6.a.

This water right transfer has two purposes: (1) clean up the existing water right points of diversion (PODs) by removing the point of injection and correcting legal descriptions; and (2) add two new PODs to their water rights. The proposed points of diversion are as follows: Lot 4 Sec 6 T05N R43E (Canyon Creek Canal), NWSE (P Stevens Pump) and SWSE (Creek pump near exchange well) Sec 13 T06N R42E, Lot 2 SWNW Sec 19 T06N R43E (G Crapo Pump), SENE Sec 30 Sec 30 T07N R42E (Canyon Creek Lateral Pumps), NWSE Sec 23 T07N R42E (V Schwendiman Pump) (new), and SWNW Sec 21 T07N R42E (RB Ricks Pump) (new).

Shareholders of the Canyon Creek Canal Company ("CCCC") intend to utilize the two new PODs located on the Teton River in lieu of diverting water allocated to their CCCC shares through the Canyon Creek Canal (located on Canyon Creek, a tributary to the Teton River), at least in most years. CCCC already has an authorized POD on the Teton River that diverts water under its Canyon Creek water rights (Canyon Creek Lateral Pumps). The changes sought in this transfer will improve irrigation water reliability and deliverability, as well as improve instream habitat in Canyon Creek for fish and wildlife. There will be no change to the way the other CCCC PODs have historically been utilized and operated.

CCCCC is currently coordinating with WD01 to install a telemetry gage on Canyon Creek to measure the quantity of water actually available in Canyon Creek throughout the irrigation season. Prior to each irrigation season, IDWR will be notified by CCCC as to what portion of the CCCC water rights will be diverted at each of the authorized PODs. Generally, diversion at each POD will correspond to that portion of the CCCC water rights allocated to the shareholder's proportionate interest in CCCC, and may further include such shareholder's individual allocation of Fremont-Madison Irrigation District storage water. Together, these actions will allow for accurate annual accounting of water diversions.

Each POD is currently in compliance with IDWR's headgate/pump station requirements, allowing for the measurement of water and locking of controlling works.
