Water Right Declaration

IDWR/Preston

Water Right #11-4116

To Whom It May Concern:

This claim is in reference to Parcel #12S44E0700000

After purchased this property in 1996, I was shown by the seller, Glen Smith all the sources of water that came with the purchase of the property. Water has been utilized in irrigation of crops throughout each year from April 15th to October 15th from the date of purchase July 15 1997 to the present time. Glen Smith was the previous owner and I know he irrigated this property for decades. He submitted a claim to water going back to 1895 based on a Posted Notice which was recorded in Book No. 2, Miscellaneous Record page 136, Records of Bear Lake County. This information is included in the claim.

70 acres of my property are irrigated each year from 5 points of diversion. 3 of these points are located on Section 8 (see map). Those points on section 8 are free flowing springs that run onto my property through open ditches and piping where water is then collected and dispersed throughout the property and then utilized to water hay, grass, grain and livestock which is my main source of income for the property. The other two points of diversion lie on my property and are free flowing springs which I combine and water crops and also supply water to my home. Water is moved and rotated on a weekly basis depending of the needs for the crops and livestock. The house water runs off a spring on the Northeast corner of the home (see map). The 70 acres is irrigated with 2 CFS of water. I verify this true and correct.
