ATTENTION: Mr. S. L. Cuskelly

Gentlemen:

Further review of your Application No. 17-7016 shows that the point of diversion listed in Item 3a - NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 29, Twp. 15S, Rge. 33E, B.M., Oneida County does not agree with the location of the point of diversion on the map submitted with the application. The map shows the location as being in the SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 29, Twp. 15S, Rge. 33E, B.M.

We have enclosed a copy of the first page of the application, and also a copy of the map to allow you to indicate the exact location of the point of diversion. Please supply us with the correct location of the point of diversion so we may complete the processing of your application.

If you have any questions, or if we may be of any assistance, please do not hesitate to contact this office.

Dear Mr. Beitia:

After our telephone conversation Monday morning, I discovered your Application No. 17-7016 in the Caribou National Grassland area had not been advertised. Therefore, we can change the location of the point of diversion without an amendment. I have enclosed a copy of your application as a guide for you to supply us with the following information:

1. Item 3a - Give the location of the new point of diversion.
2. Item 5a - Indicate the rate of flow from the pump.
3. In Item 6b, it is indicated that the dam had once been breached. Give a description of how repairs were made on the dam - Was the new section keyed into the old section and compacted under the supervision of an engineer? Is the pond side of the dam protected by riprap?

If you will supply us with the above requested information for Item 6b by typing it on a separate sheet of paper entitled "10. Remarks", we will attach it to the original application and make the necessary corrections and additions on the original application.

Please complete and forward by return mail so we may advertise the application and allow you to hold your present priority.

Dear Mr. Johnson:

The new location of the point of diversion for the well site on the Curlew National Grasslands is the SE $\frac{1}{4}$, NE $\frac{1}{4}$ of Section 18, T. 15 S., R. 33 E. The rate of flow from the pump will be three (3) cubic feet per second. If the new well site needs a name it should be called the Sweetan Pond Well.

A copy of the revised application noting the changes is attached. Please make the necessary corrections and additions on the original application and process it for advertisement.

If you need more information call Ranger Wendell Johnson in Malad or Frank G. Beitia at 232-1142 in Pocatello. Thank you for your help and guidance.

Dear Mr. Johnson:

We have revised the Application for Permit, as you requested by phone from Frank Beitia.

Item 8, b. shows acreage by portions of 40-acre tracts that will be irrigated. The total acreage increased from 120 to 368 to accommodate extensive irrigation adjacent to Sweetan Pond. The 368 acres are on the high side, but if the well provides enough water, we will try to sprinkle or flood irrigate the land.

Item 11, the map, has been revised to show the proposed irrigated lands, pipelines, well site, storage reservoir, and Sweetan Pond.

If the application meets with your approval, please publish it in the necessary newspapers. We will contact you before any work is done on rebuilding the Sweetan Pond Dam.

Mr. S. L. Cuskelly
Acting Regional Forester
United States of America,
Forest Service
324 - 25th Street
Ogden, UT 84401

Dear Mr. Cuskelly:

Due to the changes it was necessary to make on your application, we have taken the liberty of retyping it and are enclosing it with this letter for your review and signature.

We direct your attention to Item 4--amount, purposes and season for which the water will be used. We have converted the measurement of water from acre feet to cubic feet per second. This is to your benefit, as it will enable you to better utilize the water. Please be advised that the total amount of water in Item 4 (amount for each purpose totaled up) will not necessarily be the total quantity to be appropriated, Item 5.

Also, we have reduced your priority date to the date we received the Purchase Order from the Forest Service. We will delay advertising until we have received the signed retyped copy from you.

If you have any questions, please do not hesitate to contact this office.

Very truly yours,

NORMAN C. YOUNG

Gentlemen:

One of the conditions of approval of your water Permit No. 17-7016 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before September 1, 1977. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this Department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the Department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the Department, but you must within sixty (60) days of the date of this letter return to the Department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the Department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the Department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing of certified water right examiners will be available from this Department when examiners have been certified.

If your permitted use, in fact, has already been examined by the Department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the Department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

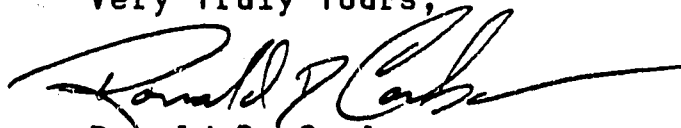

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following Department office:

D. FLOW MEASUREMENTS

☐ Additional Data Sheets Attached

1.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
Flow meter		Melrometer		76-8-2131	0-2500 gpm	

2. Measurements:

main line o.d. = 9"
 Melrometer reading was fluctuating between 850-1000 gpm.
 therefore I recommend taking the average of 925 gpm.
 for licensing purposes

E. FLOW CALCULATIONS

☐ Additional Computation Sheets Attached

1. Measured Method:

$$Q = \frac{925 \text{ gpm}}{1 \text{ min}} \left(\frac{1 \text{ min}}{143.8 \text{ gpm}} \right) \left(\frac{\text{ft}^3}{\text{sec.}} \right) = 2.06 \text{ C.F.S.}$$

2. Alternate Method for Checking Purposes:

$$\text{Theoretical } Q = \frac{(50)(3.814)(.70)}{45 + (0 \times 2.308)} = 6.86 \text{ C.F.S.}$$

F. PUMP EFFICIENCY DATA (Optional)

Discharge Pressure: _____ psi x 2.31 = _____ ft (1); Dynamic pumping level: 45 ft (2)
 Total Head: (1) + (2) = _____ (3); Flow rate: _____ cfs (4)

Panel Input HP: (6) x 1.34 = _____ (7) Efficiency: (5)/(7) x 100 = _____ %

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = (2)(3.5) = 7 \text{ afa}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (2.06)(214)(1.9835) = 734.33$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 7 \text{ afa}$$

2. Volume Calculations for Other Uses:

Total pond acreage = 32 ac.

average pond depth = 2.5 ft

$$\text{Storage} = (32 \text{ ac.}) \times (2.5 \text{ ft}) = 80 \text{ ac. ft}$$

1. Recommended Amounts

Beneficial Use	Period of Use		Rate of Diversion Q (cfs)	Annual Volume V (afa)
