Dear Mr. Anderson:

Enclosed is a claim to a water right and check #92-86 for \$30.00 that were received by this office, an application for permit with instructions and an example rough draft of an application.

A priority date of May 1, 1976 is not an acceptable date to file a claim to a water right. To file, an application for permit must be submitted.

From the information submitted, on claim, a rough draft of an application was made. To complete the application, several items must be furnished.

The source of water must include what the springs would be tributary to, item #2. The period of irrigation (item 4) for the area that you are filing in is from April 1 to November 1; however, you may wish to file for a period of less time as you have done. Also, domestic is defined as water for household use including irrigation of up to one-half (1/2) acre of land in connection with said household; therefore, you should file for stockwater. The maximum amount for 150 head range cattle is 0.05 cfs.

The diverting works description (item 6c) should be completed in a similar manner, as done in the example on the rough draft. The time required for the completion of works and application of water to the proposed beneficial use (item #7) must be 1, 2, 3, 4 or 5 years.

The place of use of water not used for irrigation (ie stockwater) must be completed in item 8a and a description of water rights used for the same purposes should be listed in 8c.

Item 9a & b referring to ownership of point of diversion and place of use must be given and item 9c must be completed if 9a or b is someone other than the applicants.

Upon receipt of the completed application for permit and filing fee of \$45.00, processing will begin.
