WATER RIGHT NO. 63-12100

As Modified by Transfer No. 85416

CONDITIONS OF APPROVAL

6. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.

7. To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, this right retains its original priority for well locations authorized under this right as identified in license dated April 23, 1998.

8. Irrigation of large projects such as parks, golf courses, or sports activities fields is not authorized under this right.

9. The daily diversion volume for non-domestic uses under this municipal right shall not exceed 2,500 gallons per use and the daily diversion volume for domestic uses under this right shall not exceed 13,000 gallons per dwelling in accordance with Section 42-111, Idaho Code.

10. The right holder shall not provide water diverted under this right for the irrigation of land having appurtenant surface water rights as a primary source of irrigation water except when the surface water rights are not available for use or where the use of surface water was replaced by the use of water diverted in connection with this right before the approval of Transfer 83112. This condition applies to all land with appurtenant surface water rights, including land converted from irrigated agricultural use to other land uses but still requiring water to irrigate lawns and landscaping.

11. Right holder shall comply with the drilling permit requirements of Idaho Code § 42-235 and applicable Well Construction Rules of the Department.

12. This right does not grant any right-of-way or easement across the land of another.

13. Transfer 82549 authorizes four new wells locally known as: Well 3 located in T04N R 01W S05 SESW; Well 4 located in T05N R 01W S33 SWSE; Well 5 located in T04N R 01W S04 NWNE; Well 6 located in T05N R 01W S32 SWSW.

14. Transfer 83112 authorizes one new well locally known as Well 7 located in T05N R 01W S32 SWSW.

15. Transfer 85416 authorizes one new well locally known as Well 8 located in T04N R 02W S10 SENE.

16. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.

17. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Signed Transfer Approval Notice

Dear Water Right Holder

The Department of Water Resources has issued the enclosed signed in part approved Transfer of Water Rights. Please be sure to thoroughly review the conditions of approval and remarks listed on the approval document.

The Transfer of Water Rights is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. Each can and will become a final order without further action by the Department unless the APPLICANT petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

ANY PERSON aggrieved by any decision, determination, order or action of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Department and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

If the transfer approval includes a condition requiring measuring and recording devices, such devices shall comply with specifications established by the Department. Detailed specifications are available on the Department's home page on the Internet, or you can request a copy by contacting any office of the Department. Please be sure to thoroughly review the specifications to avoid unnecessary costs for reinstallation or modification due to non-conforming or improperly installed devices.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a $100 late filing fee. Contact any office of

Amendment of Permit & Transfer Approval Notice

Dear Water Right Holder

The Department of Water Resources has issued the enclosed approved Amendment of Permit and in part approved Transfer of Water Rights. Please be sure to thoroughly review the conditions of approval and remarks listed on the approval document.

The Amendment of Permit and Transfer of Water Rights are each a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. Each can and will become a final order without further action by the Department unless the APPLICANT petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

SCANNED
FEB 03 2023

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

> Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:
>
> (a) The petition for reconsideration is disposed of; or
> (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

i. A hearing was held,
ii. The final agency action was taken,
iii. The party seeking review of the order resides, or
iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

proposes the same on the municipal permit. Because the new well will be interconnected with the municipal system, there is potential for enlargement of that domestic right. For example, the 3 municipal water rights and one permit total 12.1 cfs (this excludes fire protection rate for simplicity) and the domestic right totals 0.33 cfs. If the total being diverted by the District is 12.43 cfs, but if the in-house use for the specific homes under the domestic right is less than 0.33, then that domestic use has been enlarged. Because the domestic right has a middle-of-the-road priority date, the same thing happens whenever the District is diverting more than the sum of the municipal water rights with priorities senior to the domestic right. Essentially, any time the District is diverting more than the sum of the municipal rights and permit, if the entirety of that overage is not serving the homes in the domestic place of use, then the domestic right is being enlarged. Unless there is a way to quantify the in-house use for the homes served by the domestic right, it is not possible to know how much of that right is actually being diverted at any given time, so it cannot be known when the volume limit is reached or when the right is satisfied.

