If a lease contract cannot be reduced sufficient to reflect the legal definition of a water right as amended through a water right split and/or water right transfer, the Board may release the water right from the Water Supply Bank.
6. **ASSIGNMENT OF CONTRACT:** This lease is between the Board and the Lessor, who is the recognized owner or designated representative of the recognized owners of water rights described herein. Should ownership of any part of a water right herein described change during the term of this lease, either through a water right split, a water right transfer, sale of property to which the water right is appurtenant, or through any other recognized water right reassignment, the lease benefits and obligations to the conditions of acceptance for any such water rights will be assigned to the new owners.
7. **DUPLICATE ORIGINAL:** This Lease is executed in duplicate. Each of the documents with an original signature of each party shall be an original.

MEMORANDUM FOR WSB LEASE APPLICATION # 3042

To: Water Right No(s). 37-656

From: Skyler Cheever, Water Resource Agent, Sr

Date: 11/7/2024

Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 3042 was sent in by Kyria Wolfe and received by the Department on September 12th, 2024, with the correct fee payment received the same date. The applicant proposes to lease the entirety of water right 37-656 into the water supply bank from 2025-2029. The WR point of diversion is within the Snake River Basin and Big Wood River Moratorium Area, Big Wood River Groundwater Management Area, and Trust Water Area. This application is intended as a renewal of lease contract 1080 which expires on December 31st, 2024.

AUTHORITY TO FILE:

Kyria Wolfe signed the application. Ms. Wolfe has the authority to file because she is an owner of water right 37-656 along with Brandan Wolfe according to Department records. Attachment 1A included with the application delineates Ms. Wolfe as the designated applicant between the two current owners.

WATER RIGHT VALIDITY:

Water right 37-656 was decreed under the SRBA in 2010. The water right was leased into the WSB in 2015 until December 31st, 2024. This indicates only 4 possible years of nonuse likely occurred. Therefore, there is enough information available to the bank to conclude water right 37-656 is likely not lost to forfeiture and can be leased into the WSB.

INJURY TO OTHER WATER RIGHTS:

There are no injury concerns leasing this water right into the WSB. Any injury concerns would be addressed during the review of any rental applications against the lease.

ENLARGEMENT OF USE:

The applicants propose to lease the entirety of water right into the WSB. The water right is not combined limited with any other WR's. The applicant indicated the property is dry land farmed. There could be enlargement concerns if the leased POU is farmed and the WR is rented. The possible concerns were not considered in past lease reviews according to Department Records. Any enlargement concerns should be considered during the review of any rental application. According to Department records the WR has not been rented. Additionally, to prevent enlargement a condition will be added to the contract limiting the WR to the standard diversion rate/acre and volume/acre in the area. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:
