

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

Ident. No. 15 7129

To appropriate the public waters of the State of Idaho

1. Name of applicant D. Parry Jones AND/OR LURAE JONES Phone 766-4372
Post office address 71 S. Hayland Rd., MALAD, ID 83252
2. Source of water supply groundwater which is a tributary of N/A
3. Location of point of diversion is SW 1/4 of NW 1/4, Govt. Lot _____
Sec. 23 Township 15S Range 36E B.M. Oneida County; additional
points of diversion if any: _____
4. Water will be used for the following purposes:
Amount 5.6 for irrigation purposes from 4-1 to 11-1 (both dates inclusive)
(cfs or acre-feet per annum)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)
5. Total quantity to be appropriated is (a) 5.6 and/or (b) 100
cubic feet per second acre feet per annum
6. Proposed diverting works:
☒ a. Description of ditches, flumes, pumps, headgates, etc. Well, pump & sprinkler equipment

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
_____ to _____ inclusive.
c. Proposed well diameter is 12 inches; proposed depth of well is 350 feet.
d. Is ground water with a temperature of greater than 90°F being sought? _____
7. Time required for the completion of the works and application of the water to the proposed beneficial use is
2 years (minimum 1 year).

8. Description of proposed uses (if irrigation only, go to item 9):

- Hydropower; show total feet of head and proposed capacity in KW. _____
- Stockwatering; list number and kind of livestock. _____
- Municipal; show name of municipality. _____
- Domestic; show number of households. _____
- Other; describe fully. _____

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: *D* for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
15S	36E	22									40				40	40			120
15S	36E	23					40	40	40	40									160

Total number of acres to be irrigated 280

10. Describe any other water rights used for the same purposes as described above. _____

none

11. a. Who owns the property at the point of diversion? _____

Parry & Lu Rae Jones

b. Who owns the land to be irrigated or place of use? _____

" " " "

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing. _____

N/A

12. Remarks: _____

Proposed well Driller name is Duddy,
of Pocatello, ID.

13. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

W. Paul Jones
(Applicant)

Received by QW Date 5-29-91 Time 12:15 Preliminary check by _____

Publication prepared by RB Date 6-20-91 Published in Idaho Enterprise
Publication approved RB Date 7-16-91

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19____.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

RE: Application No. 15-7129

Dear Water Right Applicant:

The Department of Water Resources acknowledges receipt of your water right permit. This office is currently in the process of advertising the application in Idaho Enterprise on June 20 & 27, 1991. The advertisement will be published for two consecutive weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If the application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

If the application is not protested, it will be forwarded to our state office in about five weeks. State office personnel will conduct a complete review prior to final processing of the application and will notify you of the outcome of this review. When a permit is issued, you will be sent a copy. A typical processing time for an unprotested application is about eight weeks.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely,

Harold Jones
HAROLD W. JONES
Water Rights Supervisor

MALAD, ID 83252

DEAR MR. JONES:

WE ARE CURRENTLY PROCESSING YOUR APPLICATION 15-07129 FOR A WATER RIGHT. FOR ANY APPLICATION OR PERMIT WHICH EXCEEDS 200 ACRES OR 5.00 CFS THE INFORMATION ON THE ATTACHED SHEETS ARE REQUIRED BEFORE ANY FURTHER PROCESSING CAN TAKE PLACE. PLEASE TRY TO ANSWER THE HIGHLIGHTED QUESTIONS TO THE BEST OF YOUR ABILITY. IF YOU NEED ADDITIONAL CLARIFICATION PLEASE GIVE ME A CALL AT 525-7161. IF YOU ARE NO LONGER INTERESTED IN DEVELOPING THIS PERMIT PLEASE ADVISE ME.

I WILL NEED YOU TO RESPOND WITHIN 30 DAYS WITH THE INFORMATION REQUIRED.

SINCERELY,

HAROLD W. JONES
WATER RESOURCE SUPERVISOR

GUIDELINE FOR SUBMITTING ADDITIONAL INFORMATION

This outline is intended to assist you with providing the additional information required under Rule 4,5,3. and may help answer questions as to the type of information you should submit.

The outline below follows the same order as the attached rules. Please take the time to review the outline. Much of the information requested under Rule 4,5,3. may already be available to you. Gathering the necessary information may be of benefit to you in planning the proposed development.

Rule 4,5,3,1. Information relative to effects on existing rights:

1. If diverting from a surface water source with 5 or fewer existing users, submit the water right numbers held by those users if available. If not available, submit the names and addresses of those users and describe the location of their diversions and types of use associated with those diversions.

2. If you are diverting from a groundwater source, submit a map locating your proposed well and all other wells within a 1/2 mile radius of your well. It would be helpful to describe the use from those wells (i.e.; domestic, irrigation etc.). You are not required to submit a map if there are no wells within the 1/2 mile radius, but you should indicate if there are no existing wells within that radius, if that indeed is the case.

