Dear Mr. & Mrs. Williams:

Enclosed is a copy of a protest filed against the issuance of a permit pursuant to your Application No. 13-7402. The Department suggests you contact the protestant directly in an effort to determine the nature of the protest and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?

If this office can be of further assistance, please contact us.

NAME OF PARTY Vance Christensen

EMPLOYEE Ernest Carlsen

RE: Mr. Christensen has moved out of state and will be unable to attend the hearing on March 6, 1984. Because his sister Anita Wilcox will be representing Carl Christensen, their father, arrangements are to be made for her to also represent Vance Christensen. Vance explained to me that both Carl and him acknowledge the Williams' are entitled to sufficient water for their home and irrigation of lawn and garden. They feel this amount represents less than 1/3rd of the spring though no flow measurements are available. Vance stated a diversion box was installed by the Williams' at the springs which automatically diverts 1/3rd of the flow into their pipeline and storage tank. Overflow from this storage tank drains onto Vance's property and has been creating a boggy area. Historically, he stated the spring provided water that was used for irrigation by Carl Christensen. The continuous diversion of water by the Williams' and their failure to turn the water back to the stream greatly reduces the amount of water available to fill established water rights. Vance felt that their protest could be resolved if the applicants would agree to pipe the overflow back into the spring so that it was available for diversion at Carl Christensen's headgate below the spring.

Grant Williams - filed application to record their $\frac{1}{3}$ interest in spring.
began using water from the spring in 1977. He constructed
spring box dividing water $\frac{1}{3}$ & $\frac{2}{3}$.

Danita - Protestants don't feel 0.04 cfs is need to satisfy needs
of applicant. and excess water ~~from~~ flowing from
the system creates a bog on Vance Christensen's property.
Spring is providing water to 3 homes, dairy & farm.

~~Grant Williams -~~

Bob Fleener - explained that 0.04 cfs is based on diversion of
... water by $\frac{3}{4}$ Hp. pump in a well of average depth.
... Continuous flowing springs can actually provide less water
satisfy domestic needs will much smaller ~~flows~~ of water.

Grant Williams - box diverts water into pipe gravity flow pipe and
an 1100 gal storage tank. 5 H.p. submersible pump provides water
just to house. Uses another gasoline pump to sprinkler
irrigate lawn & garden - 3 sprinkler ~~heads~~

Dear Mr. Williams,

Enclosed for your consideration is a copy of a letter our office recently received from Mr. Vance Christensen, one of the original protestants against the issuance of the above captioned permit. You may recall that Mr. Christensen was represented by his sister at the conference held in Preston, Idaho. Though Mrs. Wilcox withdrew the protest on behalf of her brother, Mr. Christensen has in his letter outlined some conditions he wishes to have you comply with. If you feel these conditions are unreasonable I suggest you contact Mr. Christensen and speak with him.

Dear Sirs:

This is to acknowledge receipt of a copy of the withdrawal of protest of the above mentioned application for water permit, which was executed by Denise Wilcox on behalf of the protestants. Although not specifically stated I understand the water will be returned to the natural drainings of the spring in such a manner as not to cause swamping (ie in an underground pipe) and the water will be returned at the elevation level to facilitate diversion either to the canal or to the diversion channel which goes underneath the canal. I further understand this will be accomplished by July 15, 1984.

If returned as in 1983 the water follows the lower route, thus missing the underground pipe beneath the Canal & is therefore lost to the Canal & cannot be used for irrigation below the Canal.

Thank you for your attention in this matter.

Sincerely,

C. Vance Christensen

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
LICENSING REPORT

RECEIVED

OCT 9 1986

13-7402
Permit No.

Department of Water Resources

1. Measurement Calculations

a) Field Measurement Calculations (Include theoretical capacities and system capacity)

5 gal in 24 sec

$$\frac{5}{24} = .21 \text{ gps} * 60 = 12.5 \text{ gpm}$$

$$12.5 * .00223 = .03 \text{ cfs} \checkmark$$

system capacity dependant upon
spring capacity.

* The above measurement of 0.03 cfs was taken from
faucet being fed by a storage tank. I've recommended
that this amt. be modified to 0.02 cfs for licensing because
the actual inflow to the tank from the source could not
be determined. H.W.J. ✓

b) Volume Calculations for Irrigation:

$$V_{i.r.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \text{NA}$$
$$V_{d.r.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \text{NA}$$
$$V = \text{Smaller of } V_{i.r.} \text{ and } V_{d.r.} = \text{NA}$$

c) Volume Calculations for Other Uses:

2. Overlap Review

a) Other water rights with same place of use: Claim on P.U. by owner

b) Other water rights with same point of diversion: Claim on F.D. by owner

c) Analysis:
