RE: License No. 29-14301

ISSUANCE OF LICENSE

Dear Water Right Holder:

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 497-3784.

Sincerely,

James Cefalo
Eastern Regional Manager

G. NARRATIVE/REMARKS/COMMENTS

I performed a licensing field exam for water right number 29-14301 on October 5, 2022, to verify the place of use (POU) and point of diversion (POD) locations and to verify beneficial use has taken place. The location of the POD and POU are in the SENW, Section 24, T11S, R36E.

The POD is a hole that was excavated to collect groundwater. The water is then conveyed to a water trough by way of a ¾ inch pipe. The hole is approximately 5 feet deep, 4 feet wide, and 6 feet long.

The POU is a single water trough that is located approximately 60 feet to the west of the POD. A second water trough was not located in the NWNW QQ. I called Tejay Barnes, and he verified that only one trough was installed and is supplied by the POD.
