

**STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES**

**TRANSFER OF WATER RIGHT
TRANSFER NO. 87734**

This is to certify that: **MACE RIVER RANCH OWNERS ASSN INC**
6149 N MEEKER PL STE 150
BOISE, ID 83713-1587

has requested a change to the water right(s) listed below. This change in water right(s) is authorized pursuant to the provisions of Section 42-222, Idaho Code. A summary of the changes is also listed below. The authorized change for each affected water right, including conditions of approval, is shown on the following pages of this document.

Summary of Water Rights Before the Proposed Changes

Transfer No. 87734

SCANNED

JUL 28 2023

WATER RIGHT NO. 63-182
As Modified by Transfer No. 87734

CONDITIONS OF APPROVAL

1. This right is limited to the irrigation of 106 acres within the authorized place of use in a single irrigation season.
2. Rights 63-182, 63-216A, 63-16273, and 63-161CF when combined shall not exceed the irrigation of 146.0 acres.
3. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the place of use.
4. Transfer 78885 authorizes the diversion and delivery of 0.48 cfs and 56.5 af of water to storage for replacement of evaporation losses from twelve ponds authorized by Right 63-33864.
5. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
6. Diversion of water from groundwater is limited to those times when water is available for diversion under this right and priority from the Boise River at the points of diversion located in Lot 5 (SWNW), Sec. 16, T04N, R01E, and Lot 2 (NWNE), Sec. 21, T04N, R01E.
7. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
8. This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.
9. This right originated as all or part of right no. 48 in the Stewart Decree and the historic Boise River Water Masters records.
10. Any transfer of the point of diversion described under this right will require the right holder to provide evidence that the new point of diversion has a direct and immediate hydraulic connection to the Boise River.

WATER RIGHT NO. 63-182

As Modified by Transfer No. 87734

CONDITIONS OF APPROVAL

11. Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.
12. This right is delivered through the Conway-Hamming and Mace-Mace ditches.
13. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
14. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
15. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.

WATER RIGHT NO. 63-216A

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

APR 07 2023 APPLICATION FOR TRANSFER OF WATER RIGHT – POINT(S) OF DIVERSION

WATER RESOURCES
WESTERN REGION

This form may be used to apply to change and/or add points of diversion for existing water rights and to report an ownership change for a water right(s) in connection with the proposed point of diversion change(s). Do not use this form to apply for changes to other elements of a water right. See the Application for Transfer Instructions for help completing this form and for mailing addresses of Department offices where your application can be submitted.

Check all that apply:

- ☐ Change diversion point(s) ☒ Add diversion point(s) ☐ Ownership change ☐ Ownership split
☐ Transfer is for changes pursuant to Idaho Code § 42-221.O.8. Attach an explanation and any supporting documentation.

1. **APPLICANT(S)** Mace River Ranch Owners Association Inc Phone 208-631-2764
 2. **MAILING ADDRESS** 6149 N. Meeker Place, Suite 150 City Boise
 State ID Zip 83713 Email emahoney2764@gmail.com

- ☐ If the applicant is not an individual and not registered to do business in the State of Idaho, attach documentation identifying officers authorized to sign for the applicant.
☐ If the applicant is not the current water right(s) owner, attach documentation of authority to file the application.
☐ If the application includes a change in ownership of water right(s), attach a copy of the conveyance document, such as a warranty deed, court decree, contract of sale, etc. The conveyance document must include a legal description of the property conveyed or description of the water right if no land is conveyed. Additional fee(s) are required for water right ownership changes; see Item 9 for the fee schedule.

If the ownership change resulted in the water right(s) being split, how did the division occur? Mark one:

- ☐ The water rights or claims were divided as specifically identified in a deed, contract, or other conveyance document.
☐ The water rights or claims were divided proportionately based on the portion of their place(s) of use acquired by the new owner.
☐ If the application is not signed by the applicant, attach a Power of Attorney or other documentation providing authority to sign for the applicant.

3. **LIST WATER RIGHT NUMBER(S)** 63-161CF, 63-182, 63-216A

- ☒ Attach a copy of the water right(s) as recorded, available at idwr.idaho.gov, *Water Right Transfers, Step 1*, or by contacting any Department office.

4. **TOTAL AMOUNT OF WATER** transferred is 3.52 cubic feet per second and/or 56.5 acre-feet per annum.
 (diversion rate) (storage volume)

5. **POINT OF DIVERSION** – Describe all the point(s) of diversion to be included on the water right(s) after the proposed change.

- ☐ Attach Eastern Snake Plain Aquifer (ESPA) analysis if this transfer proposes to change a point of diversion affecting the ESPA. ESPA analysis information is available at idwr.idaho.gov, *Water Rights, Water Right Transfers, Modeling Resources*.

SCANNED

MAY 25 2023

6. GENERAL INFORMATION

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Existing headgates, ditches, pipelines. Proposed new diversion is collection gallery for shallow ground water adjacent to Boise River. Measuring devices and lockable controlling works will be accommodated as required.

- b. Who owns the property at the point(s) of diversion? Applicant owns property at the new proposed diversion.
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,
☐ ☒ currently used in a mitigation plan limiting the use of water under the right(s), or
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the right(s)?

If yes, describe:

- d. Is any portion of the water right(s) proposed to be changed currently leased to the Water Supply Bank? ☐ Yes ☒ No
☐ If yes and there are multiple owners, attach a Lessor Designation form.
☐ If yes, the individual owner or designated lessor must complete, sign and attach an IRS Form W-9.
(Disregard if these items are on file and ownership has not changed.)

7. **MAP** – ☒ Attach a map of the diversion, measurement, control and distribution system. Include the place of use if a split of the water right occurred. Clearly label the map with township, range, section and ¼ ¼ of section information. You may create a map at idwr.idaho.gov, *Water Rights*, *Water Right Transfers*, *File a Transfer Application*, *Step 2C*.

8. **SIGNATURE** – The information in this application is true to the best of my knowledge. I understand any willful misrepresentations in this application may result in rejection of the application or cancellation of an approval.

DocuSigned by:

Ed Mahoney

5. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.
6. PIN Parcel Nos. S0517141807 and S0517122500
7. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the place of use.

Transfer Approval Notice

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed approved Transfer of Water Right(s). Please be sure to thoroughly review the conditions of approval and remarks listed on the approval document.

The Transfer of Water Right(s) is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless the APPLICANT petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

ANY PERSON aggrieved by any decision, determination, order or action of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Department and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

If the transfer approval includes a condition requiring measuring and recording devices, such devices shall comply with specifications established by the Department. Detailed specifications are available on the Department's home page on the Internet, or you can request a copy by contacting any office of the Department. Please be sure to thoroughly review the specifications to avoid unnecessary costs for reinstallation or modification due to non-conforming or improperly installed devices.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

TO: Transfer No. 87734
FROM: Marcelina Williams
DATE: July 5, 2023
RE: Evaluation of Application

The purpose for transfer is to add a new point of diversion (POD) to water rights 63-121CF, 63-182, and 63-216A. New POD will be a ground water collection gallery shown to be directly hydraulically connected to the Boise River.

Summary of Information Submitted

Authority to File:

Idaho Department of Water Resources (IDWR) records show the applicant Mace River Ranch Owners Association Inc are the current owners of water rights 63-121CF, 63-182, and 63-216A. The Boise County parcels show Mace River Ranch Owners Association Inc as the current owner of the parcel in which the water rights are located. The applicant is Mace River Ranch Owners Association Inc, and the application has been signed by Ed Mahoney who is the president of the company.

Water Right Validity:

Water rights 63-121CF, 63-182, and 63-216A were decreed on 06/18/2014, 02/16/2007 and 02/16/2007 respectively. These rights are presumed to be valid because aerial imagery shows evidence of use of the irrigation portions of the right over the past five years and no evidence of non-use associated with the domestic portions. Therefore, all three rights are presumed to be valid.

Injury to Other Water Rights:

This transfer does fall within Basin 63 Groundwater Restricted area, while none of the water rights in this transfer are sourced from groundwater, due to the rapid development in the area this application was advertised. No additional rate or volume is proposed to be diverted from this source beyond the historical use of the rights. The transfer has been advertised to allow surrounding right holders to file a protest if they believed injury would occur. No enlargements of the water rights are anticipated.

Enlargement of Use:

The proposed changes will not result in an increase in diversion rate or number of acres irrigated. Enlargement is not anticipated to be an issue.

Local Public Interest:

This transfer is not found to trigger potential water quality issues, impact current land use requirements on non-private land or impact fish/wildlife resources. No protest was filed in response to the water right transfer being advertised. For those reasons this application proposes a change consistent with the local public interest.

Beneficial Use/Conservation of Water Resources:

The application proposes beneficial use consistent with conservation of water resources in Idaho.

SCANNED

JUL 28 2023

Discussion

The POD shapes have been updated for water rights 63-121CF, 63-182, and 63-216A from two PODs to three to reflect the new proposed POD. A change in source for a POD is allowable according to IDWR Transfer Processing Memo no. 24.5. c. (6). To demonstrate the ground water and surface water sources have a direct and immediate hydraulic connect of at least 50 percent depletion at proposed POD within a day, a Stream Depletion Analysis was submitted by HDR on behalf of the applicant. The Glover and Balmer method were used to estimate the rate and volume of stream depletion due to groundwater pumping. This analysis showed the proposed POD has a stream depletion rate of 75.8 percent and stream depletion volume of 59.6 percent thus exceeding IDWR standards of 50 percent.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Hello Lynne,

Again, thank you for returning my call.

As we discussed, attached is the letter from Island Woods HOA in support of Mace River Ranch Transfer Application #88734 as long as the application does not have any impact on Island Woods HOA currently IDWR application or water rights.

If you have any questions, please contact me.

Sincerely,

Jill Barbour

RE: Transfer No. 87734
Water Right No(s). 63-161CF, 63-182, 63-216A

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the IDAHO STATESMAN on 6/1/2023 and 6/8/2023. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Lynne Evans

NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 87734

MACE RIVER RANCH OWNERS ASSN INC, 6149 N MEEKER PL STE 150, BOISE, ID 83713-1587 has filed Application No. 87734 for changes to the following water rights within ADA County(s): Right No(s). 63-161CF, 63-182, 63-216A; to see a full description of these rights and the proposed transfer, please see <https://research.idwr.idaho.gov/apps/waterrights/querynewtransfers>. The purpose of the transfer is to change a portion of the above rights as follows:
to add a point of diversion in the SENE of Sec. 17, T04N, R01E and the source being a shallow ground water collection gallery that is hydrologically connected to the Boise River.

For additional information concerning the property location, contact the Western Region office at (208)334-2190. Protests may be submitted based on the criteria of Idaho Code § 42-222. Any protest against the proposed change must be filed with the Director, Department of Water Resources, Western Region, 2735 W AIRPORT WAY, BOISE ID 83705-5082 together with a protest fee of \$25.00 for each application on or before 6/20/2023. The protestant must also send a copy of the protest to the applicant.

Watermaster:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. You can find a copy of the application at: <https://research.idwr.idaho.gov/apps/waterrights/wrajsearch/wradjsearch.aspx>. Please review the application, then complete the enclosed recommendation form and return it to this office by June 20, 2023.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation by June 20, 2023, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Please contact this office if you have any questions regarding the application.

Memo

Date: Monday, May 08, 2023
Project: Mace River Ranch Owners Association
To: Marcelina Williams
From: Scott King, P.E., Patrick Kelly
Subject: Transfer No. 87734 Stream Depletion Analysis

Introduction

Mace River Ranch Owners Association Inc. submitted water right transfer application no. 87734 proposing to add a new point of diversion to Boise River water rights 63-161CF, 63-182, and 63-216A. The new proposed point of diversion is a collection gallery located adjacent to the Boise River that will be used to divert shallow groundwater.

Idaho Department of Water Resources (IDWR) Transfer Processing Memo No. 24 describes a change of source from surface water to ground water. Idaho Code §42-222 does not allow a change in source from surface water to groundwater unless the groundwater and surface water sources are sufficiently interconnected that they constitute the same source for purposes of a proposed change in point of diversion. The groundwater and surface water sources must have a direct and immediate hydraulic connection of at least 50% depletion in original source from depletion at proposed point of diversion in one day (IDWR, 2009).

The Stream Depletion Analysis is performed using the Glover and Balmer method to estimate the rate and volume of stream depletion due to ground water pumping (Weaver, 2015). Assumptions of transmissivity, hydraulic conductivity, spatial references, pumping rates and other aquifer characteristics are used in the method described above.

User Defined Input Variables

Duration (t)

Duration of pumping set to 1 day. This is required to identify full depletion over a 24-hour period.

Hydraulic Conductivity (K)

Hydraulic conductivity can vary by orders of magnitude for any given type of material. Rates are dependent on the size and distribution of interconnected voids and complexity of pathways. Assumptions for K can be made based on soil classifications.

