MEMORANDUM

TO: Water rights 67-2234 and 67-14899
FROM: Cody Parker
RE: Evaluation of application for transfer 86979
DATE: January 9, 2023

Application for transfer 86979 was received on September 29, 2022. The application proposes to include three groundwater points of diversion on water rights 67-2234 and 67-14899. One of the three wells will be drilled upon approval of this transfer.

The proposed transfer will not change the effect of the water right on the source or hydraulically connected sources. The application was not advertised.

Authority to File

The owner of record for both water rights involved in the transfer is Midvale Maintenance Cemetery District. The transfer applicant is the same. A letter from Midvale Maintenance Cemetery District received October 27, 2022 gives Dennis Holmes the authority to sign the transfer on their behalf. The proposed new point of diversion is located on land owned by the applicant. No concerns.

Water Right Validity

Water right 67-2234 was decreed in 2008. 67-14899 was licensed in 2017. Together, the rights authorize a total of 7.5 acres irrigation.

It is evident from aerial imagery the full acreage authorized by 67-2234 was irrigated as recently as 2021. Aerial imagery confirms that 2.4 of the 3 acres authorized by 67-14899 have were irrigated in 2021. Irrigation of the remaining 0.6 acres is confirmed by analysis of NDVI values, which reach as high as 0.65 in June of 2021 and 0.61 in August of 2021..

No concerns.

Injury to Other Water Rights

None anticipated. The well nearest to the proposed POD location is located ¼ mile west. The two existing PODs are roughly the same distance from that same well. The transfer should not affect the impact of the diversion on that well.

STAMPED
JAN 25 2023

Enlargement of Use

The rate and volume on the water rights will not be increased through the transfer. The validity of the full 7.5 acres of irrigation was confirmed in the analysis above, so there is no concern that the addition of a new POD would enable the owner to irrigate more acres than they have historically.

Local Public Interest

There is no information available to suggest the addition of a point of diversion conflicts with the local public interest.

Beneficial Use/Conservation of Water Resources

The applicant proposes to continue to use ground water in quantities which are within the acceptable standards for an irrigation beneficial use. No concerns.

The application is consistent with criteria of I.C. § 42-222 and should be processed
