in the SENE.

Developed spring that is ditched to a common point with the other springs. From there, water is either injected into the creek or diverted through a ditch system which then injects into the creek in the SENE.

Water is delivered through a short ditch that injects water into the creek where it is rediverted downstream.

This is the second point where water is injected into the creek from a developed ditch system. Water is rediverted downstream.

Water is diverted out of the creek by a ditch and dam system. From there, water is delivered through a ditch to the property where it is then flood irrigated.

6. Water is used for the following purposes:

10. Do you own the property listed above as place of use? Yes

If your answer is no, describe in remarks below the authority you have to claim this water right.

11. Other Water Rights Used:
13-2082, 13-2098

12. Remarks:

Priority Date Explanation:

This is the date that was decreed and the use continues since. This water right along with 13-2082 and 13-2098 are from the same developed springs and go through the same delivery system. The original water right decreed described a single spring supplying the irrigation use. Today, all 3 of the springs are ditched to a common point and share the same distribution system. To the best of my knowledge, this is how the system has been operating for a long time before I've owned the property. Because of this shared system, these claims all are describing the same point of diversions and system and administered together. This water right is for 20 acres according to the previous decree.

SEE SUPPLEMENTAL DECREE DATED 10/22/1923.
