Conditions of Approval

1. This right authorizes a total annual storage volume of 0.1 acre-feet to be used for the initial filling of one of the two reservoirs described by this right in a single calendar year. The storage of water is authorized through February 1st and stored water must be released and the reservoir returned to the natural stream flow condition by February 2nd. The release of the stored water shall be done in a manner that does not cause damage to downstream property owners.
2. The two (2) reservoirs established by the storage of water under this right shall not exceed a total surface area of 0.1 acre.
3. The right holder shall maintain an impermeable liner in the embankment portion along the west side (right side when looking downstream) of the reservoirs to eliminate seepage losses.

State of Idaho
Department of Water Resources
Water Right License
Water Right No. 36-17133

4. To mitigate for the depletion of water resulting from the use of water under this right and to prevent injury to senior water right holders, the right holder shall cease diverting and using water as authorized by the following water rights for the purposes and amounts specified below. Moreover, the official record for the following water rights will be changed to show that diversion and use of water is not authorized because the rights, or portion thereof, are being dedicated to mitigation by non-use. The mitigating rights may also include a condition stating that the mitigation by non-use is for the benefit of this right.

Right No.	Use Changed to Mitigation by Non-Use	Mitigation Rate (cfs)	Mitigation Acres
36-66B	Irrigation	0.01	0.1
36-10169	Irrigation	0.01	0.1

The land that will no longer be irrigated under these rights is located within the NWNW, Section 14, Township 07S, Range 13E, B.M.

If a specified mitigation right, or portion thereof, is sold, transferred, leased, used on any place of use, or is not deliverable due to a shortage of water or a priority call, then the amount of water authorized for diversion under this right approval shall be reduced by the same proportion as the reduction to the mitigation rights.

In addition, the following condition will be changed on rights 36-66B, 36-10169, and 36-66A to reflect the mitigation by non-use amounts identified above:

Rights 36-66A, 36-66B, and 36-10169 when combined shall not exceed a total diversion rate of 0.84 cfs, and the irrigation of 28.8 acres.

5. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 36A.
6. This right is for the use of trust water, and it is subject to review 5 years after its initial approval (date of permit approval) to re-evaluate the availability of trust water for the authorized use and to re-evaluate the public interest criteria for reallocating trust water.
7. Use of water pursuant to this right is either nonconsumptive or the right holder is required to provide ongoing mitigation to offset the depletion of water resulting from the use of this right. Regulation of this right to satisfy the minimum stream flow water rights in the Snake River at Murphy Gage shall not be required.
8. The diversion and use of water described in this right may be subject to additional conditions and limitations agreed to by the protestant and the right holder under a separate agreement to which the Department is not a party. Because the Department is not a party, the Department is not responsible for enforcement of any aspect of the agreement not specifically addressed in other conditions herein. Enforcement of those portions of the agreement not specifically addressed in other conditions shall be the responsibility of the protestant and the water right holder.

State of Idaho
Department of Water Resources
Water Right License
Water Right No. 36-17133

This license is issued pursuant to the provisions of Idaho Code § 42-219. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed this 26th day of May, 2023.

RE: License No. 36-17133

ISSUANCE OF LICENSE

Dear Water Right Holder(s):

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 736-3033.

Sincerely,

Corey Skinner
Southern Regional Manager

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date

2. Measurements: None

E. FLOW CALCULATIONS

Measured Method: NA

Additional Computation Sheets
Attached

F. VOLUME CALCULATIONS

1. Volume Calculations for irrigation: There is no irrigation component to this water right.

2. Volume Calculations for Other Uses:

Storage: Storage under this water right is for the filling of two ponds for wildlife and aesthetic purposes. However, there is a condition that only one of the two ponds may be filled in a single calendar year. Based on aerial imagery, the size of each of the ponds is approximately 0.07 acres. Based on the high-water mark on the concrete diversion structure on the upper pond, it appears that the pond's max depth is approximately 1.5 ft. Therefore, the volume would be calculated as follows:

$$0.07 \text{ acres} * 1.5 \text{ ft} = 0.105 \text{ acre-ft}$$

I recommend that based on the above calculation that the volume remains at 0.1 AF.

G. NARRATIVE/REMARKS/COMMENTS

The licensing field exam for 36-17133 was conducted on May 18, 2023, with Corey Skinner (IDWR Southern Region Manager) and Corey King (IDWR). Flow rate measurements were not taken because beneficial use is for on-stream wildlife and Aesthetic storage. Based on observations during the field exam and aerial imagery, the volume should remain at 0.1 AF.

During the field exam it was noted that both ponds were developed as described on the permit, check structures for the points of diversion were constructed, and that at least one pond (the upper pond) had been filled.

One of the conditions states "*The storage of water is authorized through February 1st and stored water must be released and the reservoir returned to the natural stream flow condition by February 2nd.*" During the field exam (May 18) it was noted that the stored water had been released and was back to its natural stream flow condition.

Another condition states "*The right holder shall install and maintain an impermeable liner in the embankment portion along the west side (right side when looking downstream) of the reservoirs to eliminate seepage losses.*" Although there were no apparent signs of an impermeable layer on the upstream side, it was mentioned by the owner that the west embankment was sealed using bentonite clay. No seepage was observed passing through the west embankment during the field exam (see attached photo 3 for more info) indicating that this condition has been met.

Another condition states in part "*To mitigate for the depletion of water resulting from the use of water under this right... the right holder shall cease diverting and using water as authorized by the following water rights for the purposes and amounts specified...*" During the inspection it was noted that the portion of the ground identified as mitigation for this water right was drier than the rest of the field (see figure 1 and photo 4 for more information).

Have conditions of permit approval been met? ☒ Yes ☐ No

H. RECOMMENDATIONS**1. Recommended Amounts**

<u>Beneficial Use</u>	<u>Period of Use</u>	<u>Rate of Diversion</u>	<u>Annual Volume</u>
WILDLIFE STORAGE	10/31 to 02/01		0.1 AF
AESTHETIC STORAGE	10/31 to 02/01		0.1 AF

Totals:

0.1 AF

2. Recommended Amendments

PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 36-17133

Dear Permit Holder:

The Department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the Department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Idaho Code § 42-248, requires you or the owner of this water right to maintain current ownership and address records on file with the Department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any Department office or at the Department's website at www.idwr.idaho.gov.

If you have any questions concerning the field examination, please contact the Southern Region Office of the Department located in Twin Falls at (208) 736-3033.

Sincerely,

Debbi Judd
