Hi Mackenzie,

2022 was the first year of a long-term agreement between Big Sands and Egin Bench Canals to use surface water. They had rented some surface water from another shareholder for a few years prior to that on an annual basis. I believe this started in either 2019 or 2020 if my memory serves me correctly. Prior to that I'm a bit unsure of the history except I have been told portions of that farm were left fallow at times.

Thanks,

Aaron

Subject: Water Supply Bank Lease-Rental - WR 21-13255

Good morning,

I am reviewing two Water Supply Bank rental applications which requested to rent right 21-13255 owned by Big Sands LLC. While going over the lease review, I became concerned with the historic diversions of this right in relation to how much we should allow to be rented out. Three rights are diverted from the same pod (well tag #A0006123): 21-7376, 21-13212, and 21-13255 (see licensed values for each WR in table below). The WMIS data suggests that not all three water rights have been fully diverted in recent history. Right 21-13255 is being leased to the Bank because the owner now has an agreement with Egin Bench Canals to use surface water for the POU (07N39E02 NESW & SESW). Do either of you have information regarding which of these rights have been diverting groundwater versus utilizing surface water/shares? I want to ensure that renting this right will not cause enlargement.

Water Right	Rate (cfs)	Acres (ac)	Volume (af)
21-7376	1.69	93.5	327.2
21-13212	0.59	32.5	113.8
21-13255	0.61	34.0	119.0
SUM (Additive, no combined limits)	2.89	160.0	560.0

I am including a snip of the WMIS data for this well below. Please let me know if you have any information or if there are any clarifications I can provide.

Thank you,

Mackenzie Kienholz
