ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 13-7438, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before January 1, 1993.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

e. Other: The permit holder shall be required to provide the Department, upon request, information showing volume changes per hour necessary to maintain an adequate environment for the fish propagation facility. Volume changes per hour shall be based upon actual fish production.

Assignment or sale of this permit is subject to a determination by the Department that the permit holder has proceeded to develop the permit with due diligence and without speculation.

Water used under this permit if discharged into a natural channel shall meet Idaho Water Quality Standards.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Use of water under this right is subject to policies set forth in the State of Idaho Water Plan, including Policy No. 5G.

Use of water under this permit shall be non-consumptive.

Use of water under this permit is subject to control by the watermaster of State Water District NO. 130, Trout creek.

Prior to placing water to beneficial use under this permit, the permit holder must determine the rate of loss within his facilities using a procedure approved by the Director of the Dept. of Water Resources, & provide a source of augmentation water to mitigate all losses.

And I do further certify that said newspaper is a consolidation, effective February 16,
1942, of the Idaho Evening Times, published theretofore daily except Sunday, and the Twin
Falls News, published theretofore daily except Monday, both of which newspapers prior to
consolidation had been published under said names in said city and county continuously and
uninterruptedly during a period of more than twelve consecutive months, and said TIMES-
NEWS, since such consolidation, has been published as a daily newspaper except Saturday,
until July 31, 1978, at which time said newspaper began daily publication under said name
in said city and county continuously and uninterruptedly.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week
has been designated as the day on which legal notice by law or by order of any court of com-
petent jurisdiction within the state of Idaho, to be published weekly, will be published; and
that at the head of the editorial column of said combined newspapers, and in each issue there-
of, Thursday is announced as the day on which said legal notices will be published.

12. If financing is required, the Buyer agrees to make a best effort to procure same and further agrees to make application therefor within five (5) days after Seller's acceptance of this agreement. If VA or FHA financing is contemplated, additional provisions pertaining thereto may be attached hereto and are thereby incorporated herein by reference. The Buyer and Seller hereby authorize the party designated in Paragraph 1A(c) hereof to advance such portion of the earnest money deposited as may be required to pay initial loan charges attributable to Buyer's financing. The parties agree that the earnest money (less credit report fees, appraisal and other loan charges, if any) may be refunded in the event financing contemplated by the Buyer is not obtainable.
If this agreement is conditioned upon Buyer obtaining FHA or VA financing, it is expressly agreed that notwithstanding any other provisions of this contract, the Buyer shall not be obligated to incur any penalty by forfeiture of earnest money, or otherwise be obligated to complete the purchase of the property described herein, unless seller has delivered to Buyers a written statement issued by the FHA or VA as applicable, setting forth an appraised value of the property (excluding closing costs) of not less than the purchase price. Seller hereby agrees to deliver said statement to the Buyer promptly after it is made available to Seller. The Buyer shall however, have the privilege and option of proceeding with the consummation of the contract without regard to such appraised value, provided the difference in excess of the appraised value is paid in cash.
13. Should the improvements on the premises be materially damaged by fire or other causes, prior to closing this sale, this agreement shall be voidable at the option of the Buyer.
14. In the event of default by either of the parties in their performance of the terms and conditions of this agreement, the defaulting party agrees to pay all attorney fees and costs incurred by the non-defaulting party.
15. The undersigned Buyer hereby acknowledges further that he has not received or relied upon any statements or representation by the undersigned broker or his representatives or by the Seller which are not herein expressed. The Buyer has entered into this agreement relying solely upon information and knowledge obtained from his own investigation or personal inspection of the premises. This agreement constitutes the whole agreement between the parties and no warranties, agreements or representations have been made or shall be binding upon either party unless herein set forth.
16. The Seller shall within a reasonable time after closing furnish to the Buyer a title insurance policy in the amount of the purchase price of the premises showing marketable and insurable title subject to the liens, encumbrances and defects elsewhere set out in this agreement to be discharged or assumed by the Buyer. Prior to closing the transaction, the Seller shall furnish to the Buyer a commitment for a title insurance policy showing the condition of the title to said premises. Buyer shall have five (5) days from receipt of the commitment or until 24 hours prior to closing, whichever is less, within which to object in writing to the condition of the title as set forth in the report. If the Buyer does not so object, the Buyer shall be deemed to have accepted the condition of the title. It is agreed that if the title of said premises is not marketable, or cannot be made so within thirty (30) days after notice containing a written statement of defects is delivered to the Seller, or if the Seller, having approved said sale fails to consummate the same as herein agreed, the earnest money shall be returned to the Buyer and Seller shall pay for the cost of title insurance, escrow and legal fees, if any.
17. This agreement shall be binding upon the heirs, personal representatives, successors and assigns of the respective parties hereto.
18. Time is of the essence of this agreement.