All of that being said, the addition of another well to the municipal rights and permit through transfer 85416 and the permit amendment does not create an enlargement in this respect where the potential for enlargement did not already exist However, adding another well to the domestic right does increase the potential for enlargement, as it furthers the potential for more water to be diverted than authorized under the municipal rights and permit and be distributed to homes outside the domestic right's place of use. Additionally, it further complicates complexifies the ability to ever measure and determine how much water is actually being served to the 33 homes originally served by the domestic right, and therefore the further complicates the ability to determine if that right is being enlarged. For this reason, the new well can be authorized on the municipal rights without further potential for enlargement, however it should not be approved on the domestic right, in order to prevent further enlargement potential beyond what already exists.

Local Public Interest:
No evidence has been submitted suggesting the transfer proposes changes at odds with the local public interest.

Beneficial Use/Conservation of Water Resources:
The application proposes beneficial use consistent with conservation of water resources in Idaho.

Discussion

The new POD was also added by an amendment of permit for water right no. 63-32644.

During review some typographical errors were discoved in conditions added as part of prior transfers. Those errors were corrected and included the following:

On WR 63-12100: The written condition describing the wells added by Transfer 82549 only listed well 6, however wells 3, 4, & 5 were also added to the right as part of Transefer 82549. The condition was updated to explain this.

On WR 63-12370: The written condition describing the wells added by Transfer 82549 only listed well 6, however wells 3, 4, & 5 were also added to the right as part of Transefer 82549. The condition was updated to explain this.

On WR 63-31511: Condition 226, the licensed date was listed as March 2, 2013. Date was updated to the correct licensed date of March 20, 2013. On the written condition describing the wells added by Transfer 82549, only well 6 was listed, however wells 1 and 3 were also added to the right as part of Transefer 82549. The condition was updated to explain this.

Assuming protests are not filed and/or other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

MEMORANDUM

TO: Transfer No. 85416

FROM: Laura McSherry

DATE: January 31, 2023

RE: Evaluation of Application

Star Sewer and Water District filed transfer no. 85416 to add a new POD (Well #8) to their water system. The new POD within SENE Sec 10 Twp 4N Rge 2W Canyon County is located 0.5 miles north of State Highway 44. Water rights included in the transfer are: 63-12100, 63-12370, 63-31969, and 63-31511.

Summary of Information Submitted

Authority to File:
The application was filed in the name of Star Sewer and Water District. The company is the current water right owner and has secured an easement with Star Fire Protection/Middleton Fire District for land pertinent to the transfer. The application was signed by Floyd Day who is a historically authorized officer to sign on behalf of the company.

Water Right Validity:
The rights were licensed for municipal use between 1994 and 2004. Star Sewer and Water District has been serving its users since this time. Concerns over validity are not present at this time.

Injury to Other Water Rights:
None anticipated. The application describes well #8 to be drilled with a submersible pump. This implies that the diversion from the intended well will not ceate a significant impact on local water users. The transfer was advertised and no protest was received regarding the transfer, so the Department can reasonably assume surrounding water users do not have concerns of injury as a result of this transfer.

Enlargement of Use:
The new point of diversion is not considered an improvement to the source. Limits to diversion rate or volumes are not changing.

Wells No. 1, 3, 4, 5, 6, and 7 are currently authorized to divert water under three municipal water rights, one municipal permit, and one domestic water right. Two of the municipal rights are senior to the domestic right and can be diverted from any of the wells in the District's municipal system. The same is true of the municipal right and the municipal permit junior to the domestic right. The domestic right can also be diverted from any of the wells in the District's system but is conditioned to serve in-house use for specific homes. Those homes can also be served through the municipal rights (the domestic place of use is entirely within the municipal service area). Transfer 85416 proposes to add another well to all the rights (well No. 8), and a permit amendment
