holder that construction of the system must start almost immediately after as opposed to waiting to later in the construction period to develop the water right and still preserving the priority date. In your case, where the well has been drilled and supplies water to the cattle and pasture, you have met this condition.

You ask about the extension of time form enclosed in the notice letter. An Extension of Time initiates the procedure for a permit holder to request an additional period of time (construction period) to complete the project. Usually only one extension of time is granted, but that depends on the reasons for delay in completion of the proposed project. There is a \$15.00 filing fee to request an extension of time.

1. Measurement Calculations

a) Field Measurement Calculations (Include theoretical capacities and system capacity)

$$Q = \frac{1 \text{ hp} (8.814) (8070)}{21 \text{ Feet Lift} + (40 \text{ psi} \times 2.308)} = \frac{7.0512}{113.32} = 0.06 \text{ cfs capacity}$$

a, with 2 acres irrigated @ 0.02 cfs/acre a possible 0.04 cfs is achieved

b, Permit asks for 0.04 cfs

b) Volume Calculations for Irrigation:

$$\begin{aligned} V_{I.R.} &= (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 2 \text{ acres} \times 3.5 \text{ af/a} = 7 \text{ af} \\ V_{D.R.} &= [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 0.04 \text{ cfs} \times 214 \text{ d} \times 1.9835 = 16.97 \\ V &= \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 7 \text{ af} \end{aligned}$$