3. This rule seeks general information about the type of irrigation system you intend to install and how the project may affect other users. Describe the type of irrigation system you plan to complete and submit any information about possible affects on other users. If you feel your proposed project will not affect other users, then explain why. You may describe any techniques or equipment you intend to employ which may reduce impacts on other water rights or promote water conservation.

Rule 4,5,3,2. Information relative to sufficiency of water supply:

1. Provide projections for your peak and average water demands. While your well or diversion may not yet be completed, you should be able to estimate project demand based on size of project (or number of acres irrigated), type or texture of local soils, type of crops grown, and type of irrigation system used. Demand projections should be given in terms of flow rate (cfs or gpm) and annual volume diverted (acre-feet).

Example: A 40 acre tract with 6 hand lines and 20 heads/line discharging 3 gpm/head would produce a total flow rate of about 360 gpm or 0.8 cfs (1 in/acre). This flow rate multiplied by average number of hours per set, sets per irrigation and irrigations per year provides number of acre-feet per year or

annual volume.

2. You should be able to provide some basic information about the nature of the water supply. If the diversion is from a surface water source for example, you should provide stream flow data or estimate the amount of stream flow available for diversion and describe generally the seasonal availability of water. If you are diverting from a groundwater source, you should be able to generally describe the aquifer which you plan to divert from, i.e.; deep confined or shallow unconfined aquifer, depth to water level or depth to aquifer, known yields from wells within the same aquifer etc.

Rule 4,5,3,3. Information relative to good faith, delay, or speculative purposes of the applicant:

1. If you do not own the land to be irrigated and/or where the point of diversion is located, you must submit copies of lease agreements, easements or rights-of-way etc. If you are the owner of the place of use and point of diversion, documentation of ownership is not required.

2. If applicable, submit copies of applications for permits or approvals which are needed from other government agencies or individuals in order to complete the water development project.

Rule 4,5,3,4. Information relative to financial resources:

1. and 2. Submit a current financial statement or other statement describing how you will finance the project. You must also submit basic estimates of construction and equipment costs of the proposed project.

Rule 4,5,3,5. Information relative to conflict with the local public interest:

1. You, as the applicant, bear the initial burden of coming forward with evidence as to whether your proposed project may have any affect concerning local public interest. If you have any reason to believe that the proposed project under your application may be of concern to any local individuals, governments, tribal reservations, irrigation districts, the State Fish and Game Department, or Health and Welfare Department, then you are responsible for seeking comments from those individuals or groups. This requirement is mandatory for projects located within irrigation districts, canal companies or tribal reservations (failure to obtain comments from the irrigation district, canal company or reservation will delay approval of the application). All comments must be submitted to the Department of Water Resources.

Harold W. Jones
Water Resource Supervisor
Department of Water Resources
150 Shoup Ave., Suite 15
Idaho Falls, ID 83402

Dear Mr. Jones:

Enclosed is the information you requested in your letter dated July 24, 1991.

Rule 4, 5, 3, 1.

2. See attached map. The map is marked x with circle, two existing irrigation wells.
3. This will be a closed under ground system in plastic pipe. $\frac{1}{4}$ mile wheellines to sprinkle water. This project should not affect any other users. By sprinkling we should be able to conserve water over an open ditch system.

Rule 4,5,3,2.

1. 280 acres to be irrigated. It is a clay loam type soil under wheelline sprinkler system, which we will *acre feet pumped* grow grain and hay. There will be 1090 ~~which would~~ *be 700 acre feet over the year.* ~~Consumption use~~ *245*
2. Underground water supply is approximately 300 feet and 900 gallon per minute.

Page 2 Response

Rule 4, 5, 3, 4.

2. Approximately \$18,000 for cost to be self financed.

If you have any questions concerning this, please contact me at
766-4372.

Sincerely,

DP Jones

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 15-07129

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Be sure to note the special condition requiring you to install a measuring device. Enclosed, for your reference, is a list of measuring device options.

Section 42-235, Idaho Code, requires that a "drilling permit" must be obtained from the department for all wells constructed after July 1, 1987. A drilling permit is a separate permit that must be issued in addition to your permit to appropriate water. Commencement of well construction or diversion of water under your permit to appropriate water is prohibited unless a drilling permit is obtained.

Sincerely,

PAMELA SKAGGS
Technical Records Specialist

RE: PERMIT NO. 15-07129 PROOF DUE NOTICE

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before September 1, 1993. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Karen L. Gustafson
Secretary/Records Manager

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 15-07129

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

I note that the permit issued to you by the department requires the installation of a flow measurement port to allow the department to determine the rate of diversion. The proof which you submitted does not show that you have installed this equipment.

The installation of the flow measurement port must be complete by the time the department representative conducts the examination of your system unless the department has rescinded the requirement prior to the field examination. In some cases, the equipment requirement can be rescinded because the equipment cannot be physically installed, is not appropriate or can be accommodated with other measuring methods.

If you have questions concerning this matter, please feel free to contact the EASTERN Regional Office in Idaho Falls at (208)525-7161.

Sincerely,

Karen L. Gustafson
Secretary/Records Manager