RE: New water right application.

Dear Mr. Mickleson:

On November 11, 1986 Mr. and Mrs. Jay Barker of Ogden, Utah submitted an application to divert water from Trout Creek for fish propagation. As an oversight the Department failed to route a copy of the application to you for review. We apologize for this and now respectfully submit the application for your consideration.

The Barker's application was advertized and there were no protests filed during the protest period. However, we will hold the application an additional two weeks while you review it. If you have any concerns about the proposed project please notify this office before January 2, 1987.

If you need further assistance please contact this office.

RE: The watermaster of District 13-Q, Clark Mickleson, contacted me regarding
application 13-7438. The application asks to divert 10 cfs year round from
Trout Creek for fish propagation. The application was advertized two
weeks and no protests were filed. However, Mr. Mickleson believes there
will be problems delivering water to the applicant's project. He stated
that prior water rights use all available water during portions of the
summer and that these rights are diverted from systems above the
applicant's proposed project. I requested that Mr. Mickleson submit some
documentation to the department showing the history of water delivery
from Trout Creek. The Department can then determine whether there is
any available water for the applicant's project. Mr. Mickleson said
he would also contact the applicants and discuss his concerns with them.
This office will hold the application until January 2, 1987 to allow
Mr. Micklesen to submit pertinent information.

RE: Application for permit No. 13-7438

Dear Mr. & Mrs. Barker:

This office has completed the publication of notices announcing the above captioned application has been filed with the Department of Water Resources. Though no letters objecting to the issuance of the permit were received, the Department must still evaluate several criteria regarding the application. These criteria and the information you need to provide in order to evaluate them are described on the document enclosed with this letter. Though each item must be carefully examined, the sufficiency of the water supply is of particular importance in this case.

The application requests the year around diversion of 10 cfs from Trout Creek a tributary of the Bear River. The diversion of water from this stream during the summer is regulated by the watermaster of Water District 130. For many years this position has been held by Clark Mickelson. We have contacted Mr. Mickelson to gain an understanding of whether or not there is water available to satisfy your request. Based on his knowledge of the creek you could probably expect there to be water available for diversion under your permit for the entire year in three out of ten years. But in those years when the runoff is normal or below normal the entire stream is required to fill irrigation rights which are diverted upstream from your proposed project. These diversions would dewater the stream starting in July and possibly continuing until mid-September

Realizing there are periods of sixty to seventy-five days during most summers when water would not be available for diversion

under this permit it is important that your response to Rule 4, 5,3,2, contain an explanation of how your going to operate the proposed facility. This plan of operation must take into consideration those periods when water will not be available under the permit.

To provide ample time for you to compile and submit the necessary information this office will suspend further action on the application for up to thirty days or until the requested information is provided. Failure to submit the supplemental information is cause to void the application, so your prompt attention to this matter is vitally important.

Naturally if you have any questions feel free to contact this office.

Re: Application for permit No. 13-7438

Dear Mr. E. Carlsen:

In response to your letter about our water users permit, we have talked to Clark Mickelson about the problems you have mentioned in your letter. Mr. Mickelson informed us that we have a 2.8 cfs water right dating back to 1871, coming out of Trout Creek. We have approximately 2 to 3 cfs coming from springs and drain water located on the property. Mr. Mickelson has suggested that we use this water because it is constant year round and not to rely on the water from Trout Creek, as we had originally planned. We therefore would like to change our request from 10 cfs to 3 cfs, knowing that we would only use this water when there was a good water year. On bad years we would rely totally on the water coming from springs on the farm and our water rights. During the summer months, when the water is being used by the farmers, we would be hauling our fish to Utah to be sold and would not need as much water.

We hope that these changes will satisfy the Department of Water Resources supplemental information, rule 4,5,3,2. If there are any other questions you would like answered about our plans, we would be happy to talk to you further. We appreciated Mr. Mickelson giving us the information on the water availability on our property and feel that we have found a workable solution to our problem. We hope this will be satisfactory. Thank you for your interest in helping us get off to a successful start in Idaho.

Yours Sincerely,

Jay W. Barker

RE: Amending application 13-7438

Dear Mr. and Mrs. Barker:

Pursuant to our phone conversation I have enclosed an amended application for permit regarding your fish propagation project. I have partially completed the form leaving items 16(a), 13 and the signature for your attention. Please complete these items and check the application for any errors I may have made. Upon receipt of the application, along with a \$20.00 filing fee, our office will readvertise the requested changes and continue with normal processing.

If you do not feel comfortable reading the legal descriptions of point of diversion and place of use (items 3 and 9) just pinpoint these on the map and I will determine the legal. We would also appreciate a copy of the updated system plans as soon as possible.

