ACTION OF THE DEPARTMENT OF WATER RESOURCES

The Idaho Department of Water Resources hereby approves the above Application for Amendment for Permit No. 22-7648 with the following:

Conditions of Approval

1. Rights 22-7648, 22-14216, 22-14217, 22-14218, 22-14219, 22-14220, 22-14221, 22-14222 and 22-14223 when combined shall not exceed a total diversion rate of 8.36 cfs, a total annual maximum diversion volume of 2880.0 af at the field headgate, and the irrigation of 823.0 acres.
2. To mitigate for the depletion of water resulting from the use of water under this right and to prevent injury to senior water right holders, the right holder shall cease diverting and using water as authorized by the following water rights for the purposes and amounts specified below. Moreover, the official record for the following water right will be changed to show that diversion and use of water is not authorized because the rights, or portion thereof, are being dedicated to mitigation by non-use. The mitigating right may also include a condition stating that the mitigation by non-use is for the benefit of this right.

Right No	Use Changed to Mitigation by Non-Use	Mitigation Rate(cfs)	Mitigation Volume (AF)	Mitigation Acres
22-13019	Irrigation	2.97	595	170

The land that will no longer be irrigated under this right is located within the E 1/2, Section 19, Township 07N, Range 42E, B.M.

If the specified mitigation right, or portion thereof, is sold, transferred, leased, used on any place of use, or is not deliverable due to a shortage of water or a priority call, then the amount of water authorized for diversion under this right approval shall be reduced by the same proportion as the reduction to the mitigation rights.

3. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 100.
4. A lockable device subject to the approval of the Department shall be maintained on the diverting works in a manner that will provide the watermaster suitable control of the diversion.
5. Prior to the diversion and use of water under Permit 22-7648, the right holder shall install and maintain acceptable measuring device(s) at the authorized point(s) of diversion in accordance with Department specifications, or shall obtain an approved variance from the Department to determine the amount of water diverted from power records or to maintain an existing measuring device.
6. Upon specific notification of the Department, the right holder shall install and maintain data loggers to record water usage information at the authorized point(s) of diversion in accordance with Department specifications.

Application for Amendment
(For Licensing Purposes)
Water Right No. 22-7648

7. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
8. Place of use does not include federal public lands.
9. This right does not grant any right-of-way or easement across the land of another.

This amendment is issued pursuant to the provisions of Idaho Code § 42-211.

Signed this 29th day of August, 2024.