USDA Web Soil Survey provides soil data and maps available online and is the largest soil database in the world. Figure 1 below shows the proposed point of diversion within the Notus-LesBois complex soil boundary. The Notus-LesBois complex is defined within the floodplain composed of sandy and gravelly alluvium. Typical profile consists of fine gravelly loamy sand from 0 to 6 inches and very gravelly sand from 6 to 60 inches. The land is poorly drained and is sloped

SCANNED

MAY 25 2023

from 0 to 1 percent. Capacity of the most limiting layer to transmit water is classified as high to very high. Further details about this soil classification are attached.

Hydraulic conductivity was assumed based on the soil profile described above. USDA classifies alluvial gravel/sand hydraulic conductivity ranging between $1.31\text{E-}03$ to $1.31\text{E-}02$ ft/s (USDA). This translates to a daily flow of 113 to 1,132 ft/day. This is consistent with coarse sand and gravel values of $1\text{E}1$ to $1\text{E}4.5$ presented by the USGS basic ground water hydrology (Heath, 1983).

When local data collected on site is not known, average published values of aquifer characteristics can be use. Average K for the site based on information presented above is 623 ft/day.

Figure 1. Location map (4N 1E 17 SENE)

Saturated Thickness (b)

The applicant intends to divert shallow groundwater considered to be in direct connection to surface water (Boise River). Static water level is anticipated to be within a few feet from surface. The wet well depth will be 18 feet or less to not trigger well construction standards rules required by IDAPA 37.03.09. For purposes of the stream depletion analysis tool, an anticipated value of 16 feet (the maximum depth of the wet well minus anticipated static water level) is used.

Specific Yield (Sy)

Common published value for sand is 22 percent while gravel is 19 percent (Heath, 1983). Because the anticipated lithology will consist of unconsolidated coarse sand and gravel, a specific yield value of 20.5 percent is used.

Distance (a)

The wet well will be located approximately 62 feet from the existing MMROA gate where water enters the irrigation system and approximately 96 feet from the Boise River shore (Figure 1).

Pumping Rate (cfs)

Three water rights 63-161CF, 63-182, and 63-216A authorize diversion of 3.52 cfs. The applicant intends to construct a diversion system capable of diverting this rate using intake gallery, screens, pumps, and piping.

Stream Depletion Analysis Tool

Data below shows that the proposed point of diversion has a stream depletion rate of 75.8% and stream depletion volume of 59.6%.

Calculation of Stream Depletion Rate & Volume		
User Defined Input Variables		
t =	1	duration of pumping (days)
K =	623.00	hydraulic conductivity (ft/day)
b =	16.00	saturated thickness (ft)
Sy =	0.21	specific yield in decimals (unitless)
a =	96.00	distance (ft)
Q =	3.52	pumping rate (ft ³ /s)
Calculated Input Variables		
T =	9,968	transmissivity (ft ² /day)
Sy/T =	0.00002057	component of sdf (unitless) for observation only
Q =	304128	pumping rate (ft ³ /day)
Qt =	304128	pumped volume (ft ³)
	6.98	pumped vol (ac-ft)
Table Values		
sdf =	0.1895	stream depletion factor (units of time)
t/sdf =	5.276	(unitless)
q/Q =	0.758	(unitless)
v/Qt =	0.596	(unitless)
Stream Depletion Rate		
q =	2.669	stream depletion rate (ft ³ /s)
% Total =	75.8	contribution of total flow rate from stream (%)
Stream Depletion Volume		
v =	181,199	vol. strm depletion (ft ³)
	4.1598	vol. strm depletion (ac-ft)
% Total =	59.6	contribution of total volume from stream (%)

Conclusion

Based on the input variables defined above the proposed point of diversion has a direct and immediate hydraulic connection of at least 50% depletion in 24 hours. Most of the user defined input variables are well known. The largest variable of the analysis with potential error is hydraulic conductivity. However, even a lower average value of 143 ft/day for well sorted sands (Fetter, 2001) would provide a stream depletion rate of 52.1%.

Given the proposed point of diversion's proximity to the Boise River within the floodplain and defined soil profile, a strong connection between the two sources is expected.

Subject: Application for Transfer

Dear Scott,

Enclosed on behalf of Mace River Ranch Owners Association Inc. is an *Application for Transfer* proposing an additional diversion point be added to three Boise River water rights. The new diversion will consist of a collection gallery for shallow ground water adjacent to the Boise River. A stream depletion analysis will be forthcoming. Check #1586 is enclosed for the \$740 application filing fee.

Thank you very much for your consideration and assistance in this matter. Please call me if you have any questions.

Sincerely,