Thank you for your cooperation and if you need further assistance please feel free to contact our office.

RE: Amended fish propagation application 13-7438

I contacted Mrs. Barker to clarify the plans for the fish plant. Mr. Barker did not specify in his system diagram the number of 10' x 30' x 3.5' ponds that would be built. Mrs. Barker stated they plan to have no more than 11 ponds that are indicated in the drawing. If ponds are filled this equals approximately a 11,500 cu. ft., maximum system volume. Mrs. Barker said they plan to put 4 ponds in service next spring and then add on as funds become available. At the end of 5 years they plan to have 11 ponds operating.

NOTICE OF AMENDED APPLICATION FOR WATER PERMIT

Notice is hereby given that Application for Permit No. 13-7438 in the name of Jay W. and/or Mirjam D. Barker, North Ogden, Utah was filed for the diversion of 10 cfs of water from Trout Creek, tributary to Bear River, the point of diversion within the NE1/4NE1/4SE1/4, Sec. 17, T. 11S, R. 41E, B.M., Caribou County, the water is to be used for fish propagation, Jan. 1 to Dec. 31, within the NE1/4SE1/4, NW1/4SE1/4, Sec. 17, T. 11S, R. 41E, B.M.

The applicant now proposes to amend Application No. 13-7438 for the diversion of 3.0 cfs of water ^{from UNYAINED SPRINGS} within the NW1/4SE1/4SE1/4, NE1/4SE1/4SE1/4, Sec. 17, T. 11S, R. 41E, B.M., for use within the SW1/4SE1/4, SE1/4SE1/4, Sec. 17, T. 11S, R. 41E, B.M.

Any protest to the proposed amending of the application must be filed with the Department of Water Resources, 150 Shoup Ave., Suite 15, Idaho Falls, Idaho, 83402 on or before May 4, 1987.

RE: Application for permit no. 13-7438

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right application for permit.

This office is currently in the process of advertising the application in the Caribou County Sun. The advertisement will be published for two weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Enclosed is receipt No. 41141 for the amount of 20.00.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Ernest Carlsen
Assistant Regional Manager

MEMORANDUM

TO: Water Allocation Section, Glen Saxton, Bob Fleenor, Norm Young

FROM: Gary Spackman *Gary*

DATE: July 21, 1987

Recent controversy over losses ~~occurring~~ for diversions of water for non-consumptive uses has prompted a review of our conditions for issuance of a permit. In particular, fish propagation diversions have been suspected of losing water through the delivery system. As a result, conditions were previously imposed which required installation of inlet and outlet measuring devices.

A more uniform condition should be imposed on all proposed nonconsumptive uses diverted from surface sources. The conditions should be more general to allow flexibility depending on size and the nature of the operation. Some systems may require careful engineering testing. Other systems may not merit such careful evaluation.

The following condition is proposed to replace all previous conditions which were imposed to require measurement of losses through the system:

Prior to placing water to beneficial use under this permit, the permitholder must determine the rate of loss within his facilities using a procedure approved by the Director of the Department of Water Resources, and provide a source of augmentation water to mitigate all losses.

The condition may require an interim report from the permitholder prior to placing the water to beneficial use. In most cases, however, an in depth study by the Department will probably not be necessary.

PROOF DUE NOTICE

RE: PERMIT NO. 13-07438

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before January 1, 1993. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

RE: PERMIT NO. 13-07438 IN THE NAME OF JAY W. BARKER

Dear Mr. Christensen:

In response to your letter dated December 6, 1992, I have researched the computer based water right files of the department for water rights appurtenant to the land description you forwarded and found that only permit no. 13-07438 filed in the name of Jay Barker is in good standing. Application for permit no. 13-7486 also filed by Jay Barker was withdrawn from further consideration before the department by Barker on December 26, 1991. Hence, that application is of no further force nor effect.

The department does not have information relative to the number of shares of canal company stock that you may own. To obtain this information, you probably need to contact Barker or the entity which may be delivering irrigation water to your land such as a canal company.

The department issued permit no. 13-07438 to Jay W. Barker on January 25, 1988 authorizing the diversion and use of 3.0 cubic feet per second of water from Springs tributary to Trout Creek for fish propagation purposes. The file also shows that on October 31, 1992, the department notified Barker by certified mail that in order to complete the requirements of the permit and to develop a water right, he is required to submit "proof of beneficial use" (proof) of the water to the department on or before January 1, 1993. To date, Barker has not submitted the proof. If neither the proof nor a request for an extension of time is submitted to the department by January 1, 1993, the department will then send a "lapse notice" to Barker allowing another 60 days for the submittal before the permit becomes null and void.

