Water Right License

Water Right No. 63-33184

Priority: March 02, 2009

Maximum Diversion Rate: 2.00 CFS
Maximum Diversion Volume: 450.0 AF

It is hereby certified that:

PROVOST FARMS, LLC 21140 NOTUS RD GREENLEAF ID 83626-8940

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated March 02, 2009, and has submitted Proof of Beneficial Use on January 02, 2020. An examination confirms water is diverted from:

Source : GROUND WATER

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
IRRIGATION	03/01 to 11/15	2.00 CFS	450.0 AF

Location of Point(s) of Diversion
GROUND WATER SW¼ NW¼, Sec. 11, Twp 05N, Rge 04W, B.M. CANYON County

Place of Use: IRRIGATION

Twp	Rng	Sec	NE				NW				SW				SE				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
05N	04W	10				25.0									1.0				26.0
05N	04W	11							26.0	24.0	9.0	15.0							74.0

Total Acres: 100.0

Conditions of Approval

1. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
3. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.

RE: License No. 63-33184

ISSUANCE OF LICENSE

Dear Water Right Holder(s):

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 605-4624.

Sincerely,

Lynne Evans
for Scott Storms
Water Rights Supervisor

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

SCANNED

JUL 28 2023

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

> Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:
>
> (a) The petition for reconsideration is disposed of; or
> (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

i. A hearing was held,
ii. The final agency action was taken,
iii. The party seeking review of the order resides, or
iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

RE: Water Right Permit No. 63-33184

Dear Permit Holder,

The Department of Water Resources is reviewing the permit(s) referenced above prior to issuing water right license(s). By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

The examiner who verified your water use reported that certain elements of the permit(s) have been developed differently than described on your permit(s). Changes that do not increase the authorized use of water under the permit(s) can be requested and approved in accordance with Idaho Code § 42-211. Before license(s) can be issued, your permit(s) must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit(s):

_____ Point(s) of Diversion

__X__ Place(s) of Use – 1. [redacted] in the NE¼ SE¼, Sec. 10, Twp 05N, Rge 04W

_____ Other

The enclosed Application for Amendment form(s) depicts the elements of the water right(s) as they will appear on the license(s) when issued. Please review the amendment form(s) carefully. If you concur with the information presented, please sign and return the form(s) with the filing fee of $100.00 within **fourteen (14) days**.

If you have any questions, please call me at (208) 605-4623.

Sincerely,

Allen Bradbury

Pivot #*	Operating PSI**	Pivot Towers	Design Flow (gpm)***	Rate (cfs)
Pivot 1	NOT part of system			
Pivot 2	28	3	150	0.33
Pivot 3	40	2	150	0.33
Pivot 4	34	3	250	0.56
Pivot 5	35	3	180	0.40
Pivot 6	48	3	150	0.33
	37		**880**	**1.96**

*Pivot numbers are consistent with land owners phone application.

** Operating Pressure based on pressures recorded by land owners phone application.

*** Design flows for pivots provided by Agri-lines Irrigation Inc.

Yaskawa Digital Controller panel display indicated that pump was running at 55 to 57 psi.

SCANNED
JUL 28 2023

	Permit Rate (cfs)	Fee Rate (cfs)	Beneficial Use Standard (cfs)	Theoretical Rate (cfs)	Recommended Value
IRRIGATION	2.0	2.0	2.0		2.0 BU

Recommended rates: Irrigation Standard Rate – 2.0 cfs = 0.02 cfs/acre x 100 acres

F. VOLUME CALCULATIONS

1. Volume Calculations for irrigation:

$V_{I.R}$ = (Acres Irrigated) x (Irrigation Requirement) = 100 acres x 4.5 ac-ft = 450 ac-ft
$V_{D.R}$ = [Diversion Rate (cfs)] x (Days in Irrigation season) x 1.9835 = (2.0 cfs) x (260 days) x 1.9835 = 1031.4 ac-ft
V = Smaller of $V_{I.R}$ and $V_{D.R}$ = 450 ac-ft

2. Volume Calculations for Other Uses:

G. NARRATIVE/REMARKS/COMMENTS

Travis F and Jaime J Kraupp are the owners of permit 63-33184 for irrigation use in Canyon County. This permit was approved on 12/31/2009 with a proof due date of 01/02/2015. A request for extension was approved on 11/18/2014, extending the proof due date to 01/02/2020. The proof of beneficial use was submitted on 01/02/2020 with an examination fee of $125. A field exam was conducted on 06/15/2023. Mike Provost, owner of Provost Farms LLC, accompanied the water resource agent on the field exam. On 11/06/2020, a notice of change in water right ownership form was filed for water right 63-33184 with the Department along with a warranty deed confirming the sale of the property to Provost Farms LLC. Also, a notice of security interest in a water right was received from U.S. Bank National Association c/o CGB Agri Financial Services Inc. The ownership change was processed during licensing.

