TO: Idaho Department of Water Resources

I was contacted by Bret Yearsley of Swan Lake, Idaho, to quantify and verify the amount of water stored in the three reservoirs known as the Oxford Reservoirs. They are located on the Bannock County - Franklin County line (see attached map). The inlet and outflows to and from the reservoirs have never been measured, so there is no history as far as measuring water in these reservoirs.

I have 35 years of experience in measuring water, 25 years as manager of Falls Irrigation District in American Falls, Idaho, and 10 years as their Secretary/Treasurer. I currently serve as the Secretary/Treasurer for the Falls Irrigation District. Also, I am the Education Committee Chairman for the Idaho Water Users Association and conduct their education classes on water measurement each February. I also worked seven years for the University of Idaho as Extension Educator in Power County working with water entities.

There are three reservoirs and I have listed and labeled them as follows (see maps):

Reservoir 1 – 43.2 surface acres – 346 acre feet

Reservoir 2 – 23.9 surface acres – 179 acre feet

Reservoir 3 – 16.6 surface acres – 83 acre feet

Total acre feet - 608 acre feet for the three reservoirs

I am familiar with the three reservoirs and feel confident with these amounts. If you have any questions, feel free to contact me at (208) 681-2062.

Sincerely,

Terrell O. Sorensen
