4. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.

This license is issued pursuant to the provisions of Idaho Code § 42-219. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

RE: License No. 63-34420

ISSUANCE OF LICENSE

Dear Water Right Holders:

The Department of Water Resources ("Department") has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review all the conditions of approval listed on your license. The conditions may include ongoing requirements, such as maintenance of a measuring device or implementation of mitigation, as well as information about how your water use may be administered, such as regulation by a watermaster in a water district.

The license is a PRELIMINARY ORDER issued by the Department pursuant to Rule 730 of the Department's Rules of Procedure (IDAPA 37.01.01.730). It can and will become a final order without further action by the Department unless a party petitions for reconsideration, files exceptions, or requests a hearing as described in the enclosed information sheet.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Water right forms are available from any office of the Department or on the Department's website at idwr.idaho.gov

If you have any questions concerning the enclosed information, please contact me at (208) 287-4925.

Sincerely,

for Phill Hummer

Comments: The property is within the borders of the Farmers Union Ditch Company. The application for permit states that the owner only has and/or uses well water. Therefore, it doesn't appear as though any Farmer's Union Ditch Company rights are available to this property. There are also other domestic water rights in this area, but they are for neighboring properties, which have been confirmed with recent ownership changes.

E. FLOW CALCULATIONS

____ Additional Computation Sheets Attached

Measured Method:

The application for permit stated that the well pump being used was a 2 Hp 20 gpm pump. The area Well Driller Reports range in pumping water level from 64 feet to 245 feet. This size of pump and an unknown pumping level don't make sense for this size domestic and irrigation system. I don't feel comfortable limiting the diversion rate for this system based on unclear information. Therefore, I will fall back on the information supplied in Administrative Processing Memorandum #22 that allows up to 0.04 cfs for domestic use and Administrative Processing Memorandum #17 that allows 0.03 cfs per acre for the 1.3 acres being irrigated.

Administrative Processing Memo #22 = 0.04 cfs for domestic use.

Administrative Memo #17 = 0.03 cfs X 1.3 acres = 0.039 cfs rounded to 0.04 cfs.

Permit allowed = 0.04 cfs for domestic use

Permit allowed = 0.04 cfs for stockwater use

Permit allowed = 0.08 cfs total for both uses.

I am recommending 0.04 cfs for domestic use and 0.04 cfs for irrigation use for a total of 0.08 cfs based on the limits imposed by the permit.

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 1.3 \text{ acres} \times 4.5 \text{ af/ac} = 5.9 \text{ acre-feet}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = 0.04 \times 260 \times 1.9835 = 20.6 \text{ acre-feet}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 5.9 \text{ acre-feet}$$

2. Volume Calculations for Other Uses:

Administrative Processing Memorandum #22 provides guidance to allow 0.6 acre-feet for in-house use only.

I am recommending that this permit be limited to 0.6 acre-feet for domestic use for in-house use only. The yard irrigation will be covered by the irrigation portion of this permit.

H. NARRATIVE/REMARKS/COMMENTS

This permit qualifies for an in-house examination. This a basic domestic use and an irrigation system that includes a yard and 4 small pastures.

Mackenzie Kienholtz and I met with the permit holder while he was filing his Statement of Completion for Submitting Proof of Beneficial Use. He went through the system with us and discussed what areas he was irrigating and how he was irrigating these areas. He has sprinklers on the top of his fencing used to irrigate the fields. I asked about the northern fields he was claiming were being irrigated. He informed us that he has planted grass seed his neighbor gave him in the northern fields. He stated that you wouldn't see much irrigation on those fields, because he just recently planted the seed. I have included these fields, because he has been irrigating these fields during the development period. Unfortunately, I forgot to ask if he increased the size of his well pump.

Conditions R69, 071, and WB5 should be carried forward to licensing. Condition 121 should be changed to condition 103 as is standard. No further conditions are required for the licensing of this permit.

This permit includes a domestic use and an irrigation use. The permit is outside of the Basin 63 Ground Water Restricted area, but it includes a 13,000 gallon per day limitation. Regardless of this limitation, a volume is necessary for the domestic use because there is a volume for the irrigation use. The 13,000 gallon per day limitation condition will be carried forward to licensing.

Have conditions of permit approval been met? X Yes No
