5. Description of diverting works:

Water is collected through a perforated pipe system. Currently, the water supplies a 500 gallon concrete box near the springs. This box supplies 2, 1,000 gallon storage tanks, where water is then diverted through a 4 inch pipe system to the properties for domestic and stockwater use. This legal description is the same as is described on the original water right license. Sometime in the past, the legal description was incorrectly placed in the SWNE and this claim is correcting that error.

6. Water is used for the following purposes:

Purpose	From	To	C.F.S.	(or)	A.F.A
DOMESTIC	01/01	12/31	0.1

12. Remarks:

Priority Date Explanation:

This is the date that was licensed and the use has continued since. At the time of claims taking, the spring supplies 8 homes, multiple barns, and multiple stock troughs for our users.

13-4277 is a statutory claim filed by my father in the past for .30 cfs. To the best of my knowledge,

this spring today does not supply that much water, and instead supplies a quantity that is closer to the .10 cfs described on this water right. Because of this, we are not filing a claim for 13-4277.