Since Barker is the permit holder of record and a permit is considered "personal" property rather than "real" property, he can convey the permit to you if he completes and timely returns the enclosed "assignment" form to the department. Then you can assume the submittal responsibility in connection with the permit. Both you and Barker may have assumed that the permit was conveyed in

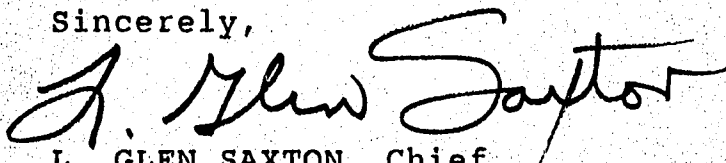

the sale of the land, but that is not the case since a permit does not represent a perfected water right appurtenant to the land.

Enclosed for your information and use are the following:

1. Copy of Permit No. 13-7438
2. Copy of the Proof Due Notice
3. Assignment form
4. Proof of Beneficial Use form and instructions
5. Request for an Extension of Time form and instructions

If you have additional questions or if we can be of further assistance, please feel free to contact the department.

LAPSE NOTICE

RE: PERMIT NO. 13-07438

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated October 31, 1992. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifteen dollar (\$15) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

Enclosed is an order advancing the priority of the permit since the proof was received after the proof due date. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Karen L. Gustafson

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, Karl J. Dreher, of the Department of Water Resources hereby approve the
above Application for Amendment for Permit No. 13-07438 with the following;

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The right holder shall be required to provide the Department, upon request, information showing volume changes per hour necessary to maintain an adequate environment for the fish propagation facility. Volume changes per hour shall be based upon actual fish production.
6. Water used under this right if discharged into a natural channel shall meet Idaho Water Quality Standards.
7. Use of water under this right is subject to policies set forth in the State of Idaho Water Plan, including Policy No. 5G.
8. Use of water under this water right will be regulated by the watermaster of State Water District No. 13Q.
9. Use of water under this right shall be non-consumptive.
10. Two points of diversion located in NESESE, S17, T11S, R41E.
11. Facility volume = 9,856 cubic feet.

Witness my hand this 14TH day of AUGUST, 1997.

MEMORANDUM

TO: File 13-07438

FROM: Sharla

DATE: July 8, 1997

RE: Annual Volume for Fish Propagation Use

Per a memo dated 1/15/88, volume is calculated this way:

1. Calculate changes per hour:
total flow into facility x 3600/facility volume(cf) = changes
2. Calculate annual volume:
facility volume(AF) x changes x 8760 = AFA
3. Calculate volume given by permitted flow:
flow rate(cfs) x 1.98 x 365 days = AFA
4. Recommend lower figure

1. 2.06 cfs x 3600/ 9856 cf = 0.7524

2. 0.226 AF x 0.7524 x 8760 = 1489.6 AFA

3. 2.06 cfs x 1.98 x 365 days = 1488.8 AFA

RECOMMENDATION: 1488.8 AFA

RE: WATER RIGHT NO. 13-07438

Dear Permit Holder(s):

The above referenced water right is in the process of being licensed. However, before a license can be issued, your permit must be amended to depict your water right as it has actually been developed.

The enclosed Application for Amendment contains information that will be included on the license when it is issued. The amendment reflects a change in the location of the point(s) of diversion. Please review carefully and if you concur, sign the amendment and return with the \$50.00 filing fee within 14 days.

The last page of the Application for Amendment form contains a list of Conditions of Approval and Remarks proposed for the license when it is issued. These conditions of approval and remarks may be modified upon further administrative review.

If you do not concur, or if you have any questions about this information, please contact me as soon as possible. My telephone number is (208) 327-7946.

Sincerely,

Shelley W. Keen
Water Rights Supervisor

RE: WATER RIGHT NO. 13-07438

Dear Water Right Holder(s):

The Department of Water Resources (the Department) has issued the enclosed license confirming that a water right has been established in accordance with the permit referenced above. The license is a preliminary order issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department unless a party petitions for reconsideration or files an exception and/or brief as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the Department within fourteen (14) days of the service date of this order. The Department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3), Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the Department.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Department. The Department retains the right to review the preliminary order on its own motion.

ORAL ARGUMENT

If the Department grants a petition to review the preliminary order, the Department shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Department will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Department orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Department in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Department will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Department may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The Department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

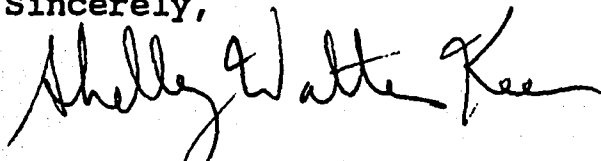

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

For your records I have also enclosed a copy of your Application for Amendment of Permit, which was approved.

Sincerely,

Shelley W. Keen
Water Rights Supervisor
