Good afternoon Mr. Mayhew,

We received the Notice of Claim to a Water Right you submitted for existing water right license no. 96-9037, but it will be some time before that claim is recommended to the Court. The adjudication process is a long one, and as your claimed water use is located within Administrative Basin 96, it may not be submitted to the Court for several more years. Once the claim has been recommended to the Court, there will be an objection and response period followed by a hearing on uncontested water right claims. After that hearing, the Court will begin issuing its decrees for all the uncontested water right claims. Once decreed by the Court, the ownership of those water right will reflect that of the decree. It is important to keep your contact information current with us to ensure that you receive all the associated mailings throughout this process.

As your claim is based upon an existing water right license (96-9037), if you would like to transfer ownership of that water right to your name prior to the issuance of the Court's decree, you may do so through the submission of a Notice of Change in Water Right Ownership. For your convenience, I have attached that form along with instructions.

Please feel free to contact our office if you have any additional questions or concerns.

Best Regards,

Evan

Hello,

It has been years since I applied to have water rights transferred to me from the previous owner. I knew there was some adjudication but it has been years! So, the claim number is: 96-09037. Can I get an update on this please?

Regards,

Mark Mayhew
