PROOF OF COMPLETION OF WORKS

Daniel M. Williams,
Samarla, Idaho.

Boise, Idaho, August 12, 1911.

Dear Sir:

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 7330.

This form should be filled out and mailed to the State Engineer at least 60 days before the date upon which it is to be submitted, which proof MUST be on or before November 20th, 1911.

Upon receipt of this blank properly filled out, notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a Notary Public or other officer authorized to administer oaths.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

A. E. ROBINSON
State Engineer.

Re: Permit #7330.

Daniel M. Williams,
Samarie, Idaho.

Sir:

Owing to the increased amount of work required of the water commissioners, it will be impossible for them to make the examinations in the matter of proof under the small water rights. It will, therefore, be necessary for you to have this work done by some one whom you know to be competent to make such examination and report. If you will send the name of such a party, instructions and blanks will be furnished him. A licensed surveyor is preferred where one can be conveniently obtained.

Very truly yours,

State Engineer.
