☑ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b.**

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

Transfer Narrative

Proposed Place of Use

On the accompanying transfer application, applicants have committed 63 acres irrigation authorized under rights 36-2283 and 36-14617 to accommodate additional industrial use for a beef processing facility. They now wish to backfill those acres and also allow irrigation of an additional 45 acres within the current permissible place of use for 36-2283, 36-2386, 36-2608, 36-14617 and 36-16951.

The proposed ppu currently authorizes the following combined limits under water rights 36-2283, 36-2386, 36-2608, 36-14617 and 36-16951: 11.68 cfs and 2754.4 af for irrigation of 688.6 acres.

Transferring 63 acres to industrial use as proposed on the accompanying transfer application results in the following combined limits: 10.85 cfs and 2502.4 af for irrigation of 625.6 acres.

Transferring 108 acres as proposed under this transfer results in the following combined limits: 12.32 cfs and 2934.4 af for irrigation of 733.6 acres.

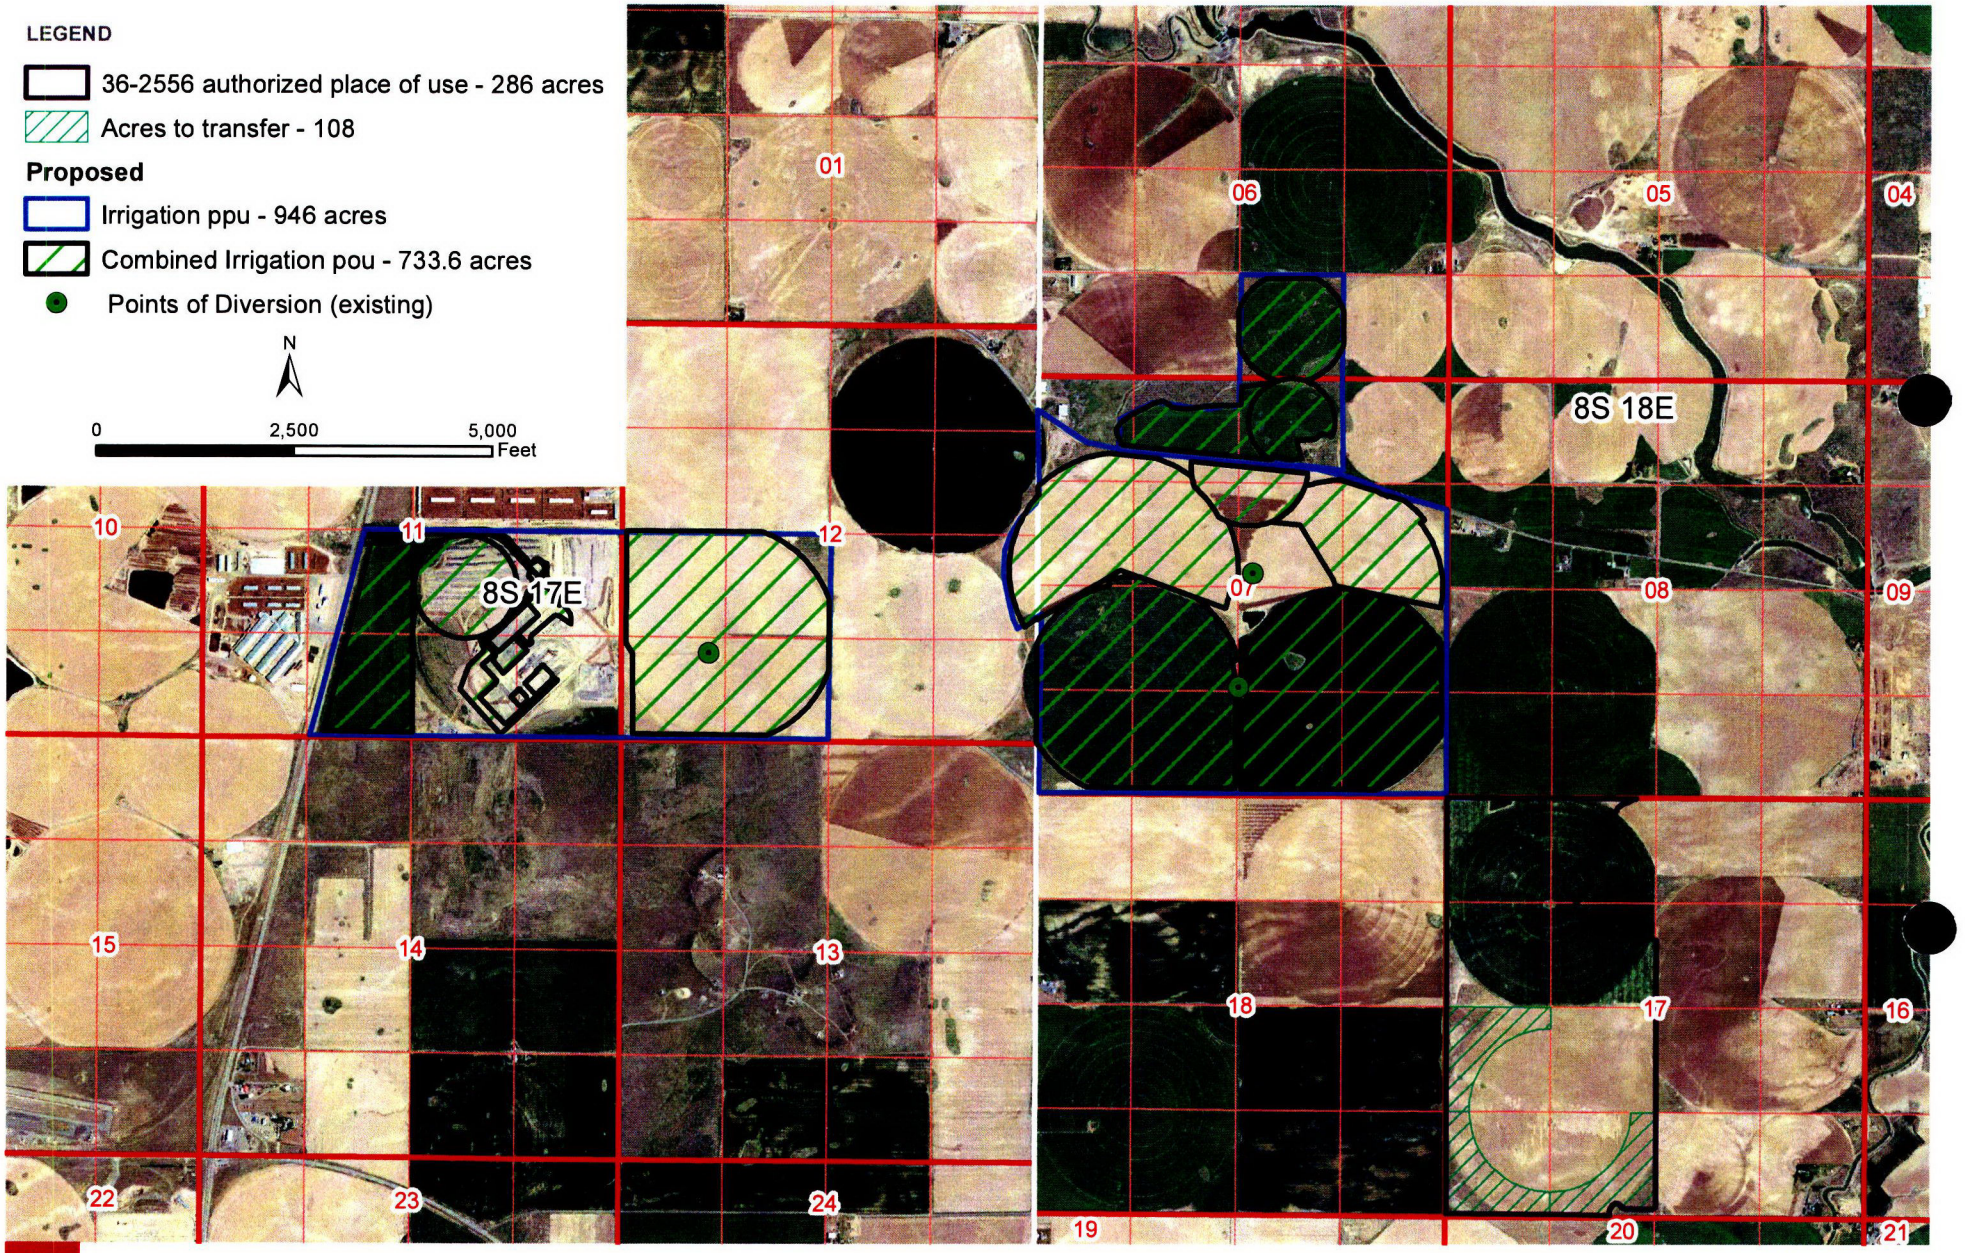

A 206 map showing the location of the 733.6 acres that are planned for irrigation within the ppu is provided as Attachment 10.

