CONDITIONS OF APPROVAL

1. Rights 35-7973 and 35-14240 when combined shall not exceed a total diversion rate of 4.81 cfs.
2. Rights 35-7973, 35-14240, and 35-14654 when combined shall not exceed a total diversion rate of 5.39 cfs.
3. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 120.
4. Prior to diversion of water under this right, the right holder shall install and maintain a flow meter measuring device and lockable controlling works of a type acceptable to the Department as part of the diverting works.
5. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
6. This right is for the use of trust water, and it is subject to review 5 years after the date of permit approval to re-evaluate the availability of trust water for the authorized use and to re-evaluate the public interest criteria for reallocating trust water.

Transfer No. 83782

WATER RIGHT NO. 35-14240
As Modified by Transfer No. 83782

CONDITIONS OF APPROVAL

7. Administration of this right to satisfy the minimum stream flow water rights in the Snake River at Murphy Gage shall not be required because use of water pursuant to this right is either non-consumptive or the right holder is required to provide ongoing mitigation to offset the depletion of water resulting from the use of this right.
8. To mitigate for the depletion of water resulting from the use of water under water rights 35-14240, 35-14241, 35-14242, 35-14243, and 35-14655 and to prevent injury to senior water right holders, the right holder shall cease diverting and using water as authorized by the following water rights for the purposes and amounts specified below. Moreover, the official records for the following water rights will be changed to show that diversion and use of water is not authorized because the rights, or a portion thereof, are being dedicated to mitigation purposes.

Right No.	Use Changed to Mitigation	Mitigation Rate (cfs)	Mitigation Volume (AF)	Mitigation Acres
29-2284 (previously 35-14014)	Industrial	4.44	3215.5	N/A
29-2301 (previously 35-14015)	Industrial	3.95	2858.3	N/A
Combined Limit:			6073.8	

If the specified mitigation rights, or portion thereof, are sold, transferred, leased, used on any place of use, or are not deliverable due to a shortage of water, a priority call, or a termination in lease contract then the amount of water authorized for diversion under this right approval shall be reduced by the same proportion as the reduction to the mitigation rights.

9. In the event the right holder does not maintain the right to use water rights 29-2284 and 29-2301 for mitigation purposes, the right holder may propose a substitute mitigation plan. The substitute plan must be provided to the Department no later than December 1st in the year immediately prior to the irrigation season where the substitute plan is proposed to be implemented. The Department will advertise the substitute plan to the public and the protestants shall have the right to challenge the substitute plan. If the substitute plan is not approved by the Department, the right holder shall not divert under this right.
10. By December 1st of each year, the right holder shall provide a written report to the Department describing the number and location of acres irrigated that year, the volume of water diverted under this right, the source of mitigation for the next irrigation season, and the number and location of acres proposed to be irrigated in the following year.
11. As resources allow, the Department will conduct at least one in-person field examination of the authorized place of use of this right each year to verify the required mitigation and authorized irrigation under this right prior to June 15th of each year. It shall be the responsibility of the right holder to follow up with the Department by June 15th of each year to determine if the field examination was performed. If the Department is unable to conduct the field examination for any reason, the right holder or its consultant shall perform the field examination and report findings from the field examination to the Department and the protestants to this right by July 15th of each year.
12. The diversion and use of water described in this right may be subject to additional conditions and limitations agreed to by the protestant and the right holder under a separate agreement to which the Department is not a party. Because the Department is not a party, the Department is not responsible for enforcement of any aspect of the agreement not specifically addressed in other conditions herein.

WATER RIGHT NO. 35-14240

As Modified by Transfer No. 83782

CONDITIONS OF APPROVAL

13. Noncompliance with any condition of this right, including the requirement for mitigation, is cause for the director to issue a notice of violation, cancel or revoke the right, or, if the right is included in a water district, request that the watermaster curtail diversion and use of water.

If the specified mitigation rights, or portion thereof, are sold, transferred, leased, used on any place of use, or are not deliverable due to a shortage of water, a priority call, or a termination in lease contract then the amount of water authorized for diversion under this right approval shall be reduced by the same proportion as the reduction to the mitigation rights.

8. By December 1st of each year, the right holder shall provide a written report to the Department describing the number and location of acres irrigated that year, the volume of water diverted under this right, the source of mitigation for the next irrigation season, and the number and location of acres proposed to be irrigated in the following year.
9. As resources allow, the Department will conduct at least one in-person field examination of the authorized place of use of this right each year to verify the required mitigation and authorized irrigation under this right prior to June 15th of each year. Dear Water Right Holder(s):

The Department of Water Resources (Department) acknowledges the receipt of correspondence changing ownership of the above referenced water right(s) to you. The Department has modified its records and has enclosed a computer-generated report for you.

Updating the ownership record for a water right does not reconfirm the validity of the right. When processing a Notice of Change in Water Right Ownership, the Department does not review the history of water use to determine if the right has been forfeited or deliberately abandoned through five years or more of non-use. To read more about water right forfeiture, including how to protect a water right from forfeiture, please see Idaho Code §§ 42-222 and 42-223.

Please note, water right owners are required to report any change of water right ownership and any change of mailing address to the Department within 120 days of the change. Reporting forms are available from any office of the Department, or from the Department's website.

If you have any questions regarding this matter, please contact me at (208)287-4921 or email me at Sidney.palmer@idwr.idaho.gov.

Sincerely,

Sidney Palmer
