Good morning Robert,

As this claim is for a previously established water right license, no. 96-9317, the elements of the claim should also match that of the license. This includes the number of homes served (8). The additional parcel that you added to your distribution system (Lot 6A) is covered under a different water right, presently in the permitting stage. Water right permit no. 96-9717 was issued for that parcel (RP0237100006A0A) and does not need to be claimed in the adjudication as Proof of Beneficial Use has yet to be submitted. Proof of Beneficial Use for this permit is due by November 1, 2023.

All documents and information relating to water rights can be found using our Water Right Search tool on the website,

<https://research.idwr.idaho.gov/apps/waterrights/wrajsearch/wradjsearch.aspx>. If you need assistance using that search, feel free to give me a call and I'd be happy to walk you through it.

Hi Evan,

Thanks again for your patience and your help Wednesday. After opening the Notice of Claim for Jo's South Shore, Item 8. Indicates domestic use for 8 homes. This was the original design for the property, but a home was built on the utility lot and hooked up to the system. This required us to establish another lot, (Lot 9) and another water right for that lot. This puts us at 9 potential homes that could be built and using the water. It is the same owner for Lot 6 & 9.

Also, how do I search for this Water Right No. 96-9317 on the website? I know it's probably simple, I seem to be complicating the process some how,.

Regards,