Current Place of Use and Water Right Validity

Water 36-2556 authorizes irrigation of 286 acres. The place of use has been modified due to changes in irrigation practices. The modifications included irrigation of lands formally irrigated with Northside canal water located in the E ½ NW, Section 17. All 286 acres have remained irrigated entirely from the ground water source, although the place of use has been adjusted to fit center pivot irrigation.

The remaining acres authorized at the current place of use under water right 36-2556 will be integrated with associated water right 36-2531 as proposed on the accompanying transfer application.

Attached is documentation of an ETRAN3.4 spreadsheet simulation of moving the point of diversion for 432 AAF (144 AF per trimester) from ESPA model cell row 57, column 32 to row 56, column 30, as depicted in the figure below. The mitigation analysis tool demonstrates the transfer can be accomplished without additional mitigation.

Entering Dates

Enter the starting year and season for your simulation. The starting date represents the beginning of the analysis period. (Spring is Mar, Apr, May and Jun. Summer is Jul, Aug, Sep and Oct. Winter is Nov, Dec, Jan and Feb.)

Once you have entered the starting date, push the "UPDATE DATE" Button.

The date only needs to be updated once, unless the desired timeframe of the simulation is changed.

Modifying the date does not automatically adjust the location of the rates entered in the table.

Entering Well Locations

Enter the row and column location for the 'TO' well in spreadsheet cell B15 and B16, respectively.

Enter the row and column location for the 'FROM1' well in spreadsheet cell C15 amd C16, respectively.

Enter the row and column location for the 'FROM2' well in spreadsheet cell D15 and D16, respectively.

Enter the row and column location for the 'FROM3' well in spreadsheet cell E15 and E16, respectively.

If the 'FROM2' well is not to be modeled, the entered row and column should be 0 or blank.

If the 'FROM3' well is not to be modeled, the entered row and column should be 0 (zero).

The 'FROM3' well cannot be used if the 'FROM2' well is not being used.

Running the Model

Once the model cells have been specified for the 'FROM' and 'TO' wells, push the 'RUN MODEL' button to generate the response functions. The model only needs to be re-run if the locations of the 'FROM' and 'TO' wells are changed.

Getting the Model Output

Once the model has been run, push the 'GET OUTPUT' button to retrieve the model output. This prepares the model output for use for calculating effects.

Entering water use dats

All water use should be entered in units of acre-feet per four month period. See the user's manua for instructions on multiple water rights with different priority dates and/or different wells

Entering 'TO' Well Projected Water Use

Enter the projected water use for the 'TO' Well in Column B. 'TO' Well water use should start in the trimester (4-month period) in which the transfer will be effective

Entering 'FROM' Well 'With Transfer' Use

Enter the 'With Transfer' water use for the first 'FROM' Well in Column C, for the second 'FROM' well in Column E, and for the third 'FROM' Well in Column G. 'With Transfer' water use should reflect historical and projected after transfer use for this well and should cease or be reduced at the time of the water right transfer.

Entering 'FROM' Well 'Without Transfer' Use

The 'Without Transfer' Use for the 'FROM' wells should include historical and projected use for each well The projected use should reflect expected pumpage from that well if the transfer were not to take effect. Enter the 'Without Transfer' water use for the first 'FROM' Well in Column D, for the second 'FROM' well in Column F, and for the third 'FROM' well in Column H. Prior to the expected date of transfer, the 'With Transfer' use should be the same as the 'Without Transfe

If only one 'FROM' well is to be represented, pumpage in columns E, F, G and H should be 0. If only two 'FROM' wells are being represented, pumpage in Columns G and H should be 0. Projected water use in the 'TO' well and the 'FROM' wells will be used to estimate the change in effect to the river reaches caused by the water right transfer. (See user's manual.