The source of water for this water right permit is from a 16-inch well, tag# D0069111. A variable frequency drive 125 hp Nidec motor Model DT80 (Catalog #HO125V2SLS) was observed to power a vertical turbine pump. The pump was installed by Layne of Idaho. Water enters a 6-foot section of 8-inch pipe and then the flow is split into a 3-way manifold for delivery to five Zimmatic pivots. Four of the pivots have 3-towers and one pivot has 2-towers. All five pivots were running with end guns during the field exam. The pivot corners and irregularly shaped fields are covered by fixed set risers with large impact type sprinkler heads. The fixed sets are divided into six zones. The fixed sets were not running during the field exam, due to hay harvest. Crops being grown within the place of use included alfalfa, corn, and wheat.

The system was not equipped with a flow meter, and one is not required by condition 01M on the permit. An attempt was made to measure the flow rate with the Panametric ultrasonic flow meter attached to the 6-foot section of pipe even though the distance requirements of 5 pipe diameters upstream and 10 pipe diameters downstream was not met. A measurement was not able to be recorded. Prior to the field visit, Mr. Provost attempted to obtain the pumping depth from Layne, but his phone calls were unreturned. The Yaskawa digital controller panel display indicated that pump was operating at 55 to 57 psi. Individual pivot operating pressures were recorded from Mr. Provost's phone application. Mr. Provost did contact Agri-lines Irrigation Inc. and obtained the design flows for each of the five pivots running off of the pump (see table in section E. Flow Calculations), these were texted to his phone from the sales representative. The cumulative design flow for all five pivots is 880 gpm or 1.96 cfs, rounding to 2.0 cfs. Based on the design flows for the system I am recommending the beneficial use standard rate of 2.0 cfs.

SCANNED
JUL 28 2023

Aerial imagery and ArcMap GIS tools were used to confirm that 100 acres were developed. No overlap was found in either the POD or the POU. The actual irrigation shape differed slightly from the shapefile issued with the permit and was adjusted accordingly. Additionally, 1.0 acre in NESE quarter-quarter of section 10 T05N R04W was not permitted but was developed as part of the POU, since it is encompassed by the rotation of pivot #4. This land is owned by Provost Farms. I am recommending an amendment to address this acreage and recommending a 100-acre place of use.

Condition 26A was removed as per department licensing standards. Condition 121 was updated to 103 as per department licensing standards. Condition 004 was removed since access across the land of another is not a concern. Condition 046A was removed as per department licensing standards.

Have conditions of permit approval been met? __X__ Yes ____ No

H. RECOMMENDATIONS

1. Recommended Amounts

RE: Scheduling Field Exam for Water Permit No. 63-33184

Dear Permit Holder:

We are planning to conduct water right examinations in the vicinity of the above-referenced permit **this season**. An examination is needed to verify the water use in order to issue a water right license.

The above-referenced permit authorizes **2.0 cfs of GROUNDWATER for IRRIGATION of 100 acres. If you have developed a beneficial use and still own the place of use property, please contact me at your earliest convenience to schedule an examination.**

If you did not develop a beneficial use of water under the permit during the beneficial use period, a license cannot be issued and the permit should be relinquished. lf that use was developed, but have ceased using the water and you currently carry no interest in it, please relinquish the permit by submitting the enclosed Relinquishment of Permit form (no fee required).

If you did develop a beneficial use of water under the permit, but you no longer own the place of use property identified in the permit, please submit the enclosed Assignment of Permit form with the applicable $25 processing fee.

Please contact me within the next thirty **(30) days** at (208) 334-2190 to either schedule an examination or submit a relinquishment or assignment form. lf you no longer own the place of use property and/or do not respond to this letter, the department will work with the current property owner to issue a license or void the permit.

Sincerely,

Allen Bradbury
Water Resource Agent, Sr.