Calculating Effect of the Transfer on River Gains and Losses

After all of the above steps have been completed, the effects of the proposed transfer on gains and losse of the eleven hydraulically connected reaches of the Snake River can be estimated by clicking the CALCULATE EFFECTS' button. This will result in a multiplication of the response function matrix (deter the model runs) times the water use rates entered in the table provided in columns B through H After the multiplication has been performed, the spreadsheet will automatically advance to the GRAPHS worksheet. Here one graph is provided showing the effect for each of the 11 reaches, and a 12th graph illustrates the net effects on all 11 reaches. Results are also presented in tabular form in the CALCULAT EFFECTS worksheet. See the Users Manual for more information.

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

SCANNED
NOV 25 2022

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

(a) The petition for reconsideration is disposed of; or
(b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

i. A hearing was held,
ii. The final agency action was taken,
iii. The party seeking review of the order resides, or
iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

Date: October 11, 2022

To: Transfer 86696

From: Bill Mills

Re: Evaluation of Sufficiency Memorandum

Application proposes changing the points of diversion and place of use for a 108 acre portion (1.47 cfs) of an irrigation ground water right. Current place of use and point of diversion are located approximately 6.7 to 7.3 miles east and 0.2 miles south to 0.8 miles north of the city center of Jerome. The portion being transferred is proposed to be added to an existing 946 acre irrigation permissible place of use (PPU) and diverted from three existing wells located approximately 4.0 to 6.8 miles east and 0.9 to 2.1 miles north of the city center of Jerome. The proposed transfer will replace water converted from irrigation to industrial use in companion transfer #86695.

Companion transfer #86695 is changing 63 acres (0.83 cfs) of irrigation ground water currently in this PPU from irrigation to industrial use. Processing this transfer along with the companion transfer will result in a net increase of 45 acres of authorized irrigation, resulting in a 733.6 acre limit within the 946 acre irrigation PPU.

PODs, current and proposed POU are in Water District 130. Watermaster comments were solicited, and the Watermaster had no comments or concerns with the application.

PODs are also located in the ESPA. The applicant's consultant provided ESPA modeling that was based on a worst case scenario (modeling based on total volume transferred and not the consumptive use volume transferred). Results indicated that no mitigation would be required as a result of processing this transfer. Department staff were able to duplicate the results utilizing the same parameters.

- **Authority to File:** Applicant is the current owner of all water rights and associated properties.

SCANNED
NOV 25 2022

- **Water Right Validity:** All water rights in the transfer were decreed in the SRBA prior to 1/3/2002. Recent aerial imagery indicates the associated grounds appear to be irrigated.

- **Injury to Other Water Rights:**
  None anticipated.

- **Enlargement of Use:**
  None anticipated.

- **Local Public Interest:**
  No issues anticipated.

- **Beneficial Use/Conservation of Water Resources:**
  Proposed use is recognized as a beneficial use of water.

- **Effect on the Economy of the Local Area:**
  None Anticipated.

- **Effect on Agricultural Base of the Local Economy:**
  None Anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing

Re: Transfer Proposal

Application proposes changing the points of diversion and place of use for a 108 acre portion (1.47 cfs) of an irrigation ground water right. Current place of use and point of diversion are located approximately 6.7 to 7.3 miles east and 0.2 miles south to 0.8 miles north of the city center of Jerome. The portion being transferred is proposed to be added to an existing 946 acre irrigation permissible place of use (PPU) and diverted from three existing wells located approximately 4.0 to 6.8 miles east and 0.9 to 2.1 miles north of the city center of Jerome. The proposed transfer will replace water converted from irrigation to industrial use in companion transfer #86695.

Companion transfer #86695 is changing 63 acres (0.83 cfs) of irrigation ground water currently in this PPU from irrigation to industrial use.

PODs, current and proposed POU are in Water District 130. Watermaster comments will be solicited.

PODs are also located in the ESPA. The applicant's consultant provided ESPA modeling that was based on a worst case scenario (modeling based on total volume being transferred and not just the consumptive use volume transferred). Results indicated that no mitigation would be required as a result of processing this transfer. Department staff were able to duplicate the results utilizing the same parameters.
